

ANISHA ZHANG

10th Grade High School Student 3RD YEAR AT ISB

INTERESTS

I've always been fascinated by all types of visual art forms. I've explored numerous mediums and styles of art such as pencil sketches, acrylic and watercolor paintings, photography, filmmaking, digital arts, ceramics, print making and fashion design... I like to express different ideas through visual representations rather than words or physical movements (both of which I'm not very good at). One of my favorite artists is an Austrian painter called Gustav Klimt. He is well know by his masterpiece *The Lady in Gold*.

SKILLS

My best skill is probably drawing on paper, since it is the most accessible material when it comes to jotting down ideas and inspirations. I'm pretty confident when it comes to graphic design (posters, collages) and creating things with my hands.

GOALS

For the majority of my life, I've been creating art physically (as in not digitally). Hence, I don't have a lot of experience with digital medias. I would like to take Product Design as an opportunity to learn new skills and tricks with digital art and design on applications such as Adobe Illustrator and/or procreate.

BE A BETTER VERSION OF YOURSELF
