

Conducting Labs for Non-Science Majors

Gokce Cereli, Sudhaker Chhabra
and Erna Van Niekerk

Preparing for the lab

- Knowing the course material
 - Doing the experiments yourself
 - Knowing the apparatus
- 

Staying organized and keeping a schedule

- Policies
 - Writing Lab Reports
 - How students will be doing the lab
- 

How to conduct Labs

- Paying attention to Your Attitude
- Describing the Experiment
- Demonstrating the experiment to the students
- Being involved while students are doing the experiment
- Showing that you are there to help
- Summarizing the material that was learnt that day.
