I. GENERAL POLICY STATEMENT

In the Department of Physics and Astronomy, to guarantee a recommendation for promotion it is not sufficient for the candidate to meet the minimally acceptable performance standards in the three areas of research, teaching, and service. A positive recommendation for tenure-track faculty requires that the candidate demonstrate excellence in research and high quality performance in the other areas. A positive recommendation for continuing-track faculty requires that the candidate demonstrate excellence in the primary contracted area of responsibility and high quality performance in other areas presented in their workload. The following represents an elaboration upon the University’s Personnel Policies for Faculty regarding Promotion & Tenure (candidates should consult the Faculty Handbook, at http://www.facultyhandbook.udel.edu/).

III. PROCEDURES

A. Candidate's Responsibilities

1. A faculty member has the right to apply for promotion at any time (subject to the provisions pertaining to promotion and tenure described in Section 4 of the Faculty Handbook) and he/she has the exclusive right to advance or withdraw the dossier from the promotion process. However, tenure-track faculty in their terminal year may not apply for promotion.

2. According to University guidelines, a candidate for promotion must notify the Department Chair in writing of intent to apply for promotion by April 30 of the year before a decision at the University level would be rendered. Whenever possible, the candidate should notify the Department Chair earlier, with a target date of March 15.

3. No later than May 1, the candidate shall submit to the Chair of the Promotion and Tenure sub-Committee (PTsC) a roster of external evaluators.

4. No later than June 1, the candidate shall submit to the Chair of the PTsC a copy of the candidate's curriculum vitae, a list of publications, and any additional material to be provided to the external evaluators.

5. The candidate shall submit his/her dossier to the Chair of the Department no later than the following September 1. The PTsC may refuse to consider promotions of candidates who do not submit a dossier in a timely manner.

6. The dossier is the basis for decisions on promotion and recommendations for tenure. It is the responsibility of the candidate to prepare an organized and cogent dossier, representing the case for promotion as well as possible. The candidate is encouraged to consult with the Department Chair and members of the faculty concerning the content and preparation of this dossier. Candidates are required to report their assigned workload as part of their dossier so that all reviewers—including external reviewers—have a clear sense of their workload in the various areas of their effort and can judge their achievements fairly.
The dossier should be organized as follows:

1. Preliminary Material
   a. Table of contents
   b. Application-for-promotion form
   c. A copy of the Department's document on promotion-and-tenure procedures and criteria
   d. A detailed curriculum vitae
   e. Recommendations of various administrative authorities
      i. The Departmental PTsC's recommendation
      ii. The Chair's recommendation
      iii. The College committee's recommendation
      iv. The Dean's recommendation.
      v. The University committee's recommendation
   f. Any materials relating to appeals (optional)
   g. Copies of the letters of evaluation from external evaluators and supporting material (see below).
   h. The candidate's statement

2. Evidentiary materials

The nature of supporting materials is largely the choice and the responsibility of the candidate. The list below is a suggested set of evidentiary material; none is specifically required, but requests may be made by the various committees or administrators for information not included. Examples of useful information that could be included are:

a. Research

   1. A copy of each publication in the relevant time period
   2. A copy of each manuscript "in press" or "submitted for publication" during the relevant time period
   3. Copies of monographs produced during the relevant time period
   4. Copies of current and pending research grant proposals
   5. Copies of articles citing the candidate's work that may discuss its importance
   6. A list of co-workers and the current status of each
   7. A list of collaborators and discussion of contributions of each to the candidate's research program
   8. Reviews of papers and/or proposals demonstrating the candidate's standing in the scientific community
   9. A list of talks, lectures or seminars presented at other institutions or at conferences
   10. Mentoring and supervision of postdoctoral researchers and undergraduate and graduate students

b. Teaching

   1. Information on the initiation of courses and/or substantial revision of existing ones
   2. Evidence of interaction, stimulation and motivation of students (testimonials, written comments from persons outside the Department, etc.)
   3. Academic advisement of undergraduate and graduate students
   4. Mentoring and supervision of undergraduate and graduate students in research and teaching activities or programs
   5. Sample syllabi, examinations, and assignments.
6. Instructional and curriculum improvement proposals and grants
7. Textbooks authored
8. Student course evaluations for courses taught, properly tabulated and summarized, with a discussion of the procedures used in obtaining the evaluations
9. Summaries of written comments of students submitted with teaching evaluations
10. In-person classroom observation and evaluation by University faculty of courses taught by the candidate
11. Self-evaluation
12. Student test scores on standardized examinations
13. Any further information that may demonstrate the teaching effectiveness of the candidate

c. Service

1. Summary of the candidate's activities on Departmental, College and University committees, and College or University Senate positions
2. Summary of the candidate's activities in professional organizations
3. Information concerning the candidate's organization of symposia or meetings relating to his/her area of expertise
4. Evidence of the candidate's active participation in the community of science through peer review of books, articles, research proposals, etc. and service on review panels of government agencies and private foundations
5. Summary of the candidate’s public outreach activities
6. Summary of the candidate's consulting activities

B. Department’s Responsibilities

1. For Promotion to Associate Professor with tenure or tenure at rank of Associate Professor
   a. Composition of the Promotion-and-Tenure Committee (PTC)

      Cases involving the promotion to Associate Professor and/or tenure are considered by a subcommittee comprised of all tenured associate and full professors of the Department, except the Chair of the Department. This subcommittee is referred to as the Promotion and Tenure sub-Committee (PTsC). With the consent of a majority of the members of the PTsC, the Chair of the PTC appoints a tenured professor (possibly himself or herself) to handle all further details of the PTsC's evaluation process of the candidate, especially the solicitation of letters of reference and the preparation of a written summary of the committee's deliberations, recommendations and decisions. This person is called the Chair of the PTsC. A PTsC Chair is appointed for each candidate.

   b. Notification

      The Chair of the Department shall notify the Chair of the PTC of receipt of the candidate's letter of intent promptly.

   c. The First Meeting of the PTC

      Within three weeks of the receipt of the candidate’s letter of intent, the Chair of the Department will convene a meeting of the PTC. The purpose of this meeting is to select a Chair for each candidate’s PTsC.
d. Written Comments by External Evaluators

The PTsC shall seek the advice of external scientists on the evidence for promotion, particularly about (but not restricted to) the candidate's contributions to research.

The Chair of the PTsC shall request that the candidate and the members of the PTsC submit lists of potential evaluators within some reasonably short time after the meetings discussed above. The Chair of the PTsC will meet with the candidate and provide the candidate with names of all potential evaluators. The candidate shall have the opportunity to comment on any and all of these potential evaluators. The candidate may, for written, cogent reasons, request the Chair of the PTsC to exclude certain individuals as external evaluators.

With the advice of the PTsC and the Chair of the Department, the Chair of the PTsC will choose a minimum of six external evaluators from these lists, so that at least three (3) evaluators are selected from the list submitted by the candidate and three (3) are from the list submitted by the PTsC. [If, in the course of contacting the evaluators, one or more should decline to participate, the Chair of the PTsC shall choose others from the lists, bearing in mind that there should be a balance between evaluators selected from the two lists.] The final list of names will not be revealed to the candidate to preserve confidentiality.

The Chair of the PTsC shall write to evaluators requesting advice in a timely manner. The letter should be accompanied by a copy of the candidate's curriculum vitae (CV), a list of publications, a research statement, the assigned workload, and copies of at least five representative publications provided by the candidate. The letter should request the external evaluator to: analyze and critically evaluate the candidate's body of work and accomplishments, comment on the candidate's potential for future development, and compare this candidate to others in the field who are at a similar stage in their career. The Chair of the PTsC may elect to contact evaluators by telephone or electronic mail before sending materials, to determine the individual's willingness to participate in the evaluation.

The letters from evaluators are to be added to the dossier by the Chair of the PTsC, and are to be accompanied by a copy of the letter requesting advice and a brief biographical statement (or CV) summarizing the external evaluator's credentials and his/her relationship to the candidate. All letters received within the time limit set by the Chair of the PTsC in the letter must be included in the dossier. All letters of evaluation are to be considered confidential. The Chair of the PTsC shall include a separate document in the external letters section of the dossier, identifying the specific external evaluators who were nominated by the candidate versus those nominated by the Department and the criteria used to request letters from specific evaluators.

Other letters of evaluation not solicited by the Chair of the PTsC may be included in the dossier, but they must be distinguished from those specifically requested. It is the responsibility of the Chair of the PTsC to notify the members of the PTsC of the arrival of letters and to make them available to the members for consideration.

e. Committee Meetings
The Chair of the PTsC, after having received a minimum of six (6) letters from external evaluators, or at the latest by September 21, will call a meeting of the PTsC to discuss the case of promotion and/or tenure of the candidate. The PTsC can consult with the Department Chair who listens to the PTsC’s discussions at this meeting, but who will not be present during the sub-Committee's final deliberations and vote.

f. Written Report of the Recommendation of the PTC

The Chair of the PTsC with the advice of its members, shall prepare a written summary of the subcommittee's deliberations, recommendations and decisions. The summary shall describe the PTsC’s composition, the results of the vote, and the evidence from comments in the meeting for the vote. This summary requires approval by the PTsC. When they arise, signed separate opinions by members of the PTsC may be forwarded as appendices to the main report of the PTsC, provided they are received by the Chair of the PTsC in a timely manner.

This statement (and any appendices) will be transmitted in writing to the Department Chair and the candidate no later than October 1, and shall be inserted into the candidate's dossier. [To maintain confidentiality, the copy to the candidate shall delete portions of the statement that may identify external evaluators, either by name or by inference.]

g. Recommendation of the Chair of the Department

The Chair of the Department shall review the candidate's dossier, the report of the PTsC and the Department of Physics and Astronomy's "Promotion and Tenure Procedures and Criteria" document, and make a written recommendation supporting or failing to support the promotion of the candidate. This recommendation is transmitted in full and in writing to the candidate and is also inserted into the candidate's dossier. This must be completed before October 7.

h. Forwarding Procedures

If the PTsC and the Chair of the Department agree in recommending promotion and tenure, or if either or both recommend against promotion but the candidate chooses to continue by not explicitly withdrawing the application, then the application, with the recommendations included, goes forward to the College Promotion and Tenure Committee and to the Dean. Under current University guidelines, these documents are to be submitted by October 15.

i. Appeals Procedure

If the candidate wishes to appeal either the recommendation decision of the PTsC or of the Department Chair or wishes to suggest amendments to the letters of recommendation, the candidate may request, in writing, reconsideration by the PTsC and/or the Department Chair within five (5) business days after he/she has received written notification of the PTsC and/or the Department Chair's recommendation. This written request for reconsideration becomes part of the record and should be included in the dossier.

In the case of any request for reconsideration, the candidate must present in writing the arguments for reconsideration and provide at that time to the PTsC and/or the Chair of the Department any additional supporting material for reconsideration.
If the candidate requests reconsideration by the PTsC, the Chair of the PTsC must convene a meeting of the PTsC to consider the candidate's written arguments. At the conclusion of this meeting, a final vote shall be taken by secret ballot and a final recommendation will be made. The Chair of the Department shall not be present at any reconsideration meeting of the PTsC, nor participate in its vote, nor participate in the writing of any amendment to its recommendation.

An appeal to the Chair in writing must be considered by the Chair promptly. Any written response from the Chair shall be included in the dossier and the members of the PTsC shall be notified promptly.

A copy of any changes in the decisions and/or the letters of recommendation of the PTsC and/or the Department Chair shall be transmitted in writing to the candidate and inserted in the dossier.

j. Schedule Summary

The time schedule for the promotion process is:

By April 30    The candidate notifies the Chair of the Department of the intention to apply for promotion and/or tenure. Notification by March 15 is preferred whenever possible. The Chair of the PTC identifies at least one tenured professor who is able and willing to be the Chair of the candidate’s Promotion and Tenure sub-Committee (PTsC). A meeting of the PTC is convened to discuss and select the Chair of the PTsC.

By May 1      The candidate provides the subcommittee Chair a roster of at least six possible external evaluators.

By June 1    Having followed the procedures described above, the Chair of the PTsC shall choose the external evaluators.

By June 1     The candidate provides a *curriculum vitae* and material for the external evaluators.

By September 1 The candidate submits his/her dossier to the Chair of the Department.

By October 1   The candidate’s PTsC submits a letter of recommendation, including the numerical results of the vote, to the Department Chair, with a copy to the candidate.

By October 7    The Department Chair submits a letter of recommendation, with a copy to the candidate, and notifies the candidate’s PTsC of the decision.

By October 15  The Chair of the Department forwards the candidate's dossier, including the recommendation of the PTsC and the Chair's recommendation, to the College Committee on Promotions and Tenure and to the Dean.

By December 1  The College Committee submits a letter of recommendation to the Dean.

By January 2    The Dean forwards his/her recommendation and the candidate's dossier to the University Committee on Promotions and Tenure.
By February 15 The University Committee on Promotions and Tenure forwards its recommendations and the candidate's dossier to the Provost.

By March 15 The Provost forwards his/her recommendation to the President, along with the candidate's dossier.

2. For Promotion to Professor on the tenure track.

The Promotions Committee (PC) for an applicant on the tenure-track consists of all tenured full professors in the Department of Physics and Astronomy except the Chair of the Department. All the procedures of this committee are the same as those described previously in this document, except PC should be substituted for PTsC throughout.

3. For Recommendation for Tenure without Promotion

If a person has been hired at the rank of associate professor or full professor without tenure, then the procedures for evaluating that individual for tenure shall be identical with the procedures used when promotion with tenure is being considered to either associate professor or full professor, respectively. It is expected that a person in one of these categories would not be considered for tenure until he/she has served at least one year in rank.

4. For Promotion to Associate Professor on the Continuing Track.

The Promotions Committee (PC) for an applicant on the continuing-track consists of all tenure-track and continuing-track associate and full professors in the Department of Physics and Astronomy except the Chair of the Department. All the procedures of this committee are the same as those described previously in this document, except PC should be substituted for PTsC throughout. External evaluators shall be asked to evaluate the primary contracted area of responsibility. When the predominant role is teaching or service, appropriate external evaluations can be performed locally, but should be external to the academic unit.

5. For Promotion to Professor on the Continuing Track.

The Promotions Committee (PC) for an applicant on the continuing-track consists of all tenure-track and continuing-track full professors in the Department of Physics and Astronomy except the Chair of the Department. All the procedures of this committee are the same as those described previously in this document, except PC should be substituted for PTsC throughout. External evaluators shall be asked to evaluate the primary contracted area of responsibility. When the predominant role is teaching or service, appropriate external evaluations can be performed locally, but should be external to the academic unit.
III. CRITERIA FOR TENURE-TRACK FACULTY

A. For Promotion to Associate Professor with tenure or tenure at rank of Associate Professor

Inasmuch as promotion within the University to this rank generally carries tenure--a binding commitment on the part of the University--the qualifications must be rigorous. At a minimum, the individual should show excellent achievement in research and high quality performance in the other areas. Furthermore, there should be unmistakable evidence that the individual has progressed and will continue to do so. A mere satisfactory or adequate record as an assistant professor is not sufficient; there must be very clear indication, based on hard evidence and outside peer evaluations, that the candidate has in fact attained high levels of accomplishment.

The Criteria are as follows:

1. Research

   The candidate must have established a vigorous research program of significance to Physics or Astronomy. Major emphasis will be on research carried out and completed at the University of Delaware which demonstrates the ability to organize and sustain an independent, viable research program. The research program may be related to previous doctoral or postdoctoral research, but must show an independent approach. It must be shown that the candidate has contributed in a vital and innovative way to any collaborative research.

   Publication of the results of the research is expected. Review articles and monographs will be considered. The candidate’s work should be presented in lectures and papers at institutions and meetings when feasible.

   Both the amount and quality of research will be considered. Publication in refereed journals is an important indication of the quality of research. It is expected that the candidate will have obtained external funding to support his/her research program.

   Other evidence of the quality of the research may include the following: invited papers and lectures, awards, reputation in his/her field among peers.

   A potential for continued growth of the research program is expected.

2. Teaching

   A strong performance in teaching is expected of each candidate. This includes both course content and an ability to communicate as judged by the faculty (classroom visitations, syllabus review, etc.) and by students (acceptable course and teacher evaluations) and written or oral opinions of former students.

   The candidate should have had an opportunity for both graduate and undergraduate teaching and should be effective at both.

   It is expected that the candidate’s research program involves students or postdoctoral researchers.

3. Service

   The Department expects service on Department, College, or University committees, including Ph.D. research committees and College or University Senate positions. University-related community service and outreach activities will also be considered. The Department will expect involvement in administrative and/or committee duties on the part of assistant professors who should have had an opportunity to participate fully in determining and meeting the goals of the Department.
Service may be indicated by participating in the activities of national professional societies, organizing symposia or meetings, reviewing research proposals, papers, books, etc. Professional activities with high external visibility are valued.
B. For Promotion to Professor

This rank is reserved for individuals who have established reputations in their fields and whose contributions to their profession and the University's mission are excellent. There should be unmistakable evidence of significant development and achievement in research, teaching and service since the last promotion. Once again, the candidate's claim to have met these requirements must be thoroughly and completely documented by outside peer evaluations and other materials.

The Criteria are as follows:

1. Research

The candidate must have established and maintained an outstanding research program of significance to Physics or Astronomy.

Publication in refereed journals is an important indication of the quality of research. Review articles, and monographs will also be included in the evaluation and the candidate's work should have been presented in lectures and papers at institutions and meetings.

It is expected that the candidate will have demonstrated the ability to maintain external funding to support his/her research program.

Other evidence of the quality of the research may include the following: Invited papers and lectures, awards, and the use which the candidate may have made of a sabbatical leave or leave of absence to enhance his/her research program.

2. Teaching

A strong performance in teaching at both the graduate and undergraduate levels is expected of each candidate. This includes both course content and an ability to communicate as judged by the faculty (classroom visitations, syllabus review, etc.) and by students (acceptable course and teacher evaluations and written opinions of former students). Other evidence for the quality of teaching may include the following: the receipt of teaching awards or teaching sabbaticals; improvement-of-instruction grants; course initiation and major revision of existing courses; successful innovations in teaching methods; and effective counseling and advising of students.

It is expected that the candidate’s research program involves students or postdoctoral researchers.

3. Service

The Department expects significant high quality service on Department, College, or University committees, including Ph.D. research committees and College or University Senate positions. University-related community service will also be considered.

Professional development should be indicated by participating in the activities of professional societies, organizing symposia or meetings, consulting, reviewing research proposals, papers or books, etc. Professional activities with high external visibility are valued.

C. Special Considerations

The preceding does not preclude the possibility that, in the future, an assistant professor or an associate professor on the tenure track may have duties differing substantially from the above. If such is the case, there should be a clear written understanding on the part of all parties of what is expected and what criteria will be used in evaluation for promotion or contract renewal.
IV. CRITERIA FOR CONTINUING-TRACK FACULTY

A. For Promotion to Associate Professor on the Continuing Track.

For continuing-track faculty seeking promotion to associate professor, the individual must show excellence in the primary contracted area of responsibility. There should be unmistakable evidence that the individual has progressed in the primary contracted area of responsibility during the time as an assistant professor, and that the applicant will, continue to make significant contributions. A merely satisfactory or adequate record in the primary contracted area of responsibility as an assistant professor is not sufficient to warrant promotion. There must be clear indications, based on convincing evidence and external evaluations, that the candidate has attained high levels of accomplishment in the primary contracted area of responsibility, and has also significantly contributed to the other area(s).

For a candidate whose primary contracted area of responsibility is teaching, the criteria are as follows:

1. Teaching

   The candidate must demonstrate excellent performance in teaching. This includes both course content and an ability to communicate as judged by the faculty (classroom visitations, syllabus review, etc.), external evaluators, and students (acceptable course and teacher evaluations and written opinions of former students). Other evidence for the quality of teaching may include the following: the receipt of teaching awards or teaching sabbaticals; improvement-of-instruction grants; course initiation and major revision of existing courses; successful innovations in teaching methods; and effective counseling and advising of students.

2. Service

   The Department expects service on Department, College, or University committees. University-related community service and outreach activities will also be considered. The Department will expect involvement in administrative and/or committee duties on the part of assistant professors who should have had an opportunity to participate fully in determining and meeting the goals of the Department.

   Service may be indicated by participating in the activities of national professional societies, organizing symposia or meetings, reviewing research proposals, papers, books, etc. Professional activities with high external visibility are valued.

3. Research and Scholarship

   All scholarly work conducted at rank will be considered. High quality is expected, taking into account the assigned workload. Such scholarly work might be in any of the following categories: Original research related to physics or astronomy, scholarship related to pedagogy and education, and scholarship related to disseminating scientific knowledge such as popular press publications. Such work may be collaborative but the contribution of the candidate must be described.
B. For Promotion to Professor on the Continuing Track

The rank of professor is reserved for truly outstanding individuals who demonstrate a reputation in the primary contracted area of responsibility, and significant, high-level contributions in the other area(s) since the last promotion. Demonstration of reputation generally requires strong evidence of significant levels of scholarship in the primary contracted area of responsibility. The candidate’s claim to have met these requirements must be thoroughly and completely demonstrated by external evaluations and convincing evidence.

For a candidate whose primary contracted area of responsibility is teaching, the criteria are as follows:

1. Teaching
   The candidate must demonstrate excellent performance in teaching. This includes both course content and an ability to communicate as judged by the faculty (classroom visitations, syllabus review, etc.), external evaluators, and students (acceptable course and teacher evaluations and written opinions of former students). Other evidence for the quality of teaching may include the following: the receipt of teaching awards or teaching sabbaticals; improvement-of-instruction grants; course initiation and major revision of existing courses; successful innovations in teaching methods; and effective counseling and advising of students.

2. Service
   The Department expects service on Department, College, or University committees. University-related community service and outreach activities will also be considered. The Department will expect involvement in administrative and/or committee duties on the part of assistant professors who should have had an opportunity to participate fully in determining and meeting the goals of the Department.

   Service may be indicated by participating in the activities of national professional societies, organizing symposia or meetings, reviewing research proposals, papers, books, etc. Professional activities with high external visibility are valued

3. Research and Scholarship

   All scholarly work conducted at rank will be will considered. High quality is expected, taking into account the assigned workload. Such scholarly work might be in any of the following categories: Original research related to physics or astronomy, scholarship related to pedagogy and education, and scholarship related to disseminating scientific knowledge such as popular press publications. Such work may be collaborative but the contribution of the candidate must be described. Materials that are public and extend the disciplinary pedagogical base are valued. Quality may be reflected in awards received, invited papers and presentations, publications and materials with colleagues, financial support from internal and external grants, and other activities and materials demonstrating the candidate’s standing in the field. Evidentiary materials should be public, available for critical review.
C. Special Considerations

The preceding does not preclude the possibility that, in the future, an assistant professor or an associate professor on the continuing-track may have duties differing substantially from the above, such as primary assigned workload in service or research. If such is the case, there should be a clear written understanding on the part of all parties of what is expected and what criteria will be used in evaluation for promotion or contract renewal.
