

iOS Developer

Making impacts in a fast-growing startup

PinOn, Inc. is a young and passionate startup based in Boston and backed by one of Boston's leading startup accelerators. We're looking for an iOS Developer to join our team who is passionate about building the next generation location-aware content sharing and social media platform. You will enjoy working with the true innovators and with one of the fastest growing data sets and you will see your insights turned into product decisions that can potentially influence the lives of more than 1 Billion people.

Please send your resume to:
zeliang.cheng@pinon.io

Responsibilities:

- You will work as part of a team, but be self-motivated and comfortable solving problems independently.
- You will create solid, clean code so you won't hate yourself the next time you have to visit it.
- You will appreciate good design, and have a solid idea of what makes a great UI/UX design.
- You will be able to quickly analyse bugs and usability issues in live apps, and provide solutions for those problems with a quick turnaround.

Basic Qualifications:

- Mastery of Swift.
- Bachelors or higher degree in CS with 1+ year of iOS experience; OR Bachelors or higher degree in CS related majors with 2+ years of iOS experience.
- Experience shipping one or more Objective-C or Swift iOS apps, ideally currently available in an App Store.
- Strong knowledge of XCode, CoreData, Push Notification and UIKit.
- Knowledge of web services, specifically REST APIs.
- Strong knowledge of Git and GitHub.
- Experience in Google Map, Realm, PromiseKit or AsyncDisplayKit is a plus.
- Experience with Machine Learning and AI is a convincing plus.

Core Benefits:

- Rare opportunity to join a fast-growing startup and to make real world impacts.
- Work in an awesome atmosphere and learn from true innovators.
