____________________ HEALTH HAZARD DATA _______________________

Acute Effects:
Harmful if inhaled or swallowed.
May be harmful if absorbed through the skin.
Material is extremely destructive to tissue of the mucous membranes and upper respiratory
tract, eyes and skin.
Inhalation may result in spasm, inflammation and edema of the larynx and bronchi, chemical
pneumonitis and pulmonary edema.

Prolonged Contact Can Cause:
Severe irritation or burns.
Exposure to vapor, even in low concentrations, can cause lacrimation, conjunctivitis and
corneal edema when vapor is absorbed into the tissue of the eye. The corneal edema may
give rise to a perception of a “halo”, “blue haze”, or “fog” around lights. This effect is
usually reversible although it may last a couple of days.

First Aid:
In case of contact, immediately flush eyes or skin with copious amounts of water for at
least 15 minutes while removing contaminated clothing and shoes.
Assure adequate flushing of the eyes by separating the eyelids with fingers.
If inhaled, remove to fresh air, if not breathing give artificial respiration. If breathing is
difficult, give oxygen.
If swallowed, wash out the mouth with water provided person is conscious. Call a physician.
Wash contaminated clothing before reuse.
**In all cases, contact a physician immediately.**

- Molecular formula: C₆H₁₆N₂

____________________ FIRE AND EXPLOSION HAZARD DATA _______________________

Extinguishing Media:
Carbon dioxide, dry chemical powder or appropriate foam.
Water may be effective for cooling, but may not effect extinguishment.

Special Firefighting Procedures:
Wear self-contained breathing apparatus and protective clothing to prevent contact with skin and eyes. Flammable.

Unusual Fire and Explosions Hazards:
- Vapor may travel considerable distance to source of ignition and flashback.
- Container explosion may occur under fire conditions.
- Emits toxic fumes under fire conditions.
- Forms explosive mixtures in air.

---

**REACTIVITY DATA**

Incompatibilities:
- Acids.
- Acid chlorides.
- Acid anhydrides.
- Strong oxidizing agents.
- Carbon dioxide.
- Copper and its alloys.

Hazardous Combustion or Decomposition Products:
- Thermal decomposition may produce carbon monoxide, carbon dioxide, and nitrogen oxides.

Stability:
- Stable.

Hazardous polymerization
- Will not occur.

---

**SPILL OR LEAK PROCEDURES**

Steps to be taken if Material is Released or Spilled:
- Evacuate area.
- Shut off all sources of ignition.
- Wear self-contained breathing apparatus, rubber boots and heavy rubber gloves.
- Cover with dry-lime, sand or soda ash.
- Place in covered containers using non-sparking tools and transport outdoors.
- Ventilate area and wash spill site after material pickup is complete.

Waste Disposal Method:
- Burn in a chemical incinerator equipped with an afterburner and scrubber but exert extra care in igniting as this material is highly flammable.
- Observe all Federal, State and local environmental regulations.

---

**PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE**

Label Precautionary Statements
- Flammable (USA).
- Highly flammable (EU).
- Corrosive.
- Causes burns.
- Harmful by inhalation and if swallowed.
- Keep away from sources of ignition - no smoking.
- In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.
- Wear suitable protective clothing, gloves and eye/face protection.
- In case of accident or if you feel unwell, seek medical advice immediately (show the label where possible).
Exposure controls/ personal protection:
  Wear appropriate NIOSH/MSHA-approved respirator, chemical-resistant gloves, safety
goggles, and other protective clothing.
Safety shower and eye bath.
Use only in a chemical fume hood.
Do not breath vapor.
Avoid contact with eyes, skin and clothing.
Avoid prolonged or repeated exposure.
Wash thoroughly after handling.
Keep tightly closed.
Keep away from heat, sparks, and open flame.
