

# Sigmoidectomy

#1. **Resection** (this is what we take out)

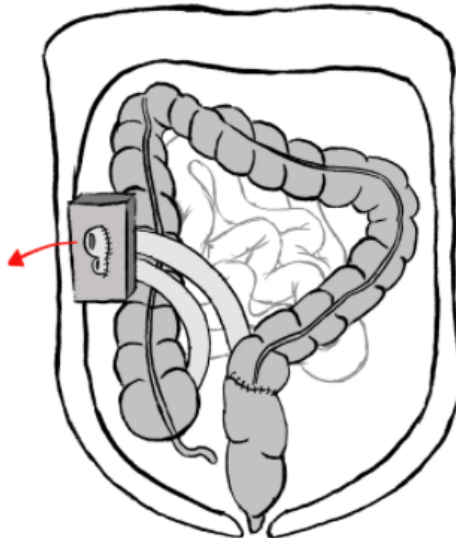

#2. **Reconstruction** (this is how we re-connect you)

Plan A

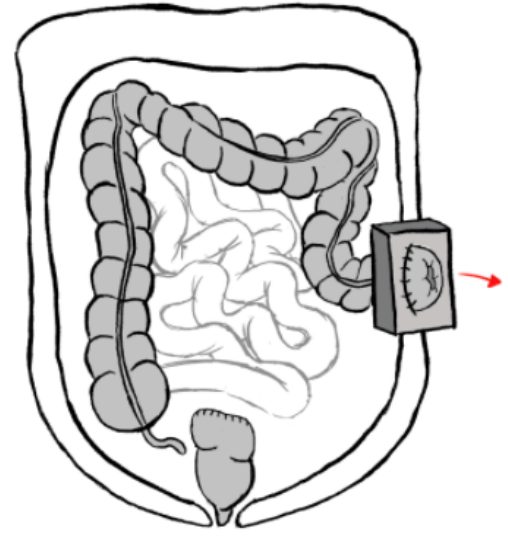

**Primary anastomosis**  
(we put you together)

Plan B

**Primary + proximal diversion**  
(we put you together but protect the connection with an ileostomy)

Plan C

**No anastomosis**  
(we do not put you together and make a colostomy)
