1. **SAFETY**
Complete streets are designed to be pedestrian, bicycle, and transit friendly through dedicated lanes, lighting, and cross walks.

2. **ECONOMIC VITALITY**
Walkability is improved with complete streets which promotes shopping and supports businesses.

3. **INCLUSIVE MOBILITY**
The elderly, children, and people with disabilities are all better served with complete street design that allows them to safely get around.

4. **ENVIRONMENTAL HEALTH**
Air quality will improve as people chose to walk or bike rather than drive for short trips.

5. **HEALTH**
Walking and riding a bike is a great way to exercise! Complete streets provide improved access for pedestrian activities.
