Multiplication and Division Stories

Draw a picture or write an equation to represent each problem. Solve the problems any way you choose. Show your work.

- 1 There are 36 students in Mr. Cahill's class. His seating chart shows equal rows of 9 desks. How many rows of desks did he make?
- 2 Melanie painted 5 petals on each of 8 flowers. How many flower petals did she paint in all?
- 3 Rob's tennis coach brought 7 cans of balls to practice. He has 21 tennis balls in all. How many balls are in each can?

NOTE

Students solve multiplication and division story problems.
