# Re-Imagining Polymer Chemistry for the Circular Economy

Virtual Webinar  
Monday, May 24<sup>th</sup>, 2021  
12:00-1:00 PM ET

[Register Here](#)

## Brett Helms, PhD

Career Staff Scientist  
Lawrence Berkeley National Lab,  
The Molecular Foundry

Dr. Helms' research program is devoted to understanding adaptive transport phenomena in mesoscale systems assembled from organic, polymeric and nanocrystalline components. Enhanced capabilities relevant to energy, sustainability, water, and food quality are enabled by unique approaches to the modular design of their architectures and interfaces.
