My courses widget and pinning your courses in OAKS

Note: If you have taken less than 12 courses, all of your courses will appear in the Course Selector otherwise you will have to pin courses to the My Courses area on your My Home page in order to see your current courses.

MY COURSES WIDGET
My Courses Widget allows you to see your courses by "pinned" or by term. You can also get a quick view of the new items in your course using the icons below the course name. These alerts display the number of new Assignments, Discussions, and Quizzes. You can still use the waffle icon and can still pin courses you want. TIP: your Spec and Self Enrollment courses will appear at the very end, so it's recommended that you PIN those courses so they show in the Pinned tab.

Pinning your Courses:

Follow the instructions below on how to pin your courses to the My Courses area on your My Home page.

1. Once in OAKS, select the Course Selector icon (see screenshot)
2. Once you have found the course title, click the pin (this will pin courses to the My Course area on the My Home page)
3. Once the courses have been pinned to the My Courses area on the My Home page, you will see the course listed along with title and all other course information.

Note: You will have to pin and unpin courses each semester to keep updated courses displaying under the My Courses area on the My Home page.
