

Rehabilitation Engineering & Applied Research

If you need a route without stairs, continue down Ferst Drive until you reach Plum Street Northwest and take a right. Then, take a right up a small sloped pavement hill to get to the back of the College of Computing building. There will be a door in the building on your left that you will be able to enter.

The REAR Lab is located on the bottom floor of the CCB in room 27. Enter through the exterior door and turn right. The REAR Lab has signs above the doors.
