

My STAR Project

Situation:

What is the current condition that you wish to improve upon?
(e.g. What do you want to learn? Solve? Change? Improve?)

Task:

How will you improve the current condition that you think needs to be better? What will your final project look like?

Action:

What are the steps you need to do in order to reach your task. This is the time to plan out what you will do. The steps will probably change as you get started. That is okay, it part of the process.

Action	Due Date

Due Date

A collaborator should be a person who has some experience or knowledge of what you are trying to learn. It can be peers, teachers, parents, and experts in our very own community. Ask a teacher to guide you to a person who can help influence your AMPed project.
