EXECUTIVE SUMMARY

The Bureau of Economic Analysis (BEA) defines foreign direct investment as “an investment in which a resident of one country obtains a lasting interest in, and a degree of influence over the management of, a business enterprise in another country.” The purpose of this paper is the study of FDI in Morocco and to see if the factors affecting this FDI can be valid for other developing economies. An econometric model will highlight the impact of factors affecting FDI on the economy of Morocco coupled with a study of co-integration.

Keywords: Foreign Direct Investment, Co-integration, Stationarity,
