The Red Apple – Remember when supervising your child on Lexia if you see a red apple in the lower left corner they are confused with the lesson and need intervention. Please sit and do a few lessons with the student (unplug headphones so you can hear!) To get them past their problem. And also a good time to go to talk to your teacher to see what else you could do to help them with the challenging part if needed.

When students get stuck they will not want to do Lexia, so it's really important to give them direct instruction help them get unstuck. The program requires students to demonstrate 90% proficiency and it's always good to avoid frustration.
