To register for the events above visit <http://tlt.eventbrite.com>

The Instructional Technologists of TLT endeavor to meet the unique needs of each faculty member to achieve his/her pedagogical objectives: Innovation, Life Long Learning, Pedagogy, Collaboration, Assessment. To facilitate these goals we offer a wide range of services to faculty at the College of Charleston including:

Drop-In Support – Located on the 3rd floor of the J.C. Long Building, TLT offers drop-in assistance for faculty who need a little extra help integrating technology into their teaching. Through the use of the Faculty Technology Center, faculty can have access to technologies that they may not have in their offices such as slide and document feed scanners as well as video equipment. Feel free to come by and see us any time.

One-on-one Training – We provide hands-on, one-on-one training for faculty either in their office, the Faculty Technology Center, or their classrooms.

Small Group Training – We provide hands-on, small group training for faculty. We will work with your department or school to customize the training to meet your specific needs.

New Technologies – Faculty members often hear about a Web 2.0 solution for instruction or research, but they are unsure what it is, how it works or how they can use it effectively in their teaching. TLT is available to meet with faculty to determine which new technology may best solve their teaching challenges. TLT can also help by creating student tutorials to help facilitate the use of the technology.

Research Collaboration and Support – Instructional technology can be used to maximize the effectiveness of teaching, research, assessment, and curricular outcomes. TLT is available to advise faculty on the use of technology to support research goals and to collaborate with faculty on research publications.

Mobile App of the Month

Cloud On: CloudOn lets you use your iPad to create, view, and edit files directly in Microsoft Word®, Excel® & PowerPoint®. These applications will work the way you expect them to. It also lets you use Dropbox to manage your files. Open them, edit them, and save them right in your workspace using your Dropbox account. <http://goo.gl/Z42zm>

OAKS Tip of the Month

Course Builder. If you are building a new class or updating and changing an old one consider using the OAKS Course Builder. The Course Builder allows you to create and manage your course structure, upload files, and create and manage your assessments all from one area. For more information see <http://goo.gl/7h36g>
