

How to become an Inventor

By Konrad Storm Siegel

How do you become an Inventor:

1. First you need the idea your idea
2. Next you make a prototype
3. After that you share it with people like spark-tank
4. After words you get a patent
5. Then you find a way to sell it
6. You make it and sell it,

Why do I want to be this:

Because I want to try making or finding a way to drive, sale and so on to discover a way not to pollute.

Glossary
prototype: a small picture or thing of your idea.

spark-tank: is when you share with people your idea you planned.

patent: so no one else can get it.
