Please share with your students

The Delaware Rehabilitation Institute (DRI) at the University of Delaware is seeking four highly qualified undergraduate students for a 10-week, paid internship during summer, 2019 in the areas of rehabilitation research.

DRI promotes high-quality interdisciplinary research within a scholarly environment that enjoins learning, discovery and community in rehabilitation practices.

Interns will participate in UD’s Summer Scholars Program and will be paired with a rehabilitation researcher at either the STAR or main campus.

Applicants should show strong interest in rehabilitation and have a foundation in experimental design, data analysis and quantitatitive analysis. Students from any relevant major are welcome to apply, but it is anticipated that most applicants will be sophomores or juniors and have majors in fields such as biomedical engineering, kinesiology, mechanical engineering, biology or psychology. Preference is given to UD undergraduates, but undergraduates at other institutions may apply. Students receive $4,000 for participating in 10-weeks of full-time summer research.

To apply to be a DRI Summer Scholar, please send resume and cover letter to Marlo Goss at mgoss@udel.edu. Applications are due by March 1, 2019.
