Hook their Interest and Engage their Brains!

Using real world problems and evidence-based teaching strategies to improve student learning.

Two Prominent National STEM Education Initiatives

HAVE COME TO SUNY!

The Mobile Summer Institutes on Scientific Teaching (MoSI) and Science Education for New Civic Engagements and Responsibilities (SENCER) are joining forces to provide training opportunities for current and future SUNY faculty who want to increase student interest, engagement and learning in their classes.

APPLY HERE

Join us this summer for the MoSI-SENCER workshop (5-day, virtual) funded by a National Science Foundation grant to Binghamton University, SUNY Geneseo and Stony Brook University!
