MASTER OF SCIENCE IN HEALTH PROMOTION

PROGRAM DESCRIPTION
The Master of Science (MS) in Health Promotion prepares graduates to work as health educators, research project managers, public health evaluators and health coaches in settings including corporate wellness, academic institutions, local and state health departments and health-related, nonprofit organizations. Eligible graduates can take the Certified Health Education Specialist (CHES) exam. This program can be completed full or part time.

PROGRAM OF STUDY
The program requires 30 credit hours of coursework (18 required credits, 12 elective credits) at the 600 and 800 level. Students take a comprehensive examination after the third semester. A three-credit internship or research project is required.

PROGRAM PREREQUISITES AND APPLICATION
Prerequisites include completion of an undergraduate psychology, Sociology, and Statistics course, as well as three topical health-related courses, and one Health Promotion or Community Health Programming course.

GRADUATE ASSISTANTSHIPS
Graduate assistantships may be offered to competitive full-time students. Students receive a 9-month stipend of $21,000 and tuition waiver.
