

Family Cell Phone & Technology Use Contract

1. The goal of this contract is to create a cell-phone and technology use policy that meets the needs of our family; your school; and the global community in which we live.
2. Your possession of this phone and any digital device is a privilege, not a right. You may not ignore calls/texts from us. If you are unable to answer, you must respond to us at the first reasonable opportunity.
3. We will always know the password for this phone and any apps downloaded onto this phone or other digital devices.
4. You will not have access to our password to iTunes. If there is an app you would like – whether free or for purchase – you must first request our permission.
5. When you are at home with us, you may have ____ hour(s) on school days and ____ hour(s) on weekend days to enjoy your phone/digital devices. We like being with you, and we want to make sure that you don't constantly disappear into the world of screens.
6. You will not text, post, or take photos with this phone or any digital device while you are driving a car.
7. You will return the phone or digital device to a parent or guardian at ____ p.m. every school night and at ____ p.m. every weekend night.
8. Your allotted phone/screen time will not begin on school mornings until after you are fully ready for school with your bag packed.
9. After school, you will turn in your phone or digital device until your homework has been completed.
10. Do not take photos or videos of other people and post/share without their permission.
11. Do not photograph or share inappropriate images of yourself or other people. If something happens, you can always ask us for help. Coming to a trusted adult for assistance will never make your situation worse.
12. If you have a conflict with someone, call the other person and talk about the conflict in a live conversation. Texting, email or messaging can often escalate problems.
13. When using technology, remember to **pause before you publish**. You may not use the phone or any other form of technology to defame, slander, hurt, humiliate, ostracize, retaliate against, intimidate, bully or punish another person.
14. When you make a mistake with the phone or digital device, you will take steps to restore any harm that has occurred. We will take your restorative response into consideration while determining consequences. We understand how important digital technology is to your life, mistakes are opportunities to learn and take accountability.

15. You have a right to privacy, but you must understand that there is no such thing as digital privacy. If there is anything private you want to say to someone, you can tell it directly to that person in a live conversation.
16. You may not lie about your age to join social networking sites, even if your friends are doing it. Every family has different rules. These are ours. If you are old enough to join social networking sites, we will have the passwords to your accounts. We will not look at your accounts unless we have reason to be concerned.
17. If something happens to your phone or digital device, you are responsible for the replacement costs or repairs, even if a friend was using it when it broke.
18. Do not use your phone or digital device at mealtimes or while having a conversation with someone. We expect eye contact during face-to-face discussions. If any adult asks you to stop talking or texting, you will do so immediately.
19. What happens online impacts your life offline. Colleges and future employers can and will search your name, and the Internet never forgets. Slow down and think before posting.
