CaRES is a training grant that pays medical students, veterinary medicine students, dental students, pharmacy students, and graduate public health students, to do short summer cancer research projects at UAB or at HudsonAlpha Institute for Biotechnology (in Huntsville). Because CaRES is federally funded by the National Cancer Institute, only American citizens and permanent residents of the U.S. are eligible.

$500/week for 8-12 weeks, May 4 – August 28, 2020

In February and March 2020, UAB O’Neal Comprehensive Cancer Center faculty members will post their proposed Summer 2020 CaRES project descriptions on our website. Read each project description and schedule interviews for any and all projects for which you feel qualified. If you are selected by a faculty preceptor to do his or her CaRES project, we will post your name on our website as one of our 40 CaRES students.

Students are selected in February and March for projects to be done in the summer. Most internship positions are filled by early March.

Questions? Please contact CaRES Program Director Dr. Peter Smith prsmith@uab.edu (UAB School of Medicine) or CaRES Program Director Dr. John Waterbor h2obor@uab.edu (UAB School of Public Health).
