

Embed A PDF In A Post

If you would like to share PDF projects in your Learning Portfolio, choose the Standard Post format and follow these steps. However, the PDF format needs to be hosted on a web service such as issuu.

Step 1

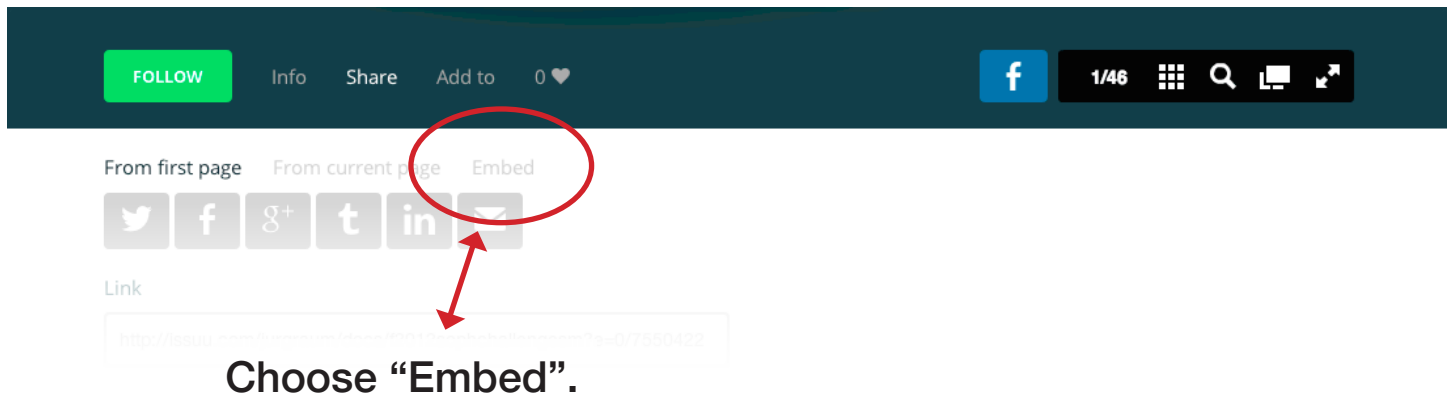

Step 2

Step 3

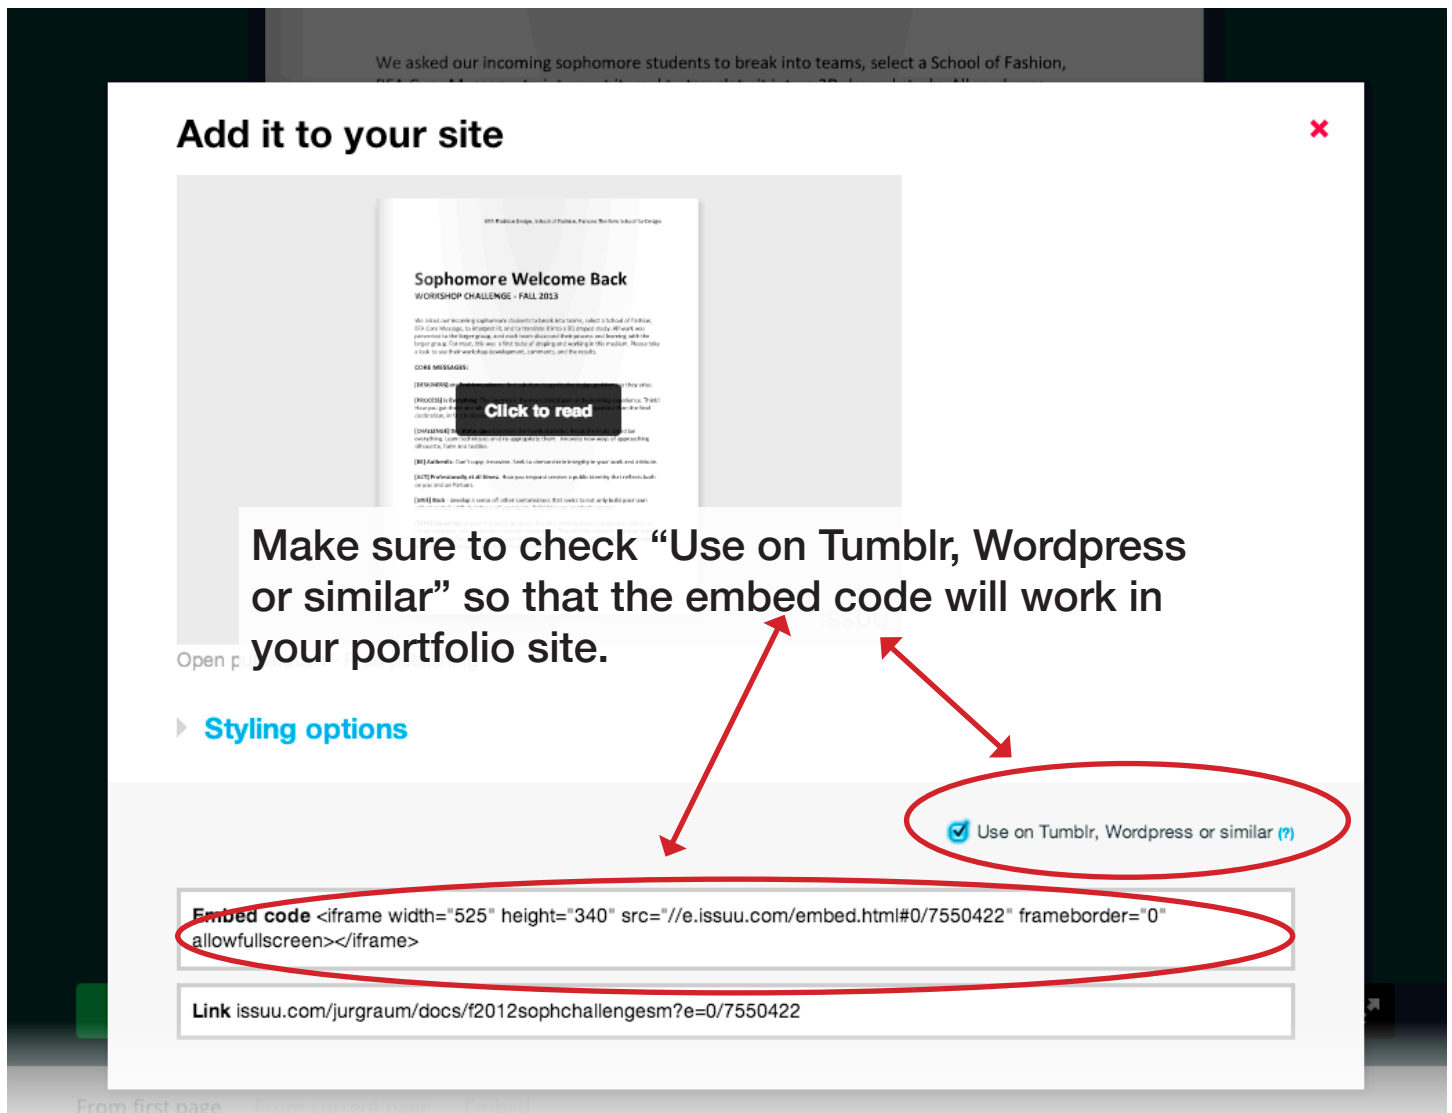

Step 4

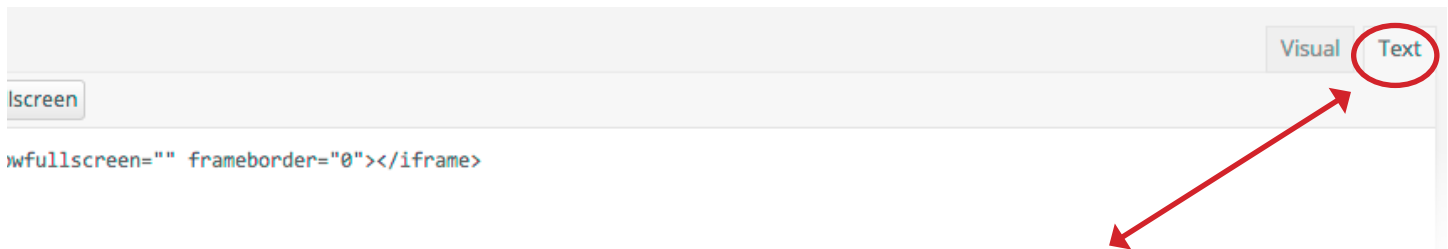

The screenshot shows a social media sharing interface. At the top, there are buttons for 'FOLLOW', 'Info', 'Share', 'Add to', and '0'. Below these are social media icons for Twitter, Facebook, Google+, Tumblr, LinkedIn, and Email. The 'Embed' option is circled in red, and a red arrow points from it to a text input field containing a URL: 'http://issuu.com/issuu.com/docs/f2012sophchallengesm?e=0/7550422'. Below the input field, the text 'Choose "Embed".' is displayed.

Step 5

The screenshot shows a dialog box titled 'Add it to your site' with a red 'X' in the top right corner. The dialog contains a preview of a document titled 'Sophomore Welcome Back WORKSHOP CHALLENGE - FALL 2013'. Below the preview, there is a 'Click to read' button. A red arrow points from the 'Click to read' button to the text: 'Make sure to check "Use on Tumblr, Wordpress or similar" so that the embed code will work in your portfolio site.' Below this text, there is a section for 'Styling options' and a checkbox labeled 'Use on Tumblr, Wordpress or similar (?)' which is checked. A red circle highlights this checkbox. Below the styling options, there is a text area containing the embed code: 'Embed code <iframe width="525" height="340" src="//e.issuu.com/embed.html#0/7550422" frameborder="0" allowfullscreen></iframe>'. A red circle highlights this code. Below the code, there is a text area containing the link: 'Link issuu.com/jurgraum/docs/f2012sophchallengesm?e=0/7550422'. At the bottom of the dialog, there are buttons for 'From first page', 'From current page', and 'Embed'.

Step 6

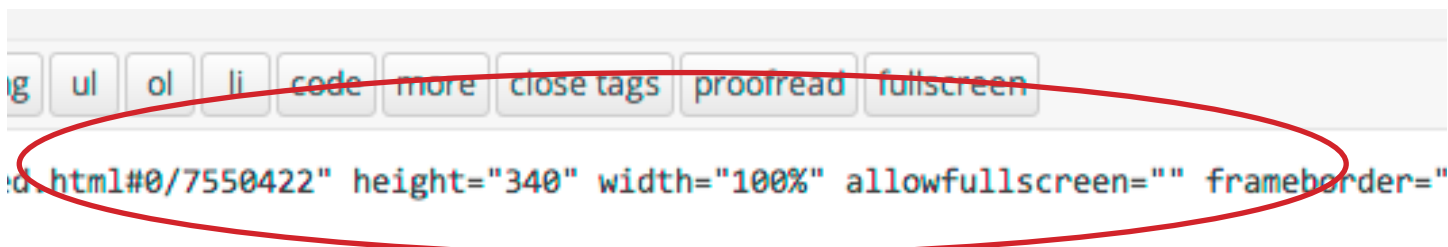

Navigate to your portfolio and in the text editor, make sure the “Text” tab is in front. Placing embed code in the “Visual” editor will NOT work.

Step 6

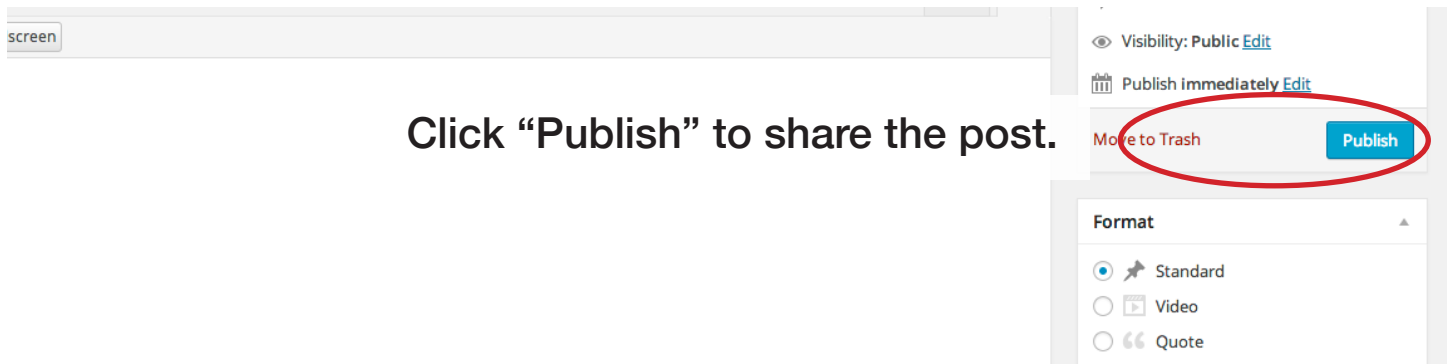

Paste the issuu embed code in the text editor. You can include a description of the project.

Step 7

Make sure width is set to “100%” between the iframe tags to fill the post’s width.

Step 8

screen

Click "Publish" to share the post.

Visibility: **Public** [Edit](#)
