Dear Parent/Guardian,

This year during one or more rotating advisory days, the Learning Innovation coaches along with its action team will be implementing Autonomy, Mastery, Purposed education (AMPed) project for short. During the AMPed hour, students will be able to explore their interest and passions, and actually make something tangible to present to their peers as well as the rest of Bayside campus. The AMPed hour is better known around the world as Genius Hour. This allotted learning hour is not a new concept as many students from institutions worldwide have been participating and sharing their own learning with each other.

Your child's advisor, is commitment to helping your child develop academically, mentally and critically, thus improving their higher-level thinking skills. AMPed gives our students at SIS the time to inquire, create, evaluate, research, synthesize, analyze and share. AMPed will work because the topic students work on is founded in their interests and therefore is driven by their own intrinsic motivation.

We invite you to join your child's AMPed journey and we look forward to you being blown away by what our students can achieve when they follow their interests.

Sincerely,

The Learning Innovation Coaches
Martin Ruthaivilavan & Mark McElroy
