

POKÉMON GO!

Catching Pokémon

The first thing in Pokémon go is that you have to catch Pokémon and it is really simple. All you have to do is tap a Pokémon when it pops up on your screen. Then you'll have to flick or throw the Pokéball in the game and the Pokémon will go in if you hit it.

Collecting

Fifth thing is collecting, all there is to collecting is when you catch a new Pokémon this scene will pop up and say Pokémon entered to Pokédex.

Pokéstops

Third thing is Pokéstops, Pokéstops are also really simple all you do is when you see a small blue thing with a Pokéball tap on it and spin the circle in it. It will give you potions, Pokéballs, etc. Then when it is purple you will have to wait about four to five minutes to spin it again but don't worry there everywhere.

Introductions

This game is going to make you catch em' all!

Pokémon Go! Pokémon Go is a SUPER popular game and it is free. Pokémon Go is a game that makes people go outside and walk around to catch Pokémon. There can be good Pokémon and bad Pokémon. There are also other things you can do like collect, battle, hatch, choose a team and get items. In this article I will tell you about those topics, how you catch Pokémon how you battle with them, how you heal them and much more!

Hatching

Sixth thing is Hatching, Hatching is really simple. All you need to do is spin a Pokéstop and get a egg from one. Then when you have got one go to your Pokémon and swipe to the left. It will show all your eggs. You can only hold nine. Once you get one press on the egg. It will be a 2k, 5k or 10k. The k means kilometers. 2 is the worst 5 is better and 10 is the best. Yes, you need to really walk to hatch eggs. But the bigger the number the longer you walk. Once it hatches a scene will pop up and show you the egg hatching and then you will see a Pokémon. You can not walk two eggs or three or four eggs at one time. You need blue egg incubators. The orange one you keep forever, but the blue ones only works for three times(three egg hatches). You only get blue egg incubators from leveling up or you buying them with Pokécoins.

Healing

Fourth thing is healing, healing is really simple. When your Pokémon faints it faints and you can't use it anymore for battling. All you have to do is you press the Pokéball on the bottom of your screen(not catching a Pokémon). You'll have to press the items category and there will be potions tap the one that is a 3D diamond then press on the fainted Pokémon it will heal your Pokémon a bit and if you want to heal all of it press on the purple or yellow potions.

Battling

The second thing is battling, battling is a thing where when you beat a series of battles you will take down a gym, but you can only be level five or higher. A gym is where you battle. If a gym is a blue gym that gym is taken by team mystic. If a gym is yellow it is taken by instinct and if a gym is red it is taken by valor. (I'm on mystic). Now since you now know your team's let's get into real battling. So you can only use six Pokémon to battle a gym. You can also choose which Pokémon that you want to use. The gym can also have different heights, the gym will be low if there are not lots of Pokémon in the gym. If the gym is high, there are lots of Pokémon in the gym. You can also see when you tap the gym. You can see which Pokémon you battle, if you tap the gym and swipe to the right you will probably see another Pokémon, if not that gym only has one Pokémon in it. You also can add Pokémon in a gym. First you press the gym, second you have to see a gym sign with a plus sign next to it. Press that button and it will put you to all your Pokémon. Choose one Pokémon. Then your Pokémon will be in the gym. Now if you want to battle press the bottom right. It will bring you to the six of your Pokémon. When you're done picking press Go! In the bottom right corner, you will start battling. To battle you will start out with the first Pokémon in your lineup. If you want to battle you just want to tap the screen, you can also use a special power. If you want to get a special power you want to keep on tapping, there will be a bar two smaller bars three smaller bars or even four smaller bars. Until one of them is filled up hold down on the screen, the

Pokémon should use their special power. The Pokémon will faint when it has no hp. If there is only one Pokémon in that gym you will defeat that gym, there will be two Pokémon and so on. Once you defeat a gym it will become white. Press the white gym and add your Pokémon. Then that gym will become your team color. After that you can gain something called defender bonus which allows you to get something called Pokécoins. Pokécoins you gain from the shop. To get there you simply go to the Pokéball then go to shop. In the top right corner you will see a shield press on it and you gain 10 Pokécoins. With Pokécoins you can buy items like Pokéballs and more Pokémon space(maximum is 250)ect.

Now you know a lot about Pokémon Go! Are you ready to catch em' all?
