

Category	Project or Company Name	Description	Stage of Development			
			Bench	Preclinical	Clinical	Market
Therapeutics	Urearetics	A novel mechanism to treat uremic pericarditis and pericardial effusions in chronic kidney disease patients by inhibiting urea transport. PI: Jeff Sands, MD (Emory)	●			
	Agrithera	A therapeutic strategy to overcome the pharmacological drawbacks of cannabidiol (CBD) for epilepsy using prodrugs that metabolize to CBD in the body. PI: Dennis Liotta, PhD (Emory)	●			
	IBD Therapeutic	Development of an LRH-1 agonist to target inflammation without the side effects seen with global immunosuppression. PIs: Nathan Jui, PhD (Emory) & Eric Ortlund, PhD (Emory)	●			
	NanoCliq	A vaccine candidate consisting of a virus-like particle present on the Leishmania parasite, to prevent the onset of Leishmaniasis. PI: M.G. Finn, PhD (GT)	●			
	CXCR4	Best-In-Class Orally Bioavailable CXCR4 Antagonists Heat Up Solid Tumors. PIs: Dennis Liotta, PhD (Emory), Eric Miller, PhD (Emory), Hayn Kissick, PhD (Emory), & John Petros, MD (Emory)	●			
	SaGA for Cancer Drug Discovery	Utilizes a novel isolation assay for metastatic “leader” cells in solid tumors to develop novel cancer therapeutics PI: Adam Marcus, PhD (Emory)	●	●		
	SIRPant	SIRP $\alpha$ <sup>low</sup> engineered macrophage immunotherapy for treatment of solid tumors. PIs: Yuan Liu PhD (GSU) & Ned Waller, MD, PhD (Emory)	●	●		
	Centizyme	Gold nanoparticle coated with target-specific catalytic deoxyribozymes therapeutic for severe asthma. PIs: Cherry Wongtrakool, MD (Emory) & Khalid Salaita, PhD (Emory)	●	●		
	TPAM siRNA	siRNA therapeutic to stop the progression, and potentially even regress, atherosclerotic plaque formation. PI: Hanjoong Jo, PhD (Emory)	●	●		
	12X	Repurposed drug to induce bone formation for spine fusion and prevention of non-union. PIs: Nick Willet, PhD (Emory), Scott Boden, MD (Emory), & Sree Sangadala, PhD (Emory)	●	●		
	BioPace	RNA-based therapy for converting cardiomyocytes into a pacing phenotype to regulate heart rate. PIs: Hee Cheol Cho, PhD (Emory) & Phil Santangelo, PhD (GT)	●	●		
	Marpé Therapeutics	Isolated host defense peptides for the treatment of viruses, including Dengue, Influenza, Avian Flu, and Zika. PI: Joshy Jacob, PhD (Emory)	●	●		
	MetaCclipse	Tumor membrane vesicles for immuno-oncology treatment of triple negative breast cancer. PI: Periasamy Selvaraj, PhD (Emory)	●	●		
	NephroDI	Small molecule drug for Nephrogenic Diabetes Insipidus, a pediatric orphan indication. PIs: Jeff Sands, MD (Emory) & Janet Klein, PhD (Emory)	●	●		

# Biocity Portfolio Status

AUGUST 2022

Category	Project or Company Name	Description	Stage of Development			
			Bench	Preclinical	Clinical	Market
Therapeutics	Pyrefin	Small molecules targeting the EP2 receptor to treat chronic inflammatory diseases. PIs: Thota Ganesh, PhD (Emory) & Raymond Dingleline, PhD (Emory)	●	●		
	Cambium Oncology	Small molecule VIP-receptor antagonist for immuno-oncology. PI: Ned Waller, MD, PhD (Emory)	●	●		
	Athena	An early-stage cell therapy company developing a mesothelin-specific chimeric antigen receptor (CAR) T cell product for the treatment of mesothelioma and other mesothelin expressing solid tumors. PI: Chrystal Paulos, PhD (Emory)	●	●		
Diagnostics	Heteroresistance AST	Approach to determine antibiotic susceptibility in <2 hrs of blood culture. PIs: David Weiss, PhD (Emory) & Peter Yunker, PhD (GT)	●	●	●	
	Sanguina	Quick, disposable, handheld biochemical device that provides a quantitative evaluation of anemia in less than two minutes. PI: Wilbur Lam, MD, PhD (Emory)	●	●	●	●
Drug Delivery	Twice Therapeutics	Targeted gene therapy delivery to many cell types without the need to reconfigure the AAV. PIs: James Dahlman, PhD (Georgia Tech) & Eric Sorscher, MD (Emory)	●			
	DexaPatch	Site-specific delivery of dexamethasone to the surgical site to avoid side effects of systemic steroid delivery. PIs: Adam Klein, MD (Emory), Daniel Refai, MD (Emory), & Andrés García, PhD (GT)	●			
	CorAmi	A drug delivery platform for localized delivery of therapeutic-seeded hydrogels to the pericardial space PIs: Rebecca Levit, MD (Emory) & Andrés Garcia, PhD (GT)	●	●		
	ProLymph Nano	Drug delivery technology unlocks new market opportunities by targeting the lymphatic system. PI: Susan Thomas, PhD (GT)	●	●		
Cell Mfg	Andson Biotech	A platform technology that provides accurate and low-cost quality monitoring for cell therapy bioreactors. PIs: Andrei Fedorov, PhD (GT) & Edwin Horwitz, MD (Emory)	●			
	CellFE	Cell processing and treatment technologies that will enable better manufacturing and functionalization of cell therapies. PI: Todd Sulchek, PhD (GT)	●	●		
Software & Health IT	Sanicka	A clinical decision support tool to aid treatment selection and optimization for leukemia patients. PIs: Nicki Panoskaltzis, MD (Emory) & Sakis Mantalaris, PhD (GT)	●			
	Bystro	A search engine for your life-sciences data. PI: Thomas Wingo, MD (Emory)	●			
	CNS Disease Biomarkers	Diagnostic platform for pre-clinical detection and quantification of functional neurodegenerative biomarkers. PIs: Allan Levy, MD (Emory) & Nick Seyfried, PhD (Emory)	●	●	●	

# Biolocity Portfolio Status

AUGUST 2022

Category	Project or Company Name	Description	Stage of Development			
			Bench	Preclinical	Clinical	Market
Software & Health IT	AngioCloud	Cloud-based software with the selection and deployment of neurointerventional devices. PIs: Frank Tong, MD (Emory) & Alessandro Veneziani, PhD (Emory)	●	●	●	
	Repredix	Mobile technology for detection of CHF decompensation. PIs: Gari Clifford, PhD (Emory) & Amit Shah, MD (Emory)	●	●	●	
	Covanos	Software tool for automated quantification of Left Ventricle Fractional Flow Reserve. PIs: Habib Samady, MD (Emory) & Don Giddens, PhD (GT)	●	●	●	
	Codoxo	Provides intelligent claims analysis to help identify, address, and mitigate payment of fraudulent healthcare billing. PI: Mustaque Ahamad, PhD (GT)	●	●	●	●
Devices	Sleep Monitoring Biopatch	A soft, wearable biosensor patch and accompanying software to enable at-home sleep testing. PI: Woon-Hong Yeo, PhD (GT)	●			
	Focused Cryo	Cryoablation system with real-time temp. sensing and directionality to suggest optimal probe insertion path. PIs: Yogi Patel, PhD (Emory) & David Prologo, MD, FSIR (Emory)	●			
	Robotic Guidewire	Robotically steerable guidewire for interventional radiology procedures. PIs: Zachary Bercu, MD (Emory) & Jaydev Desai, PhD (GT)	●			
	Piggy-Back Heart	A self-powered heart pump that harvests native motion of the right ventricle to enhance blood flow in Fontan circulation for patients with hypoplastic left or right heart syndrome. PI: Murali Padala, PhD (Emory)	●			
	Fecal Matter Processor	Device for improved and simplified processing of fecal matter for fecal transplantation therapy. PIs: Bob Taylor, MD (Emory) & Colleen Kraft, MD (Emory)	●			
	Lybbie	Fully wearable breast pump that allows for hands-free pumping and improved mobility for breast-feeding mothers. PI: Andrea Joyner, MD (Emory)	●			
	TriLEN	A modified leaflet implant that can be sized for pediatric patients to repair tricuspid or atrioventricular valve regurgitation. PI: Murali Padala, PhD (Emory)	●	●		
	Nyra	A transcatheter implant that seeks to “plug” the fluid path, which is seen in patients with mitral regurgitation. PI: Murali Padala, PhD (Emory)	●	●		
	Periurethral Bulking	Device for standardizing bulking material delivery for the treatment of urinary incontinence. PI: Nail Galloway, MD (Emory)	●	●		
	IV Infiltration Detection	Automated detection of infiltration of IV fluid lines. PI: Omer Inan, PhD (GT)	●	●	●	
	CameRad	Device to reduce mismatch of radiology imaging and patient identities. PIs: Pamela Bhatti, PhD (GT) & Srini Tridandapani, MD, PhD, MBA (Emory)	●	●	●

			Bench	Preclinical	Clinical	Market
Devices	BRIJJIT	Wound closure technology to reduce formation of scars. PI: Monte Eaves, MD (Emory)	●	●	●	●
	Dr. NozeBest	Battery-powered suction device designed to clear nasal congestion in babies and children. PI: Steven Goudy, MD (Emory)	●	●	●	●
	Jackson Medical	Device to reduce the risk of endoscope-related procedure drape fires. PI: James Rains, PE (GT)	●	●	●	●
