**SUSTAINABLE LIVING**

Fall 2018 –MWF, 12:00 – 12:50pm

How can we face the human-environmental challenges we face in the 21<sup>st</sup> Century? How can we sustain our societies and the natural environments that support them? We need to recognize that human societies and the natural world are deeply interconnected and that we can only understand these challenges by understanding them as interconnected systems. *Sustainable Living* provides an introduction to systems thinking and ecological resilience for sustainability challenges across cultures and environments. ***Satisfies the Ways of Knowing foundation and the Information Literacy and Oral Communication Proficiencies.***
