

This course has been approved to fulfill the second writing requirement for **ANS, PVAB, and FS** majors.

BIOMEDICAL COMMUNICATION

ANFS 450/650

3 CREDITS

PREREQUISITE:

ENGL 110 or equivalent

ALL EXPERIENCE LEVELS WELCOME:

Open to undergraduate and graduate students. Course discussions and activities will encourage personal growth from any experience and comfort level in written and oral communications.

- **Active learning experiences** develop communication skills for research, publication, or careers in biomedical fields.
- **Flexible curriculum** including a term project that is customized to student's interests and talents.

- **Frequent instructor and peer feedback-** Receive (and give) constructive advice regularly to foster personal development of communication skills throughout the semester.

Biomedical Communication- Spring 2019-

Blended lectures and active learning experiences demonstrate methodology, modes, and ethical standards fundamental to written, oral, and visual communications in the biomedical sciences. Topics include: scientific method and reasoning, hypothesis development, adaptation for audience, communication format and voice, source citation, and peer review.

Tues./Thurs. from 12:30-1:45, Townsend Hall 009
