

Outlook Setting for prevention on Spammers Add in for Report Messages for Microsoft Outlook

Windows Only

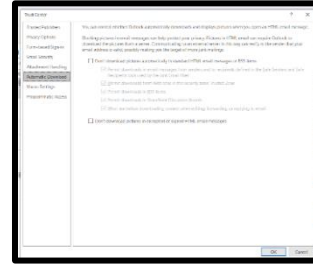

From the **File** tab on your **Outlook application**, Under the General menu to the left, tap on **Options**, and then tap on the **Trust Center**.

Under the **Microsoft Outlook Trust Center**, tap on Trust Center Settings.

Uncheck the box “**Don’t download pictures automatically in Html e-mail messages**” and **Uncheck** the box “**Don’t download pictures in encrypted or signed Html email messages**”.

Tap on the **OK** button and the menu will **close**. The graphics which are sent by ordinary people and authentic companies are generally **pasted in the email** and **will show up**.

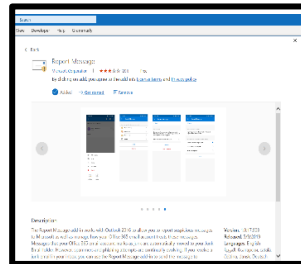

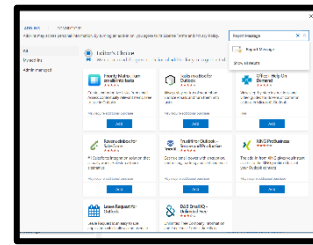

Mac & Windows Outlook

From the **Home** tab of the Outlook application, on the far right tap on **Get ADD INS**, an **ADD IN** menu will appear.

In the white open box type: **Report Message App**

The Report Message App will appear, tap on it and with the description of what the report message can do for a **Phishing** free account!

The **report message** icon will appear under the **Home** tab, on the right side of the menu. Upon selecting a message in question. You have a couple options, if you select on the **options gear icon**, when you submit the report, all information goes to **Microsoft** and helps reduce the **unwanted e-mail**.
