

Journal of Intelligent and Connected Vehicles

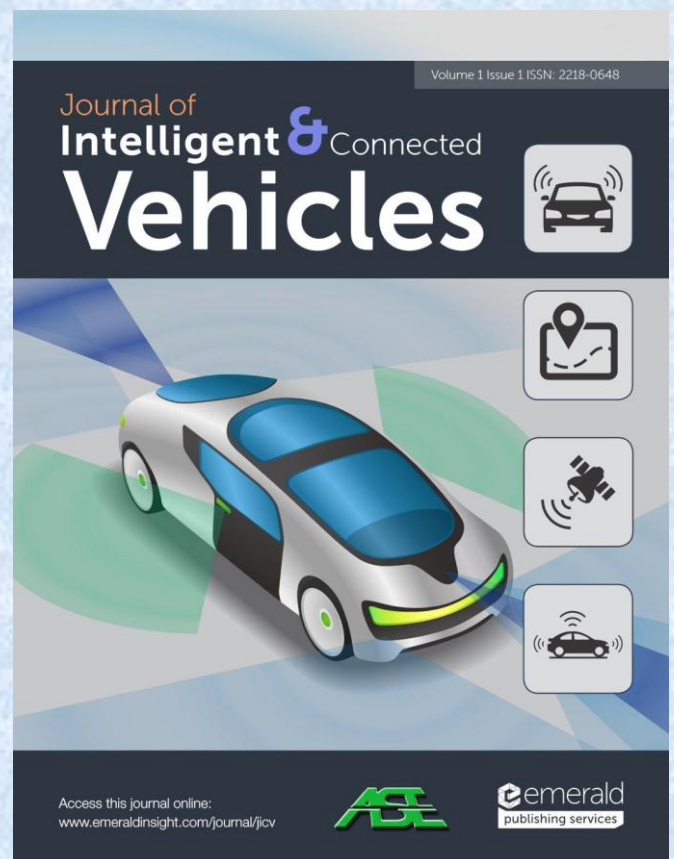

*Editor-in-Chief: Keqiang Li, Executive editor-in-chief: Jianqiang Wang
State Key Laboratory of Automotive Safety and Energy, and Centre for Intelligent
Connected Vehicles and Transportation, Tsinghua University, China*

3 Issues per Annum

**Broad Readership and
Interdisciplinary: Science,
Engineering and Technology**

**Original Research and New
Developments Covering all
Aspects of Intelligent and
Connected Vehicles Technology**

- Environmental perception and situation awareness
- High definition map, localization and navigation
- V2X connection and cooperation systems
- Sensor Data Processing
- Intelligent driving decision and control
- Drivers' behaviors modeling and analysis
- Human-Machine integration and cooperative driving
- Functional safety, test and evaluation

Associate editors:
