Conferring well with students requires that I have a vision of what I hope for them as writers. Just as listening up close has everything to do with how to confer, stepping back to see the big picture is equally important.

Joanne Hindley, In the Company of Children

Each person’s life is lived as a series of conversations

Laura Benson ~ LBopenbook@aol.com ~ lbenson@iss.edu
What is a conference? What does conferring mean?

A **conversation** between two (or more) souls devoted to deepening thinking and their relationships with one another.

An opportunity to **coach and nurture** another reader’s process of understanding/writer’s process of being understood/learner’s conceptual development.

An essential form of **feedback** all readers and writers need and long for (Benson, 2009).

*Writing is problem sol*

Shelley Harwayne, *Lifetime Guarantees & Writing Through CI*
Rituals and routines structure and guide my conferring. They give my individual instruction predictability and focus. My conferences are not haphazard or random because I know what each student and I need to gain from our one-on-one collaborations. My decisions about why and how to engage in a conference with a student are shaped by

1) my relationship with the child and
2) by my instructional intentions or purpose for the conference.

In the following pages, I will illustrate some my own conference structures to paint a portrait possibilities for your own.

*In new relationships, building trust with the reader/writer is paramount. Over time, I can nudge students in conferences to take more risks because they know that my suggestions are coming from unconditional caring and sincere inquiry. Maintaining connected and strong relationships with students is always at the heart of effective teaching and, thus, absolutely paramount in developing edifying conferences.
Types of Conferences

*There are an infinite number of possibilities, reasons, and purposes for engaging in conferences with our students. To profile a here, I engage in the following conferences over the course of a school year to nurture students’ reading, writing, learning, and confidence.

Building Up Confidence Conference
Book Choice/Matching Conference
Focus Lesson Follow Up Conference
Individual Student Goal Follow Up Conference
Strategy Conference
Intervention/Extra Support Conference
Word Work Conference
Stamina Building Conference
Goal Setting Conference
Getting Started Conference (priming writing)
Revision Conference
Editing Conference
Publishing Conference
Differentiating Response/Tasks Conference

and…
Conferences to Support Students’ Use of Thinking Strategies

© Benson, 1990; 2005

Listen

Name

Nudge
Listen for evidence of the reader’s/writer’s use of focus lesson(s), strengths, and/or needs.

I might begin with an invitation such as:

- *Tell me about your thinking/reading/writing.*
- *How can I be of help to you today?*
- *We’ve been studying why and how to make connections in our reading/writing. How can I be of help to you today in mak connections as you read/write?*

As students get to know me, I often do not have to say anything because they know I am most interested in listening to them first. So, as I sit next to a student, he/she just begins to tell me about their literacy work.

As the student shares his/her reading/writing, I listen for and look for direct connections to our current learning focus and record the student’s strengths and/or needs in implementing this focus effectively. If I am not sure about the reader’s/writer’s use of the focus lesson or if the child is very quiet, I might need to nudge my evidence gathering by saying something like:

- *We’ve been studying how questions focus a writer’s work. Tell me about how you are using questions to guide your writing.*
- *We’ve been studying how questions guide and energize a reader’s thinking. Show me where/tell me how questioning is helping you understand what you read/this text.*

Name how the reader/writer is using the focus strategy(ies) effectively.

The naming may need to come from us first but students should be encouraged to name their strengths/effective practices as soon as possible and as often as possible. Encouraging metacognition is key. In this part of my conference, I might say something like:

- Your “I bet…” inferring really seems to be helping you understand the character’s feelings. I might add, What are you noticing about your inferential thinking?
- Your thinking is much deeper because you are focusing on identifying the most important ideas as you read these nonfiction texts. I might add, What helps you know what is important in nonfiction text/this text?
- I noticed that you problem solved this part/this word so that you really understand section. I might add, How did you know to do this?
- Name something you are doing well here in your writing.
What are you doing to help yourself think/understand as you read?/What is helping you understand what you are reading?

Leave the reader/writer with an assignment.

I might say something as simple and straightforward as:

• Before I came to confer with you, you were working really hard. I know that you will continue to work hard in your writing/reading as I leave. Good job, Bud!
• You seem to really be in the habit of inferring in this book. Remember to stop and infer as you get the other texts in your box (collection of diverse genres developed for students’ independent reading). Sound good?

Or, I might provide more instructional support by saying something like:

• We talked about how to figure out a new word (as you write) by using your visual memory – by having a go at it on this piece of scratch paper so that you can see if it looks right. You are already in the habit of using your phonics to figure out new words. Hooray! So, when you want to use a new word in your writing, stay courageous and know that you now have a few ways of problem solving or cross checking a new word – using your phonics to sound it out and writing it out to see if it looks right to you. Keep using those two strategies as you continue to write today and when you are writing at home tonight, etc. And let’s check back in with each other tomorrow to see how this is working for you, okay?

Or, I might offer the reader/writer some intriguing challenge or rigor by saying something like:

• From what you shared about why and how you are summarizing as you read, you understand so much about this way of thinking. Would you be our focus lesson/mini lesson teacher tomorrow and teach the rest of our class about how they can summarize?
• You have grown so much - I see that you are monitoring your understanding by stopping and talking to yourself. I wonder if you might stop a bit more often to understand more of the author’s ideas here. I think you might be stopping to self-talk too many pages and that might be making it hard for you to remember all the great things that are happening and being said here. I think stopping after every paragraph or even after a few sentences might help you understand more deeply. What do you think?...Let’s tip in some sticky flags in your book to figure out a good stop and think pacing for your reading...Later today/tomorrow, let me know how this feels and if it is helping you understand more and enjoy your reading more – always cool, right?
How do proficient readers work to understand the texts they read, view, and hear?

As thinkers, how do we work to understand “outside of text” and inside of text?

- “This seems really important because…”
- “A big idea I am taking from this text is…”
- “The author wants me to consider…”

Please see my blog laurabensonopenbook.blogspot.com for additional examples of strategy conference prompts and self-talk models.
Thinking Strategy Study Conferences
©Laura Benson

Strategy conferences give me opportunities to further and monitor a student’s learning about our focus thinking strategy. As a community of learners, we study one strategy for depth over a period of time or several strategies for many weeks. I teach and look for evidence of strategy/theses strategies as I work with students throughout our day and across time. I want to link strategy learning in every setting for children to help them:

- make connections between these learning experiences;
- witness the utility of this brain tool, our focus strategy/ies, as a critical way to construct understanding; and
- help students take greater strategic control over their thinking and engagement.

Through conferring, I am continually working to create a bridge of learning from our large and small group gatherings to the child’s independent reading. Additionally, my conference conversations should help each child make connections between this conference and previous conferences. My intention is to deepen and refine each child’s understanding and use of our focus strategy. And I know that conferences are essential in creating strong and connected relationships with my students.

I see every student several times a week for conferences. Usually, I see every student about 4 - 8 times a week. Please note that I am able to do this because I have been conferring with students for over thirty-two years now. I can learn how to effective engage in short conferences (most often) and why and how to orchestrate long conferences strategically in my students’ learning lives. If you are new to conferring or getting back to conferring with a new group of students, give yourself permission to start with a goal of seeing each student once a week or once over a period of two weeks. As I meet with students one-on-one, the key rituals of most of my strategy conference outlined for you below.

Listen for Strategic Thinking

Initially monitoring and evaluating students’ use of our focus strategy/ies, I look for how, why, and if the kids are working to understand what they are reading, writing, and/or learning.

- Questions I ask myself:
  - How does the child talk to himself as he reads?
  - Do I hear the child using the self-talk from my modeling of this strategy? What innovations is he adding?
  - Is the child’s use of our focus strategy contributing to the child’s ability to understand this text/texts of this genre/all text
- Take notes about student’s use of strategy recording strengths, needs, and attempts
- Gauge whether child is reading appropriate level/interest texts. Monitor student’s zone of work (ZAD? or ZPD?). If text is too hard he/she can’t employ and grow strategy use and understandings.
**Name Thinking**

Talking with a student, I may engage in the reader/writer in self-reflection, offer additional instruction, or both:

- Name one or a few of child’s effective thinking strategies, behaviors, or skills. As soon as students can, encourage them to name thinking strategy/ies they use to support their understanding.
- If a student does not seem to be understanding what he is reading, is stuck writing, or if he is not implementing a strategy/ies you know would be beneficial to his understanding, encourage student to use/remember to use focus strategy.
- Provide additional modeling of focus strategy, if needed. Or, think/read/write collaboratively with student to give him some successful practice at working to understand/working to be understood.
- Ask authentic questions (questions I don’t know the answer to) to vividly gain a picture of how the child works to understand what she is reading/how the child works compose and be understood as a writer.

**Nudge Thinking**

To deepen students’ understanding, nudge their strategy employment by leaving a student with a practice assignment.

- Assign practice and/or extend use of strategy(ies) with options such as:
  - As you read this book, put a post-it note on the page(s) where you use (our focus strategy)/where you hear yourself using the self-talk of our focus strategy.
  - Record your thinking in your writer’s notebook. We’ll be talking about our thinking/use of strategy at our talking circle/reader’s sharing circle today.
  - Before you begin reading the next chapter, jot down your thinking/use of strategy on this bookmark.
  - While you read this poem, highlight your thinking about what seems most important. I’d love to hear your thoughts later, okay?
  - Flag the places where you are using the (focus) strategy
- Or, remind child to practice the focus strategy with the assignment given to the class earlier during large group focus lesson.
- Side bar: I often give students a strategy assignment as they leave our large group modeling/focus lesson and move into their independent reading. At our talking circle at the close of our workshop, we talk about and share their practice assignments. If I don’t follow through, my intermediate grade kids learned to blow me off and my primary grade students became frustrated or confused.

**Encourage Self-evaluation**

To wrap up conferences, it can be edifying to ask students something like one of the following. This is especially important if the student not yet self-initiating or describing how she is working to understand.

- “What did/can you do well as a reader/writer?
- “How is this strategy helping you understanding what you are reading/writing?”
- “If you were asked to teach kindergartners about this, what could you share with them (that you do well)?”
- “What are you learning about yourself?”
**CHECKING for UNDERSTANDING:** Assessing Students’ Metacognitive Knowledge

The purpose of metacognitive strategy instruction is to increase students’ awareness of themselves as learners and place students in control of their own learning activity (Palinscar & Ransom, 1988). Metacognition refers to knowledge of the factors that affect learning activity, including reading control as well as control of these factors (Baker and Brown, 1984). Three sets of factors that act and interact in reading are knowledge of oneself as a reader, the demands of reading tasks, and the strategies one can employ in reading activity (Garner, 1987).

There are several ways in which teachers can become informed regarding their students’ metacognitive knowledge and strategy use. One is simply to ask the children questions. For example:

- *What do you do when you want to be sure to understand and remember a chapter in your history book?*
- *Why is reading a science book sometimes difficult? What is the thing to do when you are having difficulty reading the science book?* (Wixson, 1984)

Another way of assessing this knowledge is by asking a student to tutor another child, particularly a younger child.

- *“If you were going to teach your kindergarten buddy about _____, what would you say?”*
- *“How can we teach our Pre-Kindergarten buddies about rereading?”*

A variation of tutoring is to share vignettes in which children are taking certain approaches to reading activities and ask the students to discuss in an evaluative manner these approaches.

Think-alouds are another practical and informative way to evaluate students’ metacognition. Ask a student(s) to think aloud during, as, and/or after he/she reads a text. Listen for how the student understands and works to repair confusions, too.

---

**Affirm the child’s success, growth, approximations, and /or attempts**

And/or, it may be most supportive to close the conference by explicitly naming something the student did well, highlighting her growth or by helping her value an approximation or attempt. Students are often pretty hard on themselves, especially if their current work does not match their hopes or grade level proficiency. Affirmations help students come to know themselves more clearly, see the hope of their progress over time, and gives us a warm, positive way to part.

---

**Be kind to yourself**

Give yourself time to become comfortable and effective with your conferring. As you add or deepen conferences to your teaching repertoire, be gentle with yourself. An old saying is a good thought to take along as you seek to become more effective at creating edifying conferences with your students: *Aim for Progress, Not Perfection.*

---

Laura Benson ~ lbopenbook@aol.com ~ lbenson@iss.edu
**Caveat**

We don’t want strategy instruction to eclipse children’s wonder and sense of self-discovery. Our strategy mentorship must be purposeful and practical for our students and, most of all, it must make literacy and learning theirs. We don’t want our students to become parrots echoing back our modeling with empty words (like their universal “sound it out” when asked what they do when they come to a new word). Strategy instruction is primarily helping students become aware of the thinking tools they already have within themselves and strengthening those tools so that they can be independent and choosing readers and writers. Our work is to ensure that our students have the inner tools they need to make thoughtful decisions, take care of themselves, and be compassionate citizens.
A FRAMEWORK FOR INDIVIDUAL READING CONFERENCES
Regie Routman, Reading Essentials

• Bring me a book that you can read pretty well.
  o Is the child able to select books she can read and understand?

• Why did you choose this book?
  o Does the child take recommendations from peers?
  o Is this a favorite author or series?
  o Is he over relying on designated book levels?

• What is the reading level of this book for you?
  o Does the child know that understanding requires reading easy and “just-right” books?
  o Is she over relying on being able to read all the words?

• Tell me what the book is about so far.
  o Can the child give an adequate retelling that shows she understands the gist and main ideas of the text? If not, check oral reading to be sure she can read the text. If oral reading is a problem, help her select an easier text. If not, probe to find out why she cannot say what the book is about.

• Read this part of the book for me.
  o Have a younger student and developing reader read orally. However, once the child is a “reader.” Have her read silently, since most of the reading we do in the world is silent. Ask her to read two or three pages while you read along silently.
  o Note the time she starts and finishes in order to approximate her reading rate per page.
  o Jot down difficult vocabulary words so you can check to be sure she is figuring them out.
  o Observe her as she reads silently. Does she sub vocalize, reread, use illustrations and visuals, get the humor, seem to skip over hard vocabulary?

• Tell me what you remember about what you just read.
  o If the child is reading fiction, does she understand character motivation and behavior?
  o If she is reading nonfiction, is she also using charts, photos, and graphs to get information?
  o Check whether difficult vocabulary is understood. Is the student going beyond literal events in her retelling?

• Let’s discuss your strengths and what you need to work on. (Always note first what the child has done successfully so she will continue to do it and be affirmed for her efforts.)

  STRENGTHS: (Focus on what the child does well- selecting a “just-right” book, retelling appropriately, figuring out vocabulary, inferring meaning, rereading when necessary.)

  GOALS: (State, and have student restate, one or two goals that have resulted from the conference.) See pages 106-107 for goals.

• How long do you think it will take you to complete this book?
  o Has the student thought about it and set a realist goal? For example, if there are eighty pages left to read, and she allots one hour a day for reading thirty minutes at home and thirty minutes in school, at a rate of about one page a minute, she should easily be done with the book in two days or le
READING CONFERENCE with _________________________________ Date _______________

Bring me a book that you can read pretty well.  TITLE OF BOOK ______________________________ GENRE ________

Why did you choose this book?

What is the reading level of this book for you?  __hard __easy __just-right

Tell me what the book is about so far.

Read this part of the book for me.

Tell me what you remember about what you just read.

Let’s discuss your strengths and what you need to work on.

Strengths:

Goals:

How long do you think it will take to complete this book?

*Reading Essentials by Regie Routman

Laura Benson ~ LBopenbook@aol.com ~ lbenson@iss.edu
Think of a conference as a genuine conversation about a book, not a question/answer session.

Monitor student’s disposition to “live a literate life” by noting and recording three key hallmarks:
- Student’s use of focus lesson (including metacognition)
- Student’s comprehension (always the goal)
  - “I see you’re reading ______. Tell me about it.”
  - Is the child working to make sense? If not, is he/she self-correcting and working to fix his/her confusion?
- Student’s unique needs such as word work, stamina, book choice, fluency, etc.

Seize the opportunity to offer the student more instruction.

Keep your conferences short.
- Some will be 1-3 minutes; most will be under 5-8 minutes; and a few will need to be longer.

The student should talk more than you do.

Confer with individuals or small groups (2-4 students).
Thinking Strategies Conference Questions
©Laura Benson

Conference conversations help students narrate at least some of their thinking work so that we better know what they understand and how they are working to create understanding as readers and writers. To know how students are thinking as they read and write, ask students to name and verbalize their ways of creating understanding with one or a few questions such as the following. Noting the aptitude of students’ thinking strategies over time can help you determine your student patterns of performance as comprehenders and composers. Here are a few reading conference narration nudges. Please note that this is not a comprehensive list but an invitation to create your own!

Connecting/Using Schema

- Did you hear yourself say “This reminds me of…” as you read this?/Where did you hear yourself say “This reminds me of…” as you read this?
- Is there part of this story or piece that reminds you of something in your life or of something that has happened to you? Tell me about that!/What part of this text reminded you of…?

Questioning

- What were your “I wonder…” questions as you read this piece?
- Can you show me a part of the text where you have a question? What were you wondering here?

Sensory Imaging/Visualizing

- Were there places in the text where you made a picture in your mind? What did you see?
- What specific words or parts helped you create those images/create your mind movie of this text?

Inferring

- Share one of your “I bet…” inferences with me. (Possible follow up: What helped you infer that? or What made you infer/predict that?)
- Show me a place in the text where you found yourself making an inference.
- What do you predict will happen in this piece?/What do you predict will happen next?

Determining Importance

- What are you learning as you read this text?/What does the author want you to learn?
- What seems to be a big idea in this story? What helps you know this is really important?
- What is this story or piece mostly about?
- From reading this text, what ideas are striking you as most important? What makes you think that/know that these are important?/How is the author helping you know what is important?
- What do you think is most important to remember about this story/topic?/Themes? Messages?

Laura Benson ~ LBopenbook@aol.com ~ lbenson@iss.edu
• What text structure is the author using?/What are you noticing about how the author organizes this text?

**Synthesizing**

• Tell me what the piece is about in just a few sentences./How are you summarizing this?
• Can you show me a place in the piece where your thinking changed? How did your thinking change?
• Integrating everything you know from this entire book/these three books, what do you know now?
• What have you learned from your reading that you want to try in your writing?

---

**Additional Possible Questions for Reading Conferences** ~ Dr. Pat Hagerty, Professor Emeritus, University of Colorado

**What is this book about?**

*I see you’re reading __________. Tell me about it.*

**What’s going on in this picture (or the picture on the cover)?**

**Can you show me a place where you used a picture to help you figure out a word?**

**If you could talk with the author, what would you want to ask him or her?**

**Why do you think the author gave the book this title?**

**Have you ever read any other books by this author? If so, how were they alike or different?**

**If you could be any character in the book, who would you choose and why?**

**Does this book remind you of any other books you have read? Which ones?**

**Tell a little about the setting of the book.**

**Who is telling the story in the book? Is the book written in 1st, 2nd, or 3rd person?**

**If the story took place somewhere else or in a different time, how would it be different?**
What did you learn by reading this book that you didn’t know before?

Tell about your favorite part.

Can you show me a word you didn’t know but figured out? How did you figure it out?

Why did you choose this book?

Was there anything you were confused about or didn’t understand?

Is this any easy, just right or challenge book for you? How do you know?

Are you like anyone in this book? If so, who?

What do you think is going to happen next?

Read aloud a part.

Is there anyone in the class you would recommend this to book to? Who and why?

Tell a little about the characters.

Have you made any connections from something in the book to something that happened to you?

Is there a part of the book that is special to you in some way? Tell about it or read it aloud.

Why do you think the author wrote this book?

Were there any words that “sounded like poetry” to you? See if you can find them and tell why.

Were there any words you didn’t understand?

What’s the problem that gets the story started?
Here are a few *compass questions* to steer and guide your formative assessment conferences with students.

**Book Length & Stamina**
How long is your book? Do you think it’s too short, too long, or just right?
How long do you think it will take you to read it?
Are you sure you want to commit to this book?

**Organization/Text Structure**
How is this book structured? (or What supports does the author use to organize this text?)
Have you read other books organized this way?
Are the chapters too long?
Are you comfortable with the print size and number of words on a page?

**Difficulty**
Turn to any page and read aloud. Do you know most of the words?
How many words did you not know? (5 or more unknown words = text is too hard)
Do you think it flowed when you read that?
Did you understand what you just read? Tell me what that part was about.

**Schema**
Tell me about why you choose this book.
A great way to activate your schema/background knowledge is to read the title, view the cover, and read the summary (back blurb or b flap) first.
Have you read other books by this author?
Are you familiar with this topic? Are you interested in reading about this topic?
What is the genre of this book? What do you know about this genre?
Do you think you will be able to make personal connections to this book? Does this book/character/the opening lines remind you of anything or anyone?
“Show Me” Probes

- Show me how you get started with a book.
- Show me how you and your partner read together.
- Show me what you do when you reach the end of a book.
- Show me how your reading changes when you read a really hard text/word like this one.
- Show me how you talk/you two talk about a book.

Reflective Conference Conversations

- Tell me what you are thinking here.
- We have been studying why and how to (use a specific thinking strategy or multiple thinking strategies). How is this helping you understand you read/be motivated to read?
- Last time we talked about using (thinking strategy/word solving strategy). How is that going for you? Show me where you used this strategy
- I saw you stop and do some work on this page. What was going on in your head here/thinking here?
- How’d you like this book? What makes you say that?
- Did you encounter any tricky parts as you read this? Where? How did you solve the tricky part?
- Wow! You’re reading is really growing! How have you grown?/Can I share with you what I notice about what you do now as a reader?
- What were you going to do next?
- I was just watching you and I noticed you were . . .Can you talk to me about that?
- What new work have you been doing lately as a reader?
### Prompting Supports to Help Students Construct Meaning

**Self-Monitoring Prompts**
- What are you thinking here?
- How are you talking to yourself to create understanding as you read?
- What did you do here to repair/fix-up your confusion?
- What do you do when you get stuck/don’t understand?
- How do you work to understand?

**Visual Prompts**
- Does it look right?
- What would you expect to see at the beginning, middle, end?
- What did you notice?
- Do you know a word that starts/looks like that? Were you right?
- Try that again and get your mouth ready.
- Look at the picture.
- Does this sound right?
- Point to each word, make them match.

**Meaning Prompts**
- Does this make sense?
- Look at the pictures.
- What happened in the story when ___?
- Can you reread this and think what it might be?

**Cross-Checking Prompts**
- It could be, but look at the picture.
- It could be, but does that sound right?
- It could be, but look at the way the word begins.
- It could be, but look at the way the word ends.

**Structure Prompts**
- Did that sound right?
- Can you reread that?
- Can you say it that way?
- What other word might fit here?
- Go back and read it again.

**Self-Corrections Prompts**
- Can you find the tricky part? You read ____.
- Was that right?
- Could it be ________?
- How did you know that word was ____?

**Directionality Prompts**
- Where do we begin in reading this text?

**One-to-One Prompts**
- Read it with your finger.
- Did it match?
- Were there enough words?

**Locating Known and Unknown Words Prompts**
- Show me the word ____
- Show me a word you know.
- Show me a word you problem solved/used your phonics to sound it out.
- What letter would you expect to see at the beginning of ____?

**Please remember:** The energy and integrity of conferring comes from engaging in genuine conversations with students with the teacher as chief listener. I am offering examples of questions here to offer you some supportive considerations. But please don’t feel any need or pressure to utilize these as a script. By actively listening to our students, they help us know how to best respond to them to further their thinking work and understanding. By asking questions you do NOT know the answer to, students will come to view conferences as true inquiry and caring supp
Nonfiction/Informative Text Questions

We have talked about expecting to learn things when we read nonfiction. What are you learning as you read this text? What did you learn from this text? Did you find any surprised as you read this? What seemed most important as you read this text? What fact (or facts) did you enjoy learning about the most? Of the information you learned, which would you like to share with someone else? Is there a craft you admire in this nonfiction author’s work? Tell me about that! What craft do you admire in this writer’s nonfiction writing? How does the author help you know what is most important to remember here? How are you working to understand this text/these texts? Would you like to read more books about this topic? Why? What else would you like to find out about this topic? What pictures or illustrations did you find interesting? Why? Is this book like any other book that you have read? If so, how are they alike? How are they different? Which one did you like better? Why? What kind of research do you think the author had to do to write the book? What questions would you ask the author if you ever met him/her? How can you find out more about this topic? Would the book be different if it had been written 10 years ago? What did you discover that can help you outside of school?

Fiction/Literary Questions

SETTING
Tell me about the setting of this story. Tell me what this place was like. When did this story take place? What pictures do you have in your head about this setting/place time? How does the setting impact this story? Have you ever been to a place like this? If not, would you like to visit a place like this? Why? Why do you think the author choose this setting for this story?

PROBLEM / SOLUTION
We’ve talked about problems as being a key aspect of fiction stories. What problem is the (main) character facing here? Who has a problem in this story? How is/did the character work to solve his/her problem? Describe the problem this character had. Was the problem solved? How? What would you have done to solve this problem? When did this same problem happen to you? What happened? How did you solve it?

AUTHOR
What do you know about the author? What’s the author trying to tell you in the book? What makes you say that? What did the author have to know about to write this book? What do you think the author wants readers to think about or believe? What makes you say that?

PLOT
Retell/Tell me about the plot of this story. How did the story begin? What happened in the middle of the story? How did this story end? Acting as the director of this story (as a movie), what alternative endings might you consider? What makes you say that?

STYLE
What special words does the author use to help you hear/see in the story?

THEME
What special words does the author use to help you hear/see in the story?
| **What do you like about the way the author has crafted the story/text?** | **Why do you think the author wrote the book?**  
Do you think there is a message in the story?  What is it?  
So, what is the embedded theme? |
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>CHARACTERS</strong></td>
<td><strong>ILLUSTRATION</strong></td>
</tr>
</tbody>
</table>
| What are the main characters in your story?  
Would you want this character to be your friend?  Why or why not?  
Do you like them?  Do you dislike them?  Why?  
Why is this (character’s feeling or action) important in the story?  
How did/is the character changing?  Are any of the characters changing?  
Do you think it was right for the character to do this?  Why or why not? /Tell me more about this.  What makes you say that? | Who’s the illustrator?  
Share your thoughts/feelings about the illustrations (like/dislike – why/why not)  
How did/do the illustrations add to the text?  
If the illustrations weren’t there, would there need to be more words?  What, those words be?  
What do you think the illustrator needed to know in order to illustrate this story?  
What have you learned about craft from studying this illustrator’s work? |
| **POINT OF VIEW** | **CONFLICT / RESOLUTION** |
| Who is telling the story?  How can you tell?  What makes you say that?  
Which point of view is used? (1st person narrative; uses I) (3rd person narrative or 3rd person omniscient)  
Do you agree with the point of view?  Why or why not?  
Why do you think the author crafted this story with this point of view? | Who has a problem in this story?  How do you predict he/she will solve this problem?  
Is there one problem or more than one?  
Which type of conflict is in your book? (man vs. nature; man vs. himself; man vs. man)  
What advice would you give the character/s as he/she battles this type of con |
When we were first learning to confer with students of all ages, we devoured books written by Nancie Atwell, Donald Graves, and Lucy Calkins. Each of these teachers had their own twists on the essential elements for high quality student-teacher conferences. Over time, we integrated and distilled their ideas into a few core principles.

These core principles guide us in every writer's workshop. And when a conference goes wrong, we often find we have violated one of these principles when we reflect upon how we might have responded differently. We try to:

**Let the child lead.** We lean in and listen to any child as we confer, trusting that they can begin by helping us understand where they are in their writing, and possibilities for what they might learn next.

**Know the history of the child, and the history of the piece of writing.** We know the passions of each child in the classroom, with many children repeating a few crucial themes in their writing - family, favorite hobbies, friends, animals, toys. When we are stuck in a conference, we can often find a way into the writing through these passions and our shared history as writers.

**Assume the child has something to communicate.** There is always logic behind a child's writing, both words and pictures, no matter how confused we might feel when we read a particular draft - it's just a matter of finding out what in the child's experience has led them to their current thinking, talking and symbol-making on the page.

**Be patient, and respect silence.** It is hard for us at times to slow down and be "in the moment" with an individual child - there are usually other children tugging at our sleeves, no matter how often we admonish everyone to respect the space and time of their classmates in conferences. But we need to slow down, listen, and most important, give the child all the time they need to formulate thoughts, or think through just the right word, picture or phrase to capture their new ideas.

**With young learners, write down the child's ideas in a notebook or at the bottom of the page.** This isn't dictation, as much as our attempt to ensure we can remember the child's narrative in their own words.

**Look for the teaching moment.** It might be as subtle as nudging a child toward including more details in their drawing, or as explicit as guiding a child to write a new letter. Some of the most important teaching moments for us celebrate what the child has done well. Success breeds success, and children aren't always aware of the new skills and strategies they are mastering and might use in other contexts.
**Keep it short.** We try to meet with as many children as possible each day in the classroom, circulating through the room and checking in as children write. Some conferences are just a quick sentence or two of support. Others include a few minutes of pulling up a chair and watching as a child writes, asking questions about their drawings or words. It is a rare thirty minute conferring session where we don't manage to check in with all twenty children in the class.

**Include follow-up.** When we leave a conference, the child and teacher both know what is coming next-continuing in a draft, starting a new piece, fleshing out a drawing, or publishing the writing in some form.

When we were first learning to confer, we were overwhelmed at the thought of making all these principles come to life at once in our classrooms - so we didn't even try. Instead, we decided to master one principle at a time. When we were sure we were applying the principle well, we move onto the second principle. Then the third, then the fourth - until a few short months later, all were evident in our conferences. We look at the principles now as a checklist, something to consult quickly when we want to brush up on our conferring skills.
In *Of Primary Importance*, Ann Marie Corgill (2008) explains “While I may vary some part of my writing conferences, following parts are always included.”

- **Ask what the writer wants to talk about in his or her writing or how you can help.**
  - “What do you want to talk about in your writing today?” and/or
  - “How can I help you?”

- **Listen first and assess where the writer is in his or her process and what the writer needs.**

- **Applaud and affirm some part of the child’s writing or illustrating work.**

- **Decide on one teaching point.**

- **Assist the writer through teaching-point talk, support sheets, or demonstration.**

- **Ask the child to restate the teaching point or place of action in his or her own words as the conference closes.**

- **Optional:** Ask if the child is willing to teach the class and summarize the conference in the Talking Circle/Share.
Noting Students’ Writing Growth

Adapted from Carol Avery

A few things to look for as you meet with students and note their growth and progress as writers include:

✓ **Length of pieces** – including added information/evidence of writer’s revision thinking

✓ **Focused topics**

✓ **Development of topics** – i.e. shows rather than tells; creates a logical beginning, middle and end; etc.

✓ **Ability to reread his/her own writing and identify** places where adding or deleting would bring more clarity, completeness, accuracy, interest, etc. to his/her writing

✓ **Range of topics and genres**

✓ **Concern with and growth in using mechanics and conventions in his/her writing**

✓ **Ability to periodically engage in a full process of writing**, perhaps even needing to manage the ups and downs of process

✓ _______________________________________________________

✓ _______________________________________________________

Laura Benson ~ LBopenbook@aol.com ~ lbenson@iss.edu
Following my demonstration lessons, I am often asked, “Laura, what did you write down when you were conferring with the kids? Can we see your notes?” What to record can be a bit bewildering. After all, how can we meet with all 22-36 students and when are we going to have time to read our conference notes anyway? On the following pages, I offer a few ideas from my own teaching journeys to give you a lens into why and how I take my conference record notes.

**First and foremost, focus is the key to creating informative conference record notes.** My rule of thumb is focus. Rather than writing down the 5 things I could write down about any given student’s strengths or needs, my conference record notes are about and aligned to the focus of our focus lesson/modelled lesson (most often with the whole group) and collaborative learning (sometimes with the whole group and sometimes learning student practice and gain from small group fellowships).

**Record Keeping**

**Record it!** Maintain record of your conferences in a method which feels most comfortable and informative to you. You really can’t remember each pearl or puzzle student shares in your one-on-one conversations. You will not see every child every day but, over time you will. Developing and using a straightforward and practical way of recording your observations of students and your
suggestions to students will help you know how to pace your conferences (“Hmm, just looking at my conference record notes, I that I haven’t met with Darius yet.” or “Right! From the notes I took yesterday, I remember that I promised to get back to Veronica about her revisions today. “). Having accurate and easily accessible “notes to yourself” keeps you at the cutting edge of what your students most need right now to grow as writers/readers/thinkers. Your conference records may look like those I have shared with you or they may look very different. You may also utilize checklists, sticky notes, and/or flip book-index card note taking tools does not matter that we use the same template (at all). It only matters that you develop and maintain a system of taking notes at individual students which works best for you.

**Note it!** One of the best things you can do to record your thoughts from your one-on-one conferences with students is to develop your own shorthand. Keep your notes focused and simple. These notes are for you. As the only audience (at least in most cases) the notes only have to make sense to you. Rather than writing every word down, I use codes such as:

- “R” for reading
- “W” for writing
- “M” when I ask a student to mentor the rest of the class by teaching an upcoming focus lesson and I put a circle around the “M” when the has been our writing/reading teacher
- “PE” when students are writing from a personal experience and/or “BK” when students are using their background knowledge as writers/readers/learners
- “SC” for self corrects (in reading or in their writing)
- “p” when I prompted a student; the behavior is not yet independently initiated by the student (such as voicing why and how to use our focus strategy in their own writing/reading; using correct punctuation, remember to stop and self-talk to aid understanding)

Additionally, my rule of thumb is focus. Rather than writing down the 5, 789 things I could write down about a any given student strengths or needs, my conference record notes are about and aligned to the focus of our focus lesson/modelled lesson (most of ten with the whole group) and collaborative learning (sometimes with the whole group and sometimes learning students practice and gain from small group fellowships).

**Archive it!** Keep all writing in the classroom. [See next notes.]

**Zone it!** In decorating, designers often talk about creating specific zones in a room so that each spot has a function and so that room is cohesive as a whole. This principle is also very helpful in creating a delightful and productive writers’ workshop community. With your students, establish places and procedures for the kids to access and return their writing (including the materials and supplies they may need such as staplers, a collection of paper to choose from, markers, etc.).
Share it! As soon as students are able, invite them to take notes during your conferences. Kids can take their own conference records in small notebooks (much like Sharon Taberski’s assessment notebooks) or on sticky notes or index cards. If having a copy of the student’s notes would be helpful to, carry carbon paper on your clipboard to give to students (between 2 pieces of paper, of course) so that you both gain a record of the child’s thoughts. The notes a student writer makes can serve as a compass to guide his/her efforts when the conference is over (and the writer returns to his/her independent writing).

There are a million ways to record your conference notes…

One-Pager Grid Box

- All students’ note are recorded on one page
- This tool is included on the following pages as it is how I most often record my conference notes.

“Record and Post” Tools

- Address Labels
- Sticky Notes

Electronic Tools

- Confer – an iPad and iPhone app created by a teacher ($14.99); Confer Lite (the free but less resourced version of the above)
- iPad: Embed a record template on your iPad. Carry it around room as you would a clipboard to record your conference notes.

Index Cards

- Pocket-style (shown above; resource from Levenger’s)
- Flip-style
TAKING NOTE:  What I Record in My Conference Record Notes

- Evidence of a reader’s/writer’s use of our focus strategy.

- Key words which describe the child’s successful literacy behaviors of this focus strategy and possibly 1-2 additional “in place” skills including previously studied strategies, word work/problem solving, applying vocabulary learning, etc.
  - I make note of student’s strengths by recording them in blue ink or highlighting them in blue. This way patterns of performance stand out to me for each child and for my class.

- Key words which describe his/her attempts, approximations, or struggles to apply our focus strategy and/or construct meaning including difficulty problem solving new words, using a previously studied and successful comprehension strategy, etc.
  - I make note of student’s struggles by recording them in red ink or highlighting them in pink. Again, this helps me identify my student’s/s’ patterns of performance.

- Usually in my own short hand such as “S.C.” for “self-correct” and “R” for reading.
## Meaningful verbs (and a few nouns) for writing formative anecdotal records

### Oral and Affective Reading Dispositions
- **Fluently**
- **Word-by-word**
- **Hesitantly**

Selection is/seems to be too hard  
Can sustain independent reading/SSR for duration of workshop/scheduled time

### Problem Solving New Words/Decoding Strategies
- Utilizes picture clues  
- Draws upon contextual clues  
- Employs phonics  
  - Uses only 1st sound  
  - Combines 1st sound with word chunks  
- ________________  
- ________________

Looks for little words in big ones  
Uses word shape/length  
Self-corrects miscues with no prompting  
Skips unknown and keeps reading  
Skips unknown, reads to the end, goes back (backtracks and reads again)  
Recognizes high frequency words/focus vocab.  
With prompt, student utilizes word solving

### Thinking Dispositions
- ANY TEXT
  - Understands text  
  - Close reading of text questions reflect understanding  
  - Voiced purpose for reading text  
  - Monitoring understanding by  
  - Using self-talk to create understanding  
  - Generating “I wonder...” questions/Curious about text information  
  - Predicting from early text information  
  - Questions and predictions make sense/logical to text focus  
  - Inferring implicit text information  
  - Identifying important ideas  
  - Summarizes text or what he/she has read thus far

- NONFICTION
  - Identifies important ideas  
  - Names/Identifies details  
  - Understanding of text structure demonstrated by

- FICTION
  - Names/Understands main character(s)  
  - Identifies problem  
  - Understands setting

Laura Benson ~ LBopenbook@aol.com ~ lbenson@iss.edu
Examples of Conference Record Notes

The following conference record notes are from my demonstration lessons in a first grade and fourth class at United World Coll South East Asia/Singapore, with first and third grade students at the American School of the Hague, and with Kindergarten thro seventh grade students at Canadian Academy in Kobe, Japan. To help you make sense of my notes, let me give you a lens as yc study these examples:

- **Determine a format or vehicle which works best for you.** While you will see that I often use a one page, grid box conference record tool, I included other examples earlier in this resource to paint a portrait of possibilities in recording the insights you gain as you meet with your students one-on-one. These notes are for you. For that reason, explore a variety note taking format and, then, pick the one which will be easy for you to use everyday so that your notes can richly inform your teaching work.

- **Develop Your Own Conference Record Short Hand:** On my clipboard, all of these notes actually fit on one page. I accomplish this by developing my own short hard or codes to take notes during or just after I meet with students in conferences. I also have my clipboard close by as I meet with students in whole group or small group gatherings so that I add insights about a child. I typed up my conference record notes for you rather than giving you a copy of my own handwritten notes so that they make sense to you. But, again, my own notes would not be this wordy because they would have to be. As a classroom teacher, my conference notes are for me and, thus, I jot down comments which will help me k my students as individuals/human beings and academic learners best while keeping my work very efficient, too.

  - **Examples of my short hand or codes I use in taking conference notes quickly:**
    - W for the word “writing” and R for the word “reading”
    - b for “book/s” and tx for text
    - TC for Talking Circle
    - Meta for the word “metacognition”
    - REV when I witness a student revising independent or rev when I nudge revision in a conference
    - PE when students are writing from their own personal experience; bk for background knowledge or schema
    - Rather than writing out “What advice would you give to your kindergarten buddy about fiction writing?” with these words, I simply write Adv =” to remember what I asked a student and to make sense of the response I get from each child.
    - Using a two headed colored pencil, I record student’s strengths in blue and his/her needs or goals in red
BE GENTLE and GIVE YOURSELF TIME TO GROW

While I want to draw attention to the quality (i.e. Building connected and trusting relationships are the engine of my own one-on-one conferences with students,) and quantity of my notes, I want to advocate for you and encourage you to develop conference rituals and rotations which feel worthy and plausible to you. In other words, please, please do not let my notes discourage you – I really want them to encourage you to engage in conference with your own students regularly and honor your own ways of developing these. When I first started teaching, my goal was to meet with each of my students at least once every 2-3 weeks. Over the years, as my conference expertise has grown, I grew into being able to see students more often. Now, having taught for over 32 years, when teaching a class of 27 – 32 students, I can and do meet with every student 4 – 7 times in a week. BUT, remember, I developed this ability over time and worked hard at becoming an effective conference partner for and with students by watching learned colleagues, reading professional texts, observing mentors on videos/DVD’s, and studying my conferences via my notes, audio tapes, and videotaping myself periodically. Conferences are dynamic and require art and heart as well skill and study from us.
**Unit of Study/Focus:** Fiction Writing  
Helen’s 4th Grader Writers ~ United World College South East Asia, Singapore

**Date:** November 17-20

<tr>
<td>The Outback – she begins by writing, does not need planning tool or supports right now; “Ideas are spill out” – excellent flow and energy to her writing “I use a notebook for ideas that flow in my head...sometimes I (also) include doodles...”</td>
<td>Harry Potter inspiration in developing this scary story - boy lands on Mars; has a well-developed story in his head full of details and is able to transfer his thinking to paper with maturity and focus; “I did better than I thought I would (at writing fiction/as a fiction writer)” self-evaluation; Encourage him to name his growth, effectiveness as writer, and set his own goal(s); Seems very confident and able to be absorbed/engaged as independent writer</td>
<td>Very passionate and focused on objects and place of story, she said – “Since I was young, I have been interested in fairies and castles...” “This is a twin story...about best friends...”</td>
<td>Draws inspiration and ideas the books he reads – “You can get a lot of ideas from books”; Developing a series Adventures of Handee Patoo (sp.?) W advice would you give a kindergarten (or a peer)? &quot;It’s your imagination which important... daydreaming is important... I offered many sophisticated insights at the value and power of daydreaming to inform and chisel a writer’s thinking.)...Think about the end...Watching the scene he writes it or thinks about it – he’s visualizing which is evidence of a deep understanding of how to craft and ponder possibilities!; MENTOR: He could/should teach upcoming writing lessons – modeling his thinking would be very helpful to his classmates; Able to metacognitive as he reflects on his writing (both his process and his products), see very confident and comfortable addin voice to our talking circles and in conferences; Partnering w/ Darrin &amp;...</td>
</tr>
</tbody>

<td>Super Dog! Retelling story when I asked him what he is saying inside his head – can summarize on the piece/product; Model and practice self-reflections and evaluations with him to grow his metacognition; Appropriately (to his development and age) focused on the action of the story; Seems to be drawn to developing not only action but humor, too. Growing understanding about character, support him in helping him develop his character(s) with a bit more detail and (over time) more awareness and articulation of internal attributes of his characters</td>
<td>Thinking about her process and product effectively - self talk/ internal dialogue seems to help her think through her writing and explore thoughtful choices, too; Focused on “how everything changes - boy taking quiz/quizzes; character = girl; dogs</td>
<td>The Ominous Mind (Not sure I have it spelled correctly – it sounds like such a cool title!); Character = Jim; Get ideas by writing (Too much planning or forcing his to plan his writing first may tank his energy for writing - monitor and support him on this)</td>
<td>Drawing ideas from the book reads; likes to “take the author’s ideas twist it a bit” Mentor: Ask her soon to model her thinking process – especially in identi and developing her character(s), gettin inspiration from favorite authors/text staying positive and energized when w may be/is hard for you</td>

<table>
<thead>
<tr>
<th>Name</th>
<th>Notes</th>
</tr>
</thead>
</table>
| Ian    | “...Technology (helps me write)... especially longer pieces...and when I have lots of thoughts/ideas)...I can write more (when I can use technology as a writer)...”  
Nurtured his descriptions, monitor and offer more instruction to help his fertile ideas "live on the paper" |
| Ohruv  | Sounds like a really fun and creative story = millionaire and dollar duck is buried; working on crafting in suspense and intrigue I think  
Seems to have many ideas and details “ready to go”                                                                 |
| Anoma  | Daydreaming insights – very mature and effective in helping her generate ideas and stay playful in exploring possibilities for her writing; paying attention to how other authors describe characters in their stories;  
Draws ideas “dreams and nightmares”  
Advice to a younger student = “Put pencil on paper...I just get ideas (by writing);  
Working on using humor; Character = dog                                                                 |
| Lea    | “One idea (is enough)...to tunne thinking” (focus is what I think she is for here – lovely way of describing her thinking – just did not get all of her written down); Encourage her to men classmates in modeling and in peer conferences, too, as I think she would compassionate listener and offer constructive feedback to fellow writer; |
| "S_"  | “I didn’t know I was capable of writing so much....of writing such a (good) story!”                                                                 |
| *S    | (My writing ideas...imagination...)goes inside my body....)                                                                 |
| *S_    | Writing about a monster, people (main characters) are trying to figure out if the monsters is real; encourage him to name and further develop the main character - may be focusing on the action or shock of his story more than character right now |
| Leah   | Talked with her about using cut and paste revision strategies when she needs/wants to change a part of her writing; her revision will most likely it adding right now |
| Arshya | The Monkey in the Market – incredibly detailed and seems to a very well developed story line; Passion for fiction as reader and writer; trying to use plot in her story(ies) – reads like a library book!  
Inspired by Monkey in the Mountain/her reading and showed me her mentor text, too; Student as Teacher/Mentor - her energy and enthusiasm in addition to her keen insights about fiction texts would be powerful modeling for her classmates and for younger students, too. Gave me a little book she created as I left – what a dear heart! Well-developed stories (seems like a pattern of performance for A) |
| Nicole | Worried about her story being boring – may be putting a bit too much pressure on herself that her writing has to/should match her reading - but also her awareness seems to be evidence of mature awareness of fiction elements;  
She has lots of ideas; working with great flow - getting her thoughts down, engaged, focused, and able to reflect on her process |
| *S_    | Values daydreaming as a way to generate ideas for writing                                                                 |
| Joshua| Using his background knowledge to inform and shape his writing – football, fighting with his brothers – creating realistic fiction; seems to be visualizing, too;  
writes with vivid descriptions and really earnest and focused on descriptive writing - again evidence of visualizing, connecting /using his bk, and I think a solid sense of/regard for audience! |
| *S    | Writing about animals – loves to write stories with animals as main characters                                                                 |
| Noma  | “...an author describes...” when asking her about what authors do and think about                                                                                                                                 |
| James | Fishy Crunch (name) One big dog adventure; planning to share with 2nd grade;  
“Write about your dreams” – advice to Jackson to write a story about his dreams |
| Avnar  | Wants to join James & Logan with Big Dog story;  
“Write about your dreams” – advice to Logan to write a story about his dreams |
| Sean   | “I wrote more than I often do/thought I could…” |
| Logan  | Fiction stories – “make up, g more memories, carry on writing as l as you can…’ |
“You can connect 3 stories…”

**Nik:** “Sister is the main character; make a magic mushroom; (char.) feels kind of weird”; Writing parts on a page/paginating well it seems; “You can use your own stuff up… use (your own) memories…”

Reading his writing; Character – dog; Making up my own movie

**Toby:** “My favorite parts” – seems to reflect thoughtful evaluation of his writing and considering or beginning to consider alternatives and options; “It’s not about me…I am not sure about the character (yet)...”; Needs think time to formulate and draft his ideas

**Rhiannon:** _Once_ – using story language
Saving space for drawing/illustrations
Using a few words

**Chase:** “not sure” (about character yet) needed some think time to ponder/her character
Character =” K.J. He’s going to do a exciting things”

**Big Dog Adventure**
# Kim's First Grade Class

**Unit of Inquiry/Student Learning Focus:** Monitoring/Checking Understanding with Stop Sign Reading/stopping to think and self-talk “I know...”; Retelling

**PD Focus:** Managing balanced literacy instruction; small groups; differentiated instruction; running records and using data to make teaching decisions; high interest in Developmental Continua

**Teaching Partner Jan B. ~ KINDERGARTEN STUDENTS ~ Date: Sept. 23, 27, & 28, 2010 with Pre-K, K, & 1st Grade Teams**

<table>
<thead>
<tr>
<th>Dohyn:</th>
<th>Riley:</th>
<th>Anu:</th>
<th>Kensel:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reading on computer – car racing – From Prompt “What do you know...? What are you thinking?” He said - “Maybe I could make one, too.”</td>
<td>I can read books that are hard for grown-ups ; Using “I know...” statements and working to understand; extraordinarily articulate and advanced in her ability to not only read but in making connections, identifying important ideas, and inferring; Sweetie and gentle with her peers; “I know sea lions can walk on their back legs…”</td>
<td>Keep nudging cross checking of cueing systems – including modeling how when using them to problem solve new words and to trigger strong metacognition</td>
<td></td>
</tr>
<tr>
<td>Working to understand what he read by using his background knowledge/making connections from his own experiences and what he knows about the world; questioning; and predicting – at a very mature level!</td>
<td>Gaining new knowledge from her reading; able to revise earlier thinking when presented with more information; Very confident and self-assured – in a lovely Kindergarten way! Really into Table of Contents to guide her nonfiction reading, at least of Life Size Zoo, but seems to be something she has been doing for a while</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Dohyn &amp; Riley are excellent book partners for one another; rare give and take between them</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Matthew:</strong> Opening up more and more; Seems to be drawn to nonfiction and humor texts; “She has stripes...She looks funny” (points to text when responding; seems to return to text to strengthen understanding, especially when prompted); “Shark opens his jaws...”</td>
<td><strong>Yuchong:</strong> Seems to be using own experiences and background knowledge to understand what is read to him and what he can read from text (pictures; need to follow up on his capacity to read + understand text words)</td>
<td><strong>Miho:</strong> B-day Tues.; very sweet &amp; friendly &amp; open, esp. 1-1 Understands concepts of grow-doesn’t grow; seems to be using her background knowledge well in naming pictures</td>
<td><strong>Ayane:</strong> Reading and naming text pictures/deriving meaning from graphics Figured out “swings” “Think in your mind” (to figure new words; to understand text)</td>
</tr>
<tr>
<td><strong>Hana:</strong> Friendly &amp; affectionate Wait time is important in gaining her responses</td>
<td><strong>Zoe:</strong> Very comfortable sharing her thinking in whole group; seems self-assured and enthusiastic; Using text words in developing her responses – good blend of author’s words and her own; “Vanish” – another way to say gone!; Predicted blocks would be in Toy book</td>
<td><strong>NaHyun:</strong></td>
<td><strong>AhBay:</strong> RR: high percentage known words (over 95-957%); great book matching; pointing to text while he reads; pat/pater/Some repetitions; predicting; especially with prompt insertions – put “to” in through book; encouraged “Let’s try that again”</td>
</tr>
</tbody>
</table>
not attending to print???

Wait time seems important

Laura Benson	
  LBopenbook@aol.com	
  lbenson@iss.edu

Using text words for “I know…” concepts; “…sliding down…” using background knowledge to understand and/or connect with text concepts (text concepts pretty straightforward); Seems to be strong at predicting “what next” and connections from his background knowledge to text information/concepts; Thinking beyond text – “…can’t throw train in (toy) box…” RR: self-correct (self-initiated); Interesting: He talked about the boy in the Playing Outside even though there is a girl with the boy in all the pictures. “He was going in the tunnel…Next, he’s going to play with the swings…” – using his memory of rereading this familiar text.

ALLYSA:
Using visual cues and grapho-phonetic cues to problem solve new words.
Understands concept of grow-doesn’t grow
“wave of sand”

DYLAN:
“We know (there is a/this is about) a box…”
“We know he cleaned up all by himself” – thinking beyond text and inferring; using his own words such as playground
Maybe try sticky note flag to note when he understands and when he is confused

ANDREW:
Loves to participate in whole group; need to follow up with him in conference to better understand - some of his responses – some seem way off but he may have a clear reason or connection which he just can’t yet clearly articulate
“Crocodiles have blue feet…”. Seems confident and enthusiastic about learning; Writing Ayane’s name at writing center

RICKY:
Seems to be making unique connections at a high/mature level, especially when engaged in a collaborative learning experience or read aloud; Becoming more comfort-table to share his thinking
Baby – monitor his und. work/self-talk

KARINA:

Small Group Options:
Abhay, Ayane, Dylan, Zoe, Miho: L1 Have 1-1; Und. Left to right; Gaining & work on basic sight words; Need problem solving strategies
Riley & Dohyun: Level 15/16; retelling need to work on depth & pers. Connection: have studied nonfiction (TOC; don’t have to read every page; index)
Next Steps of Student Learning About why and How to Monitor/Check Understanding

First and foremost, keep doing what you have been doing because it is obviously helping your students make HUGE strides in their literacy development. I was so impressed as I read with your students! In honor of your brilliant efforts and hoping to be a collaborator, a few potential follow up lesson ideas follow.

In addition to the ideas offered on the following pages, please also refer to the many handout resources for more ideas and implementation support:

 pena icon “Stopbookmarks” can be run as address labels and, then, placed on sticky notes to encourage students to practice self talk which know will help support their understanding.

 pena icon “Self-Talk Bookmarks” reflect the thinking strategies we studied. I give these to students to help them remember to use the thin strategy(ies) we are studying as they read independently. Additionally, sending these bookmarks home helps parents know the focus of our reading instruction and provides parents with models of the kind of thinking talk they can use when reading with their child. You can easily change the font of any of these bookmarks. Another way to make using these supports inviting to students is to embed their photographs into a bookmark or two.

 pena icon “Instructional Strategies” provides additional information about metacognition, the bedrock of monitoring understanding. Check out pages 18 – 20. I also utilize the strategy outlined on page 36, Read Draw Talk Write, with young students during Read Alouds as an Interactive Reading strategy (Students draw their thinking as I read to them. Mature primary grade students can use this strategy as they read text.).

*PLEASE NOTE: The above and following pages are included here to give you an idea of the follow up support and feedback I work to give each team/group of teachers.
Practice Texts (for modeling, shared reading, interactive reading, guided reading/small groups, and independent reading practice):

- Wordless picture books
- Student authored texts
- Pattern books
- Memoir texts (such as texts by Cynthia Rylant, Mem Fox, Tomie dePaola, Donald Crews, Ezra Jack Keats, author web sites, etc.)
- School-based texts
- Texts which reflect students’ passions and “outside of school” lives
  - Family based stories/texts
  - Passions texts such as sports, animals, pets, scouting, music, geography or travel, coin or stamp collections, etc.
  - Cultural and heritage texts
  - Holidays and celebration texts
- Nonfiction texts (Kindergarten teacher Gail Saunders Smith writes excellent texts for young readers)
- Books in a series
- Books by the same author
- Rhymes
- Riddles
- Movies and video clips
- Rereading familiar texts

Use Props to Illustrate and Describe the Thinking Proficient Readers Use to Understand What They Read:

Stop Sign: Proficient readers stop to think. They talk to themselves to understand…

Does that sound right? Does that look right?
**Emergent Readers**

*Edifying lessons for students reading A–B texts (Fountas & Pinnell’s leveling system) or 1–4 leveled texts (Reading Recovery leveling system)*

<table>
<thead>
<tr>
<th>STRATEGY</th>
<th>TEACHER TALK TO FACILITATE STUDENT’S USE OF STRATEGY</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Tracking print across two pages</strong></td>
<td>Where do you go after that?</td>
</tr>
<tr>
<td></td>
<td>Which page do you read first?</td>
</tr>
<tr>
<td><strong>One-to-one matching</strong></td>
<td>Point and read.</td>
</tr>
<tr>
<td>Readers at emergent level use one-to-one matching to help control visual attention to print.</td>
<td>Did it match?</td>
</tr>
<tr>
<td></td>
<td>I’m reading each word when I point to it.</td>
</tr>
<tr>
<td></td>
<td>Read each word with your finger.</td>
</tr>
<tr>
<td></td>
<td>Did it match?</td>
</tr>
<tr>
<td></td>
<td>Did you run out of words?</td>
</tr>
<tr>
<td><strong>Using pictures to get the meaning</strong></td>
<td>I’m looking at the picture to help me figure out that tricky word.</td>
</tr>
<tr>
<td></td>
<td>How did the picture help me figure out the tricky word?</td>
</tr>
<tr>
<td></td>
<td>Did your reading make sense? Did you check with the picture?</td>
</tr>
<tr>
<td><strong>Using known words</strong></td>
<td>Reread the sentence up to the mistake and start the first sound of the word. Have the child predict what would make sense.</td>
</tr>
<tr>
<td></td>
<td>Would _____ make sense?</td>
</tr>
<tr>
<td></td>
<td>Would _____ fit there?</td>
</tr>
<tr>
<td></td>
<td>Do you think it looks like _____?</td>
</tr>
</tbody>
</table>

I would also draw lessons from *Words Their Way* for Emergent Readers, especially the concept sorts. 😊
### Developing Readers

*Edifying lessons for students reading C-D texts (Fountas & Pinnell’s leveling system) or 5-6 leveled texts (Reading Recovery leveling system)*

Please note that some schools associate C reading texts with Emergent Readers.

<table>
<thead>
<tr>
<th>STRATEGY</th>
<th>TEACHER TALK TO FACILITATE STUDENT’S USE OF STRATEGY</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Attending to meaning cues</strong></td>
<td>Are you thinking about what’s happening in the story while you’re reading?</td>
</tr>
<tr>
<td>Reading is supported to make sense. This is the semantic cue system.</td>
<td>You said ___. Does that make sense?</td>
</tr>
<tr>
<td></td>
<td>Where can you look?</td>
</tr>
<tr>
<td><strong>Attending to structure cues</strong></td>
<td>You said ___. Does that sound right?</td>
</tr>
<tr>
<td>Structure is the knowledge of how language works. This is the syntactic cue system.</td>
<td>Do we say it that way?</td>
</tr>
<tr>
<td><strong>Attending to graphophonic cues</strong></td>
<td>What would you expect to see at the beginning? At the end?</td>
</tr>
<tr>
<td>This is the understanding and using the sound/symbol relationship of language.</td>
<td>Do we say it that way?</td>
</tr>
<tr>
<td><strong>Self-correcting</strong></td>
<td>I like the way you fixed that.</td>
</tr>
<tr>
<td>Self-correcting is the process of going back and accurately rereading text when it is not making sense. Self-correction does not take place unless there is an error.</td>
<td>Something doesn’t make sense. Try that again.</td>
</tr>
<tr>
<td></td>
<td>You made a mistake on that page. Can you find it?</td>
</tr>
<tr>
<td></td>
<td>You’re nearly right. Look for words you know. Try it again.</td>
</tr>
<tr>
<td><strong>Cross-checking</strong></td>
<td>It could be ___ but look at ___. (For example, it could be Cyclops but is the “m”.)</td>
</tr>
<tr>
<td>Cross-checking is checking one cue system against another.</td>
<td>Check it! See if what you read looks right (or looks right and makes sense).</td>
</tr>
<tr>
<td></td>
<td>Could it be _____? (Teacher inserts two possible words that need to be</td>
</tr>
</tbody>
</table>
**Searching**
Searching is integrating all cue systems.

- There is something wrong. Can you find it?
- What's wrong?
- How did you know? Is there any other way we could know?
- Where else can you look?

**Self-Monitoring**
Self-monitoring is the student’s ability to monitor his/her own reading by rereading.

- Why did you stop? (*when student hesitates)
- What did you notice?
- I like the way you did that, but can you find the hard part?
- Are you right (after correct or incorrect words)? How did you know?
- Try that again.

**Noticing when something isn’t right**

- Cover the child’s error: What do you expect to see at the beginning (insert correct word)?
- Show word: Does it look right and make sense?
- Why did you stop?
- What did you notice?
- Were you right?

**Stopping at a New Word**
This strategy allows the student to problem solve.

- What could you try?
- Do you know a word that starts like that?
- Is there a part of the word that can help you?
- What are you going to do?
| Fluency and Phrasing | Go back and reread, think about the story and start to say the word.
Model fluent reading and have the child repeat. You may need model the same sentences several times:
See how your voice sounds just like a teacher’s voice when read like that.
Model reading a sentence disfluently then rereading to improve fluency:
See how I had to reread that sentence because it didn’t make sense to me the way I read it at first.
Can you read this quickly?
Put them all together so that is sounds like talking.
Read the punctuation.
Model fluent phrasing compared to how child read it:
Try to make your voice sound just like mine.
|
| --- | --- |
| Rereading | Model rereading thinking of a word that would make sense.
Model rereading a sentence putting in a blank for the tricky word.
Encourage the child to reread the sentence putting in the beginning sound of the tricky word and reading to the end of the sentence.
|
| Figuring out new/unknown words | Wait at least 5 seconds to give reader a chance to figure out unknown word.
Model reading sentence putting in a blank for the tricky word:
word would make sense?
Do you think it looks like ______?
Could it be ______ or ______? Run your finger under the word and check.
|

Laura Benson ~ LBopenbook@aol.com ~ lbenson@iss.edu
Get your mouth ready. or Start the word.
Model rereading a sentence after you have stopped to figure out unknown word.

I would draw lessons from **Words Their Way**. Students would be ready to begin the letter-sound sorts and the word sorts (according to the provided continuum this text offers).

### MASKING QUESTIONS

**Drawn from Bobbi Fisher’s Joyful Learning**

**Who would like to mask/Who can mask…?**

<table>
<thead>
<tr>
<th>a letter you know</th>
<th>a word with the blend ___</th>

| a word that begins with ___ | |
| a word that ends with ___ | |
When meeting with the whole class or small groups in **read alouds**, **interactive readings**, and/or **shared readings**, here are some metacognition prompts and discussion **nudges**:

### SELF TALK STEMSS

- I know…
- I think/I am thinking…
- This was about…
- I understand this part…
- I know that I know…
- I do not understand this part… (Or, I don’t really get this part…So, I will…to understand this part…)
- This is a happy face part for me (a part I understand). I really get it! This means…
- This is a frowning face part for me (a part I don’t understand). Can you help me understand this part?
- Here’s what we/I know/understand from reading this text (or this part of the text)…
- I wonder what this means…
- I really don’t understand this part…
- I really like/dislike this idea because…
- This character reminds me of somebody I know because…
- This character reminds me of myself because…
- This character is like (name of character) in (title of book) because…
- I like/dislike (name of character) because…
- I wonder why…
- I wonder how…
- I did/did not like the ending because…
- If I were the main character, I would have ______.
- A question I would like to ask is/I am wondering about is ________________.
- I would/would not recommend this book to someone else because ________________.

### QUESTIONS TO STIR BOOK CLUB/READ ALOUD/SHARED READING DISCUSSIONS

- Tell me about what you understand here.
- I would love to hear your thinking about this part!
- Can you retell me about this book?
- I haven’t read this book yet. That makes you the expert of this book!. Tell me about it please.
- How would you describe (name of character)?
What do you think made (name of character) behave that way?

The character I most admire is ______ because . . .

How would you describe (name of character) at the beginning of the book? At the end of the book?

What do you wish had happened?

What did you feel as you read this text?

What did you learn from this text?

What was the most important thing you learned about ___?

What was the most interesting thing you learned about (the topic)?

What else would you like to know about (topic)?

(After reading a part of a text) Can you make any predictions on what may happen next? Why do you think these things will happen? What details in the text (that you’ve already read) would support your predictions?

What surprised you?

What did you like best about this book?

(When children make comments about books, make sure you follow up their comments by asking questions like,) “What made you think of that? What clues did the author give to make you think that?”

### Additional Nudges from Fountas and Pinnell:

**As you read/I read this text to you, think about . . .**

- What you find interesting or surprising
- How the author makes you feel
- What you like/dislike about the writing
- What the book makes you think/think about
- Your reaction to the characters
- How the book reminds you of your life
- How the book reminds you of other books

- How the book is similar to or different from other books by this author or other books in this genre
- What you don’t understand, find confusing, or have questions about
- What you notice about the illustrations
- What you want to remember about the book
- What you learned
Story Telling Guidelines

*Adapted from Morrow, 1996; Morrow & Gambrel, 2004

1. **Ask the child to retell the story.**
   - “A little while ago, I read the story (name of story). Would you tell the story as if you were telling it to a friend who has never heard it before?”

2. **Use the following prompt only if needed.**
   - If the child has difficulty beginning the retelling, suggest beginning with “Once upon a time...” or “Once there was...”
   - If the child stops retelling before the end of the story, encourage continuation by asking “What comes next?” or “Then what happened?”
   - If the child stops retelling and cannot continue with general prompts, ask a question that is relevant at the point in the story at which the child has paused. For example, “What was Agung's problem in the story?”

3. **When a child is unable to retell the story, or if the retelling lacks sequence and detail, prompt the retelling step by step.** For example:
   - “Once upon a time...” or “Once there was...”
   - “Who was the story about?”
   - “When did the story happen?” (Day or night? Summer or winter?)
   - “What was the main character’s problem in the story?”
   - “How did he or she try to solve the problem? What did he or she do first?...second?...next?”
   - “How was the problem solved?”
   - “How did the story end?”

Fostering a LOVE of Reading

Benson (2010), Adapted from Landrigan & Mulligan, www.choiceliteracy.com and Boushey and Moser’s The Daily Five

There is more than one way to read a book!

- **Just Right Reading**: Student reads books at his/her independent level (95-100% word accuracy with 93-95% comprehension). In school, we engage students in daily “just right reading” because it provides such vital, strengthening practice.

- **Book Looking/Reading the Pictures**: Student reads books which are interesting to him/her. Reading may be looking at or reading the pictures and this type of reading often reflects reading books/texts which are more mature than the child’s current independent reading level.

- **Read Aloud**: Student listens to a book which is often a book he/she could not read on his/her own. This type of reading puts books language into the child’s ears and grows his/her knowledge of literacy and the world. For learners of all ages, read alouds are a powerful and lovely way to marinate students in content area concepts and academic vocabulary.

- **Buddy Reading**: Student reads a book with a peer or adult most often sharing the actual reading of the text.

- **Books on Tape**: Student listens to a text on tape and often follows along with his/her own copy of the text. Audio books provide valuable experiences for students new or young in their development of English and are such a joy for all of us. My husband Dave and I always have books on tape in our car and on our iPods 😊.

- **3 Ways to Read a Book**: Boushey & Moser’s framework reflects a supportive way we can encourage young children to pursue books on their own and grow their independent reading practice.
  - Read the pictures.
  - Read the words.
  - Retell the story/text.
Early Childhood Professional Bibliography

*Please also see the bibliographies I put on my BLOG for you all. 😊

Boushey & Moser. The Daily Five. [The “Two Sisters” often share their wisdom via www.choiceliteracy.com, too.]

Clay, Marie. [All titles – the “grandmamma” of so many of our best practice rituals!]

Diller, Debbie. Spaces and Places. [See all her other titles, too!]

Eggleton, Jill and Windsor, Jo. Linking the Language Strands. Portsmouth, NH: Heinemann. [*Suzanne has a copy of this excellent text.]

Giacobbe, Maryellen and Horn, Martha. Talking, Drawing, Writing. [One of my very favorites!]

Harwayne, Shelley. (2008). Look Who’s Reading: 50 Fun Ways to Instill a Love of Reading in Young Children. New York, NY: Scholastic. [*This is superb text to share with your parents and provides a wealth of lesson ideas, too!]

Mooney, Margaret. *To, With, and By.* [One of the greatest thinkers we have been blessed to learn from!]

Sibberson, Franki & Szymusiak, Karen. (2008), *Day-to-Day Assessment in the Reading Workshop*

**Unit of Inquiry/Student Learning Focus: Connecting & Questioning** – “This reminds me of...” & “I wonder...” and “I would connect____ & ____ because...” and (beginning to focus on in small groups) “Somebody wanted but so...” (fiction connections/making connections to key ideas in fiction); Migration & Movement

*PD Focus: Management of balanced literacy instruction; small group learning and teaching; differentiation*

Next Steps of Student Learning About why and How to Monitor/Check Understanding

To extend and deepen these students’ studies and implementations of *connecting* and *questioning*, here are a few potential lesson ideas to take these growing readers forward.

**SELF TALK**

Extend students’ self-talk to trigger and “habitize” connecting and questioning.

<table>
<thead>
<tr>
<th>Connecting</th>
<th>Questioning</th>
</tr>
</thead>
<tbody>
<tr>
<td>This reminds me of… and This reminds me of…because…</td>
<td>I wonder…</td>
</tr>
<tr>
<td>I am connecting _____ to _____ because…</td>
<td>Why did they…?</td>
</tr>
<tr>
<td>This is like because…not like because…</td>
<td>I am curious about…</td>
</tr>
<tr>
<td></td>
<td>What…?</td>
</tr>
<tr>
<td></td>
<td>How…?</td>
</tr>
<tr>
<td></td>
<td>Where…?</td>
</tr>
<tr>
<td></td>
<td>When…?</td>
</tr>
<tr>
<td></td>
<td>Who…?</td>
</tr>
<tr>
<td></td>
<td>Why?</td>
</tr>
</tbody>
</table>

Use the above (as well as the examples on the next few pages) during *read alouds, interactive readings, shared readings, and guided readings/small group collaboratives* and as nudges when meeting with students in *one-on-one conferences*. After you model and collaboratively practice using a self-talk stem or question several times when discussing a shared reading or a read aloud, for example, you may want to use this question or stem to prompt a student or students to write about their thinking.
O.W.L. Strategy

Since we were working to help students be multi-strategic in *making connections* AND *questioning*, it might be edifying to teach them to use the OWL strategy next 😊.

**O.W.L.**

- What do you *observe* or notice?
- What do you *wonder*?
- *Link* it to your life.

**Twenty Questions that Teach Students to Think**

1. Why?
2. If that is so, what follows?
3. How do you know that?
4. What is your point?
5. What is your reason for saying that?
6. Is it possible that…?
7. Are there other ways of…?
8. What are other ways we could view this?
9. Can you briefly summarize what you just read?
10. What/Who was important and why?
11. Can you explain you answer?
12. Can you state examples and explain why they are important?
13. Do you agree? Why or why not?
14. How did you arrive at your answer or solution?
15. What are your "thinking" steps?
16. What facts support your view?
17. Can you think of other facts not given? State these.
18. Can you apply these ideas to other situations or information? Explain.
19. Can you add information to the subject? Explain the information.
20. Contrast the information with what you already know.

Laura Benson ~ LBopenbook@aol.com ~ lbenson@iss.edu
2nd and 3rd Grade Teams, there are numerous additional resources for you in the handouts we provided before and during my site visit. Please see the following to support your lesson planning and implementations:

- **“Stopbookmarks”** can be run as address labels and, then, placed on sticky notes to encourage students to practice talk which you know will help support their understanding.

- **“Self-Talk Bookmarks”** reflect the thinking strategies we studied. I give these to students to help them remember to use the thinking strategy(ies) we are studying as they read independently. I often embed a photograph of each child a relevant bookmark to nudge students to self-talk as they read on their own. Also, after utilizing these tools, kids kick out of creating their own bookmarks. Additionally, sending these bookmarks home helps parents know the focus of our reading instruction and provides parents with models of the kind of thinking talk they can use when reading with their child.

- The Connect 2 strategy we began to explore during my site visit is included on page 82 of *Instructional Strategies*. This resource also includes numerous lesson ideas in extending your study of connecting and questioning such as the Frayer Model (pages 79 – 82) and Strikes and Wonders (page 65).

- In cultivating students’ questioning and wonder, check out the following also in *Instructional Strategies*:
  - Compass Questions on page 51
  - Reciprocal Teaching on pages 61 – 62 (which can be an excellent structure for students as they engage in student-led book clubs and small group collaborations)
  - Strike and Wonders on page 63
  - Anticipation Guides on pages 42 - 46

- Support students’ capacity to make connections by creating vocabulary taxonomies with them, especially in support your current Unit of Inquiry. You can find information about and examples of taxonomies of pages 37 – 39 of *Instructional Strategies* and page 28 of “Putting All the Pieces Together.”

- **“Nurturing Deeper Thinking”**
Practice Texts which help to trigger or highlight connections and/or which help to invite students’ wondering (for modeling, shared reading, interactive reading, guided reading/small groups, and independent reading practice):

- Wordless picture books
- Student authored texts
- Pattern books
- Nonfiction texts
  - Most, if not all, nonfiction texts grew from authors’ questions. Thus, they make powerful laboratories to elicit students’ questions andinv their wondering.
- Memoir texts
  - Authors who write about their lives often make it easy for students to generate their own connections.
- Texts which reflect students’ school-based experiences and studies
  - Unit of Inquiry texts are essential in deepening students’ connections and questioning and helping them see how flexible and necessary thinking strategies are in developing understanding not just as readers but as learners, too.
  - As a team, create a text set for each of your PYP Units of Inquiry (Remember all the free or inexpensive texts available to us such as broch newspaper articles, songs, poems, web site information, etc.)
- Texts which reflect students’ passions and “outside of school” lives
- Books in a series
  - By reading books in a series, students’ can and should make connections. The predictability of the same character and familiar writingare especially supportive to growing connectors and also help students develop deeper questions (although they often need us to model nudging deeper questions such as “How is the character different at the end of the story/biography than he/she was at the beginning of the book/text?” and “Why…?” type questions).
- Books by the same author
- Text sets [Books/Texts about the same topic]
- Multi-genre authors and series (such as Mary Pope Osborne’s Magic Tree House series which comes with corresponding nonfiction texts authoredher husband)
- Science “texts”
  - Scientists begin and energize their work with questions. They look for patterns/connections. Thus, immersing students in science texts science learning provide illuminating ways to strengthen students’ dispositions to connect and wonder/question.
- Math “texts”
  - Word Problems
  - Patterning tasks or experiences

*For additional practice text ideas, please see the provided bibliographies in our handout resources such as pages 67 – 76 in “Instructional Strategie
### Unit of Inquiry/Student Learning Focus:
**Inferring** with “I bet...” and Identifying Important Ideas (III) with “I learned...” and fiction framework for key ideas - “Somebody want but so...” and continuing Jeff’s lessons about attending to what person or character say, act, do; PYP Unit – Attitudes; PYP Unit - Electricity

### PD Focus:
Differentiation; nonfiction (biographies, especially)

Laura Benson ~ LBopenbook@aol.com ~ lbenson@iss.edu
Furthering your study of inferential thinking, I am including the following pieces.

**INFERENTIAL THINKING STUDY**

© Laura Benson

1) **Help students see how they already infer – engage them “Out of Text” experiences first:** Wrapped Presents; Body Language/Faces; Art; Games and Play; Telephone Game; Music & Sounds; Movies & T.V.; Jokes & Humor

2) **Name inferential thinking by modeling self-talk.** I bet...; I sense...; I guess...; I infer...; I predict...: I sense that...

3) **Engage students in practicing inferential thinking with you, together, and collaboratively.** Student practice can be differentiated by the level, length, and type of texts you provide them. Helpful practice texts and experiences include: poetry; wordless picture books; jokes, riddles, and puns; idioms; mysteries; predicting from text titles or headlines (or other text features such as visuals, captions, etc.). Over the course of your multi-week (or throughout-the-year) study of inferring, engage students in reading texts of diverse genres.

4) **Assign students to practice inferring as they read independently.** As they read on their own, students implement the skills and strategies profiled via your modeling and group practice. Their implementation practice can be differentiated by the tasks you give students. For example, help all your students understand the power of priming their thinking before they begin reading by predicting the content of the text with an “I bet…” prediction(s). More mature students (developmentally) can create more predictions and younger students can be asked to create just one or they may need extra support with you in creating one before they read. Or, you have assign more mature or gifted students inferences about more implicit concepts and nudge your younger students’ inferring to more explicit or text based concepts or, perhaps, even pronoun reference inferring.

5) **Monitor students’ progress as inferential thinkers by meeting with them in one-on-one conferences, small group discussion, and evidence gained from their oral, written, and artistic responses.**

6) **As students create effective inferences/successful inferential thinking, enlist them to model and coach their peers about why and how inferences power our understanding.”**

Inferences are possible and necessary because no text is a complete representation of the meaning (Goodman, 1993).

The difference between predicting and inferring is that predictions can be confirmed by reading and inferences are never explicitly stated in text (Lusche, 2003).

As we read text of any genre, we must negotiate the meaning of the words. Sometimes the meanings are veiled with smoke or clouds. At other times, the words give us only part of the meaning like having sixteen pieces of a twenty piece puzzle (Benson, 2000).

While your eyes go down the printed page, your mind will be going between the lines, in and out and under and beyond the words (Waldman, 2000).
### A Continuum of Learning for Our Study of Inferential Thinking

Make Connections to Our Study of Questioning and Connecting

Create an Inferring Taxonomy (other words for “infer” – e.g., predict, guess, think, maybe, sense, estimate, etc.)

Picture Predicting

Inferring During Read Aloud

Stop Signing at Title to Predict Text Information

“Where/When do you infer?” homework and mural discussions; self-evaluation

Name Inferring with More Self-Talk Models: “I bet...I knew it...” and “I bet...(but) I was surprised to learn...”

Pronoun Reference Inferring

*In My Head and On the Page* Inferring

Reciprocal Teaching (teacher led)
Begin Prompting Students to Use Multiple Strategies
Key Word Prediction; Predicting Vocabulary
Predicting and Confirming in nonfiction and fiction texts; chapter title inferring
Filling in the Blanks
Anticipation Guide
Tree Map Predictions/Predicting with Graphic Organizer (some information provided)
Connect Two (before reading)
Concept Clusters (before reading)
List Group Label (before reading; after reading)

*Maybe, Yes, No* Inferring

Elaborating on/from Text Information

Short story book clubs/analysis of text(s)

Predict Causes & Effects with Double Bubble Map in Content Area Reading

Expressions and Sayings; Polysemous Words

*Foreshadowing in Novels*

Write the Next or Missing Chapter

Metaphors; Analogies; Symbolism
Texts for Inferring Practice during Read Alouds, Think Aloud Modeling, Guided Practice, and Independent Reading:

Zoom & Rezoom - wordless texts; King Who Reigned; poetry; art books; humor texts; riddles; Mad Libs; math story problems; View From The Cherry Tree; James Van Pelt’s science fiction; How It Works; Graven Images; The Giver; Rose Blanche; science texts; Time for Kids

Fiction and Nonfiction Author Studies: Banyai Istavan; Ralph Fletcher; Walter Dean Myers; Andrew Clements; Joy Hakim; Chris Van Allsburg; Simon Seymour; Dav Pilkey; and/or Jean Fritz
Poets: Georgia Heard; Dean Koontz; Donald Graves; Paul Janezcko; Ralph Fletcher; Shelley Harwayne; Antone Fisher; Maya Angelou; Jane Yolen; Cynthia Rylant; Mattie Stepanek; Sara Holbrook; and Student Poets
Several of you asked about how we can help student develop or deepen their love of reading. Please see many of the handout resources, especially page 96 of “Putting All the Pieces Together” and “Books in Their Hands.” Two especially important answers to this question are choice and short and spirited texts. It is vital that we give our students choice in selecting the texts they read (More about this in “Books in Their Hands”). Short and spirited texts offer us excellent and brief vehicles for modeling thinking for and with our students. Additionally, short and spirited texts make it possible for students to read widely, finish what they start in a timely fashion, and pursue a topic or theme from multiple lenses/points of view. A few examples of short and spirited texts can be found on pages 74 – 76 of “Linking Literacy Learning” and a full bibliography of short and spirited texts can be found in an article I wrote title “The Long and Short of It” (Tony and Kirsten have copies my consulting portfolio where you can find this article.).

Be very intentional in taking your studies of inferring and identifying important ideas to other content areas and context.

Explore small group collaboratives with some of the following ideas:

**Options for Creating Small Group Collaboratives**

- Teacher-assigned groups (homogeneous or heterogeneous) based on common need, strength, passion, and/or for social considerations
- Students reading the same book
- Students reading books by the same author
- Students reading books of the same genre
- Students writing texts of the same genre
- Students writing about the same/similar topic
- Students who share a love/admiration of common author (to inform their own writing)
- Student-generated to focus on a common passion/interest, question, or social issue
- Student-selected groups for a book club/writing club (students choose who they want to share with/meet with)
- Book talk-choice groups (teacher talks about 3-5 books, students identify 1st, 2nd, 3rd choices; teacher assigns students to choice based/good match groups)
- Cooperative learning groups

A few additional “secrets” for making flexibility possible and plausible.

- Short & spirited texts keep groups short, lively, and offer edifying practice.
- Effective teaching means that needs-based groups do NOT need to be together for more than a few days or weeks. As students learn “need,” group disbands.
Students can lead many of the above options. Student led groups can also meet at the same time and teacher can “listen in” each group.

4th & 5th Grade Teams, please also see the following handouts for additional lesson ideas and implementation support:

🔍 “Knowing Nonfiction”

🔍 “Nurturing Deeper Thinking”
  o Pages 7 – 11 provide good extensions for the study of identifying important ideas we began together and also students engage in text analysis and metacognition.

🔍 “SG_SpeedLight” and “SG_HandbkLight” reflect integrating Units of Inquiry for Science with the thinking strategies we have studied. This comes from Dr. P. David Pearson’s work at the University of California Berkeley.

🔍 “Instructional Strategies” illustrates numerous ideas to extend students’ understanding about why and how to infer and identify important ideas before, during, and after they read. In supporting students’ reading of nonfiction and research work, check out the following (which we would only engage students in independently after gaining modeling and collaborative practice from us):
  o Key Word Notes on pages 26 – 28
  o Cornell Notes on pages 22 – 25
  o Thinking Logs on pages 29 – 31
  o Bio Poems on pages 34 - 35

To cultivate more open type responses or personal responses, see:
  o Response Logs on pages 32 – 33
  o Responding to Reading Prompts ~ Adapted from the work of Dr. Carol Wilcox, Denver Public Schools

I can't understand why…

I noticed…

The main problem is that…

The setting is…

If I were…

I was confused when…

I predict…

I wish that…

I felt that…

I want to learn more about…

I wonder why the author …

I see a picture of…

I would recommend this book to…

I had never thought about…

I can relate to….

know someone who reminds me of…

This made me think of…

I was surprised….

A great word is…

I felt sad when…

An important date is…

I learned how to…

The confusing thing is…

This helped me explain…

I was surprised…

I also want to read…

A new thing I learned is…

I predict…

I’d like to know more about…

A question I have is…

In my mind I picture…

Some interesting facts are…

This chapter (book, article) answered my questions about…

I can use this information for…

I used to think____, but now…

I would like to share my learning by…

I wonder…..

The most important thing I learned was…

Note: Model for students how to support their responses using “because” when appropriate.
Additional Nudges from Fountas and Pinnell

As you read/I read this text to you, think about . . .

- What you find interesting or surprising
- How the author makes you feel
- What you like/dislike about the writing
- What the book makes you think
- Your reaction to the characters
- How the book reminds you of your life
- How the book reminds you of other books
- How the book is similar to or different from other books by this author or other books in this genre
- What you don’t understand, find confusing, or have questions about
- What you notice about the illustrations
- What you want to remember about the book
- Places where the author gives good descriptions
- Why you think the author wrote the book
- What the author is really trying to say
- What you notice about the author’s craft
- How the author used time
- Examples of stereotypes or other biases
- What you notice about the author’s language, word choice, or style
- What you learned

Next Steps of Student Learning About why and How to Work to Understand as Readers and Be Understood as Writers

To extend and deepen these students’ studies and implementations of thinking as nonfiction writers and readers, are a few potential lesson ideas to take these growing readers forward.

The focus of my site visit was reading. The focus of our collaborations was writing. To offer specific ideas about writing please see the numerous articles in my consulting portfolio (Tony and Kirsten each have a copy of this). For example, I introduced David’s class to the 3 Step Revision Ritual I created for my own students. In my consulting portfolio, you will find an article I wrote about the titled “The Write Word.” Additionally, please see the handouts titled “Linking Literacy Learning” for more ideas about writing instruction as well as the provided resource “Writing Next” and the larger multi-file titled “Instructional Strategies.”

Continue idea of learning from mentor texts. Help students revisit admired pieces of nonfiction (or your focus genre). Ask them what they notice and what makes this text “good.” Record what they identify. This anchor chart details key considerations your growing writers should include in their own writing (I would focus on one or two of these qualities at a time rather than expecting students to craft their writing with everything we named as “good.”).

Several of you asked about how we can help student develop or deepen their love of reading and writing. Please see many of the handout resources, especially page 96 of “Putting All the Pieces Together” and “Books in Their Hands.” Two especially important answers to this question are choice and short and spirited texts. It is vital that we give our students choice in selecting the texts they read and write (More about this in “Books in Their Hands” and “Linking Literacy Learning.”). Short and spirited texts offer us excellent and brief vehicles for modeling thinking for and with our students. Additionally, short and spirited texts make it possible for students to read widely, finish what they start in a timely fashion, and pursue topic or theme from multiple lenses/points of view. A few examples of short and spirited texts can be found on pages 74 – 76 of “Linking Literacy Learning” and a full bibliography of short and spirited texts can be found in an article I wrote title “Long and Short of It” (Tony and Kirsten have copies of my consulting portfolio where you can find this article.).

Engage students in Talking Circles to help them reflect on their metacognitive work and purposes for reading. See pages 103 – 104 of “Putting All the Pieces Together” for more details and examples.

Add to students self-talk menus by modeling and practicing why and how we talk to ourselves as proficient, understandin readers and how nonfiction writers talk to themselves as they work to craft their pieces, too.

SELF TALK 🎤 🎤

Laura Benson ~ LBopenbook@aol.com ~ lbenson@iss.edu
"I found out…"

"I knew it…"

"I learned…” (as readers) "I want to teach my readers…” (as writers)

"I was surprised to learn…”

"Pulling all this information together…”

"The most important ideas/information…”

"Okay, now I know that…”

"Comparing this information to…I now think that…”

"I didn’t know that. That makes me think…”

"Here’s what I know now/think now…”

"Wow, I never knew that…”

"Hmm, this seems really important because…”

"This is just like…but not like…”

"I am still wondering about…”

"I don’t get this part…”

"I didn’t really understand…”

"I’d better reread that…because I just don’t get it!”

"I am not sure about…”

"What does this mean…”?

Explore small group collaboratives with some of the following ideas:

**Options for Creating Small Group Collaboratives**

- Teacher-assigned groups (homogeneous or heterogeneous) based on common need, strength, passion, and/or for social considerations

Laura Benson ~ lBroopenbook@aol.com ~ lbenson@iss.edu
- Students reading the same book
- Students reading books by the same author
- Students reading books of the same genre
- Students writing texts of the same genre
- Students writing about the same/similar topic
- Students who share a love/admiration of common author (to inform their own writing)
- Student-generated to focus on a common passion/interest, question, or social issue
- Student-selected groups for a book club/writing club (students choose who they want to share with/meet with)
- Book talk-choice groups (teacher talks about 3-5 books, students identify 1st, 2nd, 3rd choices; teacher assigns students to choice based/good match groups)
- Cooperative learning groups

A few additional “secrets” for making flexibility possible and plausible.

- Short & spirited texts keep groups short, lively, and offer edifying practice.
- Effective teaching means that needs-based groups do NOT need to be together for more than a few days or weeks. As students learn “need,” group disbands.
- Students can lead many of the above options. Student led groups can also meet at the same time and teacher can “listen in” each group.

6th Grade Team, please also see the following handouts for additional lesson ideas and implementation support:

- “Quate Book Study Group” for an excellent protocol to guide students’ analysis of text and deepen their thinking. I would of course model and practice this with students before handing this activity over to them to utilize in their own student-led groups.

- “Knowing Nonfiction”

- “The Case for Slow Reading” (and several other articles embedded into this document which are especially relevant to our conversations)

- “SG_SpeedLight” and “SG_HandbkLight” reflect integrating Units of Inquiry for Science with the thinking strategies we have studied. This comes from Dr. P. David Pearson’s work at the University of California Berkeley.

- “Stopbookmarks” can be run as address labels and, then, placed on sticky notes to encourage students to practice talk which you know will help support their understanding.

- “Self-Talk Bookmarks” reflect the thinking strategies we studied. I give these to students to help them remember to use the thinking strategy(ies) we are studying as they read independently. Additionally, sending these bookmarks home
helps parents know the focus of our reading instruction and provides parents with models of the kind of thinking they can use when reading with their child.

“Nurturing Deeper Thinking” includes numerous ideas. Specifically, check out some of the important previewing strategies such as THIEVES, SQ3R, and POSSE (page 7) and the questions on pages 1-2 & 11 which echo some of our debriefing conversations.

“Instructional Strategies” provides ideas for cultivating any and all of the thinking strategies we studied. It might especially meaningful to these students to learn more about questioning and inferring. With this foci in mind, check the following:

- Reciprocal Teaching on pages 61 – 62 (which can be an excellent structure for students as they engage in student-led book clubs and small group collaborations)
- Strike and Wonders on page 63
- Anticipation Guides on pages 42 - 46
- Question-Answer-Responses on pages 52 - 55
**Unit of Inquiry/Student Learning Focus:** Identifying Important Ideas in Specific Genre - Short Stories (character, problem, setting, solution – “I learned…”); How to Think as Understanding Readers – self talk & response to help students be multi-strategic readers (connecting, inferring, questioning, and evaluating/identifying important ideas);

**PD Focus:** Differentiated instruction and groupings; analyze vs. enjoy reading; Using short and spirited texts; Building vocabulary with read alouds and modeling

Next Steps of Student Learning About why and How to Identify Important Ideas in Fiction

To extend and deepen these students’ studies and implementations of identifying important ideas, here are a few potential lesson ideas to take these growing readers forward. 😊

Engage students in Talking Circles to help them reflect on their metacognitive work and purposes for reading. See pages – 104 of “Putting All the Pieces Together” for more details and examples.

Furthering your study of Fiction, ask students to generate “master plots” or patterns of plot. Offer them new insights, too.

20 Master Plots

Text Structure Flow Map Game ~ Fiction Version ~ c) Laura Benson, 2005

**Beginning**
- Create an interesting character.
- Help your reader get to know character inside and out.
- Give Character a juicy problem.

**Middle**
- With your words, show how character struggles with problem & create some scenes telling what character is doing & feeling to solve his/her problem.

**End**
- Tell how character solves problem;
- Explain how his/her solution brings character happiness, growth, or change.
Deepen students’ understanding about the Important Ideas in Fiction with S.T.O.R.Y.

Several of you asked about how we can help student develop or deepen their love of reading. Please see many of the handout resources, especially page 96 of “Putting All the Pieces Together” and “Books in Their Hands.” Two especially important answers to this question are choice and short and spirited texts. It is vital that we give our students choice in selecting the texts they read (More about this in “Books in Their Hands”). Short and spirited texts offer us excellent and brief vehicles for modeling thinking for and with our students. Additionally, short and spirited texts make it possible for students to read widely, finish what they start in a timely fashion, and pursue a topic or theme from multiple lenses/points of view. A few examples of short and spirited texts can be found on pages 74 – 76 of “Linking Literacy Learning” and a full bibliography of short and spirited texts can be found in an article I wrote titled “The Long and Short of It” (Tony and Kirsten have copies my consulting portfolio where you can find this article.).

Explore small group collaboratives with some of the following ideas:

**Options for Creating Small Group Collaboratives**

- Teacher-assigned groups (homogeneous or heterogeneous) based on common need, strength, passion, and/or for social considerations
- Students reading the same book
- Students reading books by the same author
- Students reading books of the same genre
- Students writing texts of the same genre
- Students writing about the same/similar topic
- Students who share a love/admiration of common author (to inform their own writing)
- Student-generated to focus on a common passion/interest, question, or social issue
- Student-selected groups for a book club/writing club (students choose who they want to share with/meet with)
- Book talk-choice groups (teacher talks about 3-5 books, students identify 1st, 2nd, 3rd choices; teacher assigns students to choice-based/good match groups)
- Cooperative learning groups

A few additional “secrets” for making flexibility possible and plausible.

- **Short & spirited texts** keep groups short, lively, and offer edifying practice.
- Effective teaching means that needs-based groups do NOT need to be together for more than a few days or weeks. As students learn “need,” group disbands.
- Students can lead many of the above options. Student led groups can also meet at the same time and teacher can “listen in” each group.
SELF TALK & Prompts 📚 📚

Continue the metacognitive self-talk we began:

Note: Model for students how to support their responses using “because” when appropriate.

Tell me what you are thinking.

Tell me what you were thinking here.

Tell me about the main character(s).

Would you like this character to be your friend? Why or why not.
7th Grade Team, please also see the following handouts for additional lesson ideas and implementation support:

- **“Quate Book Study Group”** for an excellent protocol to guide students’ analysis of text and deepen their thinking. We would of course model and practice this with students before handing this activity over to them to utilize in their own student-led groups.

- **“Knowing Nonfiction”**

- **“SG_SpeedLight”** and **“SG_HandbkLight”** reflect integrating Units of Inquiry for Science with the thinking strategies we have studied. This comes from Dr. P. David Pearson’s work at the University of California Berkeley.

- A specific goal I would have for these students would be to encourage and expect them to generate their own questions. To offer them some additional modeling of questioning and to get to know them more, please see page 11 of **“Nurturing Deeper Thinking.”** And, again, ask students to generate their own questions after previewing the text a bit. They could also PERIODICALLY respond to their own questions after reading a text.

- **“The Case for Slow Reading”** (and several other articles embedded into this document which are especially relevant to our conversations)

Conferring Professional Learning Text Set
The Difference Between Conferring and "Touching Base"

Debbie Miller

Sometimes when I talk with teachers about creating "the luscious feeling of endless time," they look at me like I've lost my mind. They tell me they love the idea, but with all they have to teach and all their kids need to learn, "There's no way," they say. Luscious feeling? Endless time? Come on girlfriend, get real!"

It's true that teachers have never been under more pressure. We're bombarded by demands and directives deemed by others as necessary and non-negotiable. As a result, teachers everywhere are making Herculean efforts to fit everything in. It's no wonder there's talk by some of hurry-up-and-get-it-done.

But when getting done takes precedence over the doing, when finishing becomes more important than the figuring out, we've lost sight of why we became teachers in the first place; we've lost sight of what we know to be true. In our rush to try and get everything in, we've forgotten that children learn by doing. And learning by doing takes time.

When kids are given time to puzzle through something that's challenging (with just enough support from their teacher to be successful) they're not only learning about the task at hand, but they're learning about who they are and how they go about figuring things out. They're developing those can-do, let-me-have-it attitudes that we want so much for them.

It's hard to teach (and learn) with a timer in your head or one in your hand. It's controlling. It's restrictive. It limits mindfulness, understanding and engagement for students and teachers alike. Just like reading fast isn't always about reading well, teaching fast isn't always about teaching well either.

No matter how fast we teach or how hard we try, it's impossible to do all we're being asked to do when teaching for understanding is our goal. So in the end the choice really is ours ...

Do we race through the day in a frantic sort of way, or do we slow down, determine what's essential, and teach those things deeply and well? Do we talk and tell and talk and tell and talk and tell some more, or do we show kids how and then give them lots of opportunities across the day for sharing in the responsibility for their learning?
Taking Time to Confer

While I touch base with many children in every reader's workshop, I really confer with only a couple each day. Right about now you might be wondering, "How do you justify spending so much time with one child? What about the twenty four others that need your time and attention, too?"

It's true. In the time I spent conferring with one child, listening to them read, asking questions to make sense of their reading, and puzzling over next steps with them, I could have easily touched base with three, four, five, maybe even six more children. But touching base isn't teaching. Touching base with children is a quick hi and bye with a little something in between.

Touching base is a good thing. That "little something in between" might be encouraging a child to keep at it, reminding a child to get back on track or asking a child if she's remembered what she learned in our conference yesterday to help her with her work today. Touching base is all about responding at the surface level to student behaviors. But we don't want to confuse touching base with conferring.

Conferring is something else entirely. When we confer with students, we're not standing above them or even leaning over, we're sitting right beside them, shoulder to shoulder. We're digging deeper now, working hard to individualize our instruction and support children as they apply what we've taught them in large and small group settings.

Richard Allington's research clearly indicates that our most effective teaching occurs when we work with students one on one. I've learned from him, others, and my own experience that it's not about how many children we confer with in a day, but how deeply we teach and touch those we do. When we work with children, they're more likely to work with us.

You might be thinking, "Okay. But did you really need to listen to children read for more than a minute or so?" For me, the answer is yes. When students read to us, they are sharing their growing skills and sense of themselves as readers. It allows us to acknowledge and revel in that for just a moment. We want to build relationships with the children in our charge; we teach and learn best when we know one another well. And besides, don't we all need a little Shel Silverstein or Kate DiCamillo in our lives now and then?

And what about the rest of the kids? Their day will come. Do you know the picture book The Three Questions by Jon Muth? It's a story about a little boy named Nickolai who is seeking the answers to three questions. He wonders:
When is the best time to do things?

Who is the most important one?

What is the right thing to do?

It's Leo, the wise old turtle, who helps Nickolai understand that the answers were inside him all along by saying...

"Remember then that there is only one important time, and that time is now. The most important one is always the one you are with. And the most important thing is to do good for the one who is standing at your side. For these, my dear boy, are the answers to what is most important in this world. This is why we are here."

I spend time with just a couple individual children in each reading workshop because I want to "do good" for them. I know there are twenty-four others, and I will do the same for each of them time and again in the days, weeks, and months to come. We can't reach everyone all in one day, but we can reach one or two or maybe even three. We reach, touch and teach by being present, putting ourselves in the moment and focusing our full attention on the one sitting by our side.
5 REASONS TO KEEP CONFERENCE RECORDS

Monday February 25, 2013 by Ruth Ayres

1. **Conference records hold you accountable for meeting with everyone.** I know there are lots of students who need you. I know there are students who you think won’t get going until you talk with them. I know, I know. However, the fact of the matter remains: EVERYONE deserves individual conferences with you. By keeping notes of conferences, you are able to make sure you are seeing your entire class. True, I do meet with needier writers more often, however, my goal is to “turn over” a class every two weeks. This means after 10 school days, I’ve seen every single writer at least once.

2. **Conference records push you to document a positive note about each writer.** Part of our conferring records is to note the current strength of each writer. If we don’t keep records, then it is easier to overlook this crucial part of a conference.

3. **Conference records also keep track of the teaching point.** When I make sure I write down my teaching point during the conference, I usually stick to just one. Without conference notes, it is easy to teach one thing and then another and another and another…Taking notes allows us to pick ONE, important teaching point per conference. In addition, when I write down the teaching point, I can check back and eventually see that teaching point become a strength for the student. This makes finding a positive item to note about a student easier.

4. **Conference records are data.** They are proof of the teaching and learning occurring during writing workshop.

5. **Conference records help you remember.** Quite simply, there is too much happening in a school day. Although we like to imagine we are superstar teachers, we need to document the learning and teaching that happens during individual and small group conferring in order to remember later. When this happens we are able to use our notes to reflect and help us tailor minilessons and small group instruction according to the points of need in our unique classrooms. Conference records empower us to do this kind of reflection.
The Art of Listening in Writing Conferences with English Language Learners

Andie Cunningham and Ruth Shagoury, Choice Literacy

Listening looks easy, but it is not simple. Every head is a world.

Cuban Proverb

Researchers have studied the physiology of listening and speaking. One of the things they discovered is that it's much harder to listen than it is to speak. Listeners' heart rates and body temperatures go up slightly as they lean in and try to make sense of what the speaker is saying.

Listening to individual children in active writers' workshops is especially challenging, and understanding the words of students who speak a different first language than yours can be downright daunting. Here are some tips for mastering the art of listening in conferences with English language learners:

- **Repeat back what the child says to you.** We unconsciously and automatically translate any speaker's words into the idioms of our language and culture, and this often means we lose the meaning the child is trying to create. By repeating the words back, we can ensure we've got them right, as well as the ideas the child is attempting to convey.

- **Try to establish eye contact.** Some cultures discourage children from making eye contact with adults, so this can be a difficult task. But eye contact allows you to communicate so much nonverbally with any child -- that they have your attention, respect and interest. When a child turns away from you, either from distraction or shyness, a gentle touch on the arm or back will often bring them back to eye contact with you.

- **If you are having trouble establishing eye contact, point to words or images on the page and prompt the child with "tell me about this" or "what's this?"** English language learners will sometimes be more comfortable at the start of a conference by talking at the page they have written, rather than directly to you.

- **Pull up a chair and watch as the child writes or reads.** You might narrate the "action" as he writes, guessing what is being drawn or what the word is being attempted. But letting the child work at their pace, while you sit on the side and listen, sends a strong signal that you respect the student's process and are ready to listen when they have something to say to you.

- **Avoid asking yes/no questions.** If your questions only require a one-word response, you'll be spending far more time talking than the child. Open-ended questions also encourage more reflection for both you and your students. The exception, of course, is for children in the silent period, who can make themselves known by nodding "yes" or "no" to your guesses, and can work toward one- or two-word responses through these nods.
- **Respect silence.** When you ask a question, wait till the child is ready to answer. And then wait some more. Give your students time to sort through what you've asked in their native tongue and English, and let them take all the time they need to formulate a response. It feels unnatural to break the hectic, noisy pace of many writer's workshops by encouraging these long pauses in conferences, but they are vital for children to sort through their thoughts and develop a reflective stance.

- **Celebrate approximations.** It's tempting when a child writes a "F" for a "P" sound to launch into a lesson on sounds and symbols. But with young writers and readers, it's often more important to get them writing, and comfortable with taking risks. If you teach them that you must approve the correctness of every letter, they will be hesitant to experiment, instead relying on your presence or copying words off the walls or from books.

- **Don't allow other children in the classroom to distract you.** Send any child who interrupts with a quick, kind word that conveys the importance of giving the child you are working with your full attention.

- **Take good notes.** Pausning to write down what you are noticing the child accomplish verbally and nonverbally will open up more time for the child to speak in the conference, and it will give you wonderful fodder to refer to in launching the next conference with the child.

**Patrick Allen**, the author of *Conferring: The Keystone of Reader's Workshop*, has advice for teachers in this **podcast**:

Conferring: Coaching Growing Readers and Writers © Laura Benson ~ LBopenbook@aol.com
Snow Sculpture is a beautiful poem about talking with children from Your Daily Poem website. If you love poetry, we highly recommend their free service of poems delivered to you inbox every morning:

The daily routines of writers are fascinating. This compilation is great fodder for a minilesson on habits, or just fun reading if you enjoy a peek into the lives of your literary heroes:

http://bit.ly/UQp1rD

Katie DiCesare confers with first grader JJ, and reflects on the challenges of building decoding and comprehension skills (as well as stamina) with young readers:

In Sean Moore's conference with second grader TJ, the strategies of backing up and rereading as well as attending to the "bossy e" are discussed:

Franki Sibberson helps fourth grader Anna meld her love for lists of animal facts with her plans to write a report:

This final conference was filmed just last week, in the midst of The Hobbit movie craze among teens. Katie Baydo-Reed confers with one of her eighth graders who is just beginning to read the classic, and discusses the fantasy genre with her:

Looking for the Open Door

Beth Lawson, Choice Literacy

He was in his favorite classroom spot with his favorite expression. Scrunched up face, hands gripping hair, huddled on the little green carpet spot underneath the overhang of my desk. Though seated on the floor, he was in the most conspicuous spot in our classroom, waiting for someone to take notice. Most days I walk on by, rushing to students who are ready to accept suggestions and help.

I have developed a theory about reluctant or “stuck” writers over the few years I have been a writing teacher. Writers who don’t want to be helped won’t be. It takes a caring hand, a supportive community, and time to guide them to an open place, a place where they can hear possibility. I had an inkling that today was Christian’s day. Something about the way he had been acting lately told me he is finally ready to chat. It’s already January, but it doesn’t matter. It can be futile to rush a reluctant writer. Building trust in the process takes time.

I sidle over to Christian. Often I start a conference with a generic, “How’s it going?” Christian needs different words. Before he grumbles, I jump in, “Hi Christian, I read the piece you wrote for your homework this week. It was amazing. You are a writer! I honestly had no idea what a natural talent you are, but that piece was, well, in a word . . . spectacular.”

His plastic-rimmed glasses look up at me and a smile (gasp!) spreads across his face. “Yeah, I got your notes. I really liked writing about my new game. I’m so happy my dad got it for me and so I had a lot to say about it.”

“I loved it!” I respond, and without skipping a beat I add, “So, tell me what’s going on with your piece today?” My poker face is looking at his paper, not him. I made the decision; we are tackling his self-doubt today.

“Well, to be honest, I like my lead and I’m not sure what I can do to change it,” he shrugs.

Our workshop focus had shifted to the revision of leads in the last few days, and we are all working toward a common goal of publishing narrative pieces. We reread Christian’s lead from his original draft, “At my dining room table, my dad and I like to work on model airplanes.”

“Eh, it’s nice.” I reread the piece silently and my hands slowly twist from side-to-side, “I know you can do more though.” It’s true, he
could write better and he needed to know someone thought so. Every writer in my classroom probably hears a different conferring voice from me. I often find myself mirroring their mannerisms and voice when I speak to them. For Christian, candor is crucial.

Glancing over his story, I wonder aloud, “What is this story about? What are you feeling in this story?”

He reread a bit out loud and shared, “Well, this story is about how my dad and I build model airplanes together. But, I never finished it because he doesn’t have time to build with me anymore, so it makes me too sad to write.”

“So this story is about disappointment?” I inquire.

“Well, yeah,” he nodded affirmatively.

“Then that needs to be infused into your lead. Allow the reader to feel the disappointment through your words. You can set the tone for your story with just a few powerful words,” I guide and then continue to nudge. “Would your writing buddy infer disappointment from this lead?”

“Well, no. He would think it was a happy story about building models.” It was obvious he was pondering this idea.

Students were charged with revising their original narrative lead at least three different ways after a class study of lead structures. Speaking with Christian, it was clear that the next step in our conference was a call to action: “So what type of lead would you like to craft next?”

He moves his writing folder aside and pulls out his yellow revision notebook. Our eyes follow the print he has scribed so dutifully the day prior, after our lengthy class discussion about different types of leads. I follow his finger as he scans: knock your socks off, wrap around, crystal ball, dialogue . . . He stops, “Well, I wanted to try dialogue, but . . .”

That defiant “but” was all-too-familiar to me. I often think fondly of my friend Christian as the George Constanza of our classroom. He is just never satisfied with agreement and compliance; it is one of the many things I really like about him. It is also clear that in order for him to grow as a writer we need to push that reluctance aside, at least for a little while. He is a verbally articulate writer who has all of the words he requires to create a wonderful piece, but needs to talk through them to get his message on paper.

We acted out the scene together -- what he said, what his father said and how he felt. His pencil hit the yellow legal pad and he skillfully crafted a dialogue lead, which clearly depicted his disappointment: “‘Hey dad, do you want to build an airplane?’ I said
happily. ‘Not right now, but maybe later. Okay?’ ‘Okay,’ I replied back sadly.”

With two more leads to try, I look him in the eye, and with a firm, “you can do it,” was off to the next writer.

As I headed over to speak with Olivia, my gaze wandered back to Christian. His hands were back in his hair. Victory can be fleeting in writers’ workshop, but he revised a lead today. He accepted feedback. He tried something new. I stop at an empty chair and quickly jot down our small victory in my teaching notebook. My attention shifts to Olivia, “So, how’s it going?”
Peer Conferring: The Release Phase

Amanda Adrian

Last summer I read the book *Mindset* by Carol Dweck. If you ran into me at the pool up the road, at a professional development class, or even at the grocery store, you probably already know this. I couldn’t stop talking about it. Every time I shared my thinking about the book, my understanding of what I’d read deepened while others’ connections to the ideas gave the content more shape. As a result of those conversations, I know of a number of people who have picked up the book and described a reaction similar to mine: it was life-changing. This is the stuff of real-life readers. We share, we develop our understandings, and we ignite an interest in books for others. Peer conferring provides a scaffold that puts students on the path to acquiring all of these traits.

Research and experience have told me that when students talk to their peers about books, their comprehension is strengthened. Additionally, the more they do it, the more those students begin to resemble the ‘real-life’ readers I hope they’ll become.

**Back off! I’m ready to talk!**

When students have had multiple opportunities to practice peer conferring, receiving timely feedback from other peers and their teacher, they internalize thoughtful conversation norms, and are ready to engage in quality book conversations on their own.

In Melissa Styger’s fourth-grade classroom, students were given multiple opportunities to “try it on” in the guided practice phase of gradual release of responsibility. Before long, Melissa and I noticed that students were becoming more comfortable with the structure, and the dialogue began sounding more like a real conversation rather than a scripted one. In one group, we saw Carly look back into her novel to share a scene that illustrated her thinking:

“Wait! I have to find this! It was so crazy when . . .”

Then we heard Derek say, “I liked the way you told me about that character. I kind of want to read that book now.”

“Oh, no! Spoiler alert!” Monica called out.
Paul asked his partner to give more information about his book: “Can you tell me more about the Remake Center?”

Glancing around the room, we were thrilled (as in giving each other high-fives) to see that students were truly making eye contact with one another. They were nodding their heads and responding authentically, even remembering to thank their partners for sharing. They were doing the things we’d hoped they’d do. They were peer conferring!

They’ve got it, now when do they do it?

When and how often students engage in peer conferring depends on the classroom. In Melissa’s classroom, students were invited to initiate a peer conference any time during independent reading. They were also trusted to choose their own partner.

Some teachers like to know that all students are conferring each week. One teacher designated Tuesdays and Thursdays as “Peer Conferring Days,” wrapping up the independent reading time five to ten minutes early so that all students are peer conferring at the same time. This teacher listens in as students confer, providing evidence that they are maintaining the expected level of thinking and social skills that had been taught.

Another teacher likes to have written evidence of her students’ thinking and requires them to turn in a weekly reflection of their peer conference. She provides the prompt: “What came up for you in a peer conference this week? What did you learn about yourself as a reader or your book based on that conversation?”

The important thing is not necessarily when or where the kids confer. What matters is that kids are talking to each other about text, and consequently increasing their comprehension, building on their thinking, and sparking an interest in others.

So, what do the students have to say?

When Melissa Styger asked her fourth graders if peer conferring helps them to understand their books better, here’s what they said:

Jamie: “Yes, because I have to go back in the book and find evidence to answer their question.”

Tasha: “Well, when I talk about it, it helps me understand it better.”
David: “Sometimes it does because when my partner knows about my topic they give me new schema.”

As a real-life reader, I was compelled to share my thoughts about Mindset with just about everyone I knew. Students who learn the structure of peer conferring are certainly “ramping up” their comprehension. They are also learning to be people who share their thinking, who are open to developing their understanding, and who ignite an interest in books for others.
The RIP Model: Bring Thoughtful Structure to Our Conferring

To provide predictable patterns to his reading conferences with students, Patrick Allen (2009) developed specific outcomes for each component of a conference:

R = Review, Read Aloud, Record

I = Instruction, Insights, Intrigue

P = Plan, Progress, Purpose

Intrigue: The reader or I might be intrigued about something we noticed in the beginning of the conference. Possible language to elicit further discussion or thought (might sound like):

**Student Language:**

I noticed that I got confused when I read this sentence. I wonder if you could help me figure it out...

**Teacher Language:**

You’ve been reading this book for a while now. How long do you think it will take you to finish it?

I’m curious about your book choice. Tell me a little bit about what you were thinking when you chose it...
When you read that page, you didn’t slow down at all. Remember, we talk about “pacing, considering, and reflecting” as we read. What would happen if you read a little more slowly?

**Progress:** The reader and I might consider the subtleties of a strategy or skill that might stretch the reader to better understand his process. Possible language to elicit further discussion or thought (might sound like):

**Student Language:**

*I think I am doing a pretty good job at figuring out unknown words. I’m going to keep track of the strategies I use to help me understand the words I don’t know automatically.*

**Teacher Language:**

*You seem to be having trouble reading them dialogue when two characters are talking. Stop periodically to make sure you know who is talking...*

*You talked a lot about using your background knowledge. Now, let’s see if you can pinpoint those times when it’s your background knowledge that is helping you understand...*

*You’ve been reading a lot of fiction lately. Perhaps next time we meet, you can share a different genre with me and tell me why you chose it...*
CONFERENCE Phases

Lucy Calkins (2006) proposes the following “architecture” for conferences:

- **The Research Phase:** Through observation, discover what individual writers need from you; try to understand what the writer is doing and why.

- **The Decision Phase:** Take in all the information the writer is giving you through their conversation and writing to decide what to compliment and what to teach that will help the writer most.

- **The Compliment Phase:** Make a bit of a fuss over something the students have done—or tried to do—that you want him to keep doing as a writer. Be specific so the action is replicable.

- **The Teaching Phase:** Similar to a mini-lesson, teach the writer something specific you hope will help her as a writer. “Can I teach you one tip I think might help you not only with this piece, but future pieces, too?”
