Social Media: Bear in Newark

Black Bear Sighting
On Thursday Nov 18th there was a black bear sighting in the area of the woods behind Christoval Commons on Laird Campus. Please be aware of this area and remain vigilant.

Bear Safety Tips
1. Remember that you are no match for a bear. Do not confront it.
2. Make sure your presence is noticeable by making noise, shouting, duplicating your sounds or making others aware.
3. Avoid campers and early morning. Bears are most active in the early morning.
4. Monitor your food in your car. Bears scent is good, so bear food is a great attraction.
5. To avoid the bear keep a minimum of 250 feet. Secure your food, garbage, and anything the bear might be interested in.
6. If you find yourself in the bear's comfort zone, you are in a dangerous situation. Be calm, stay away, and never attempt to approach or feed the bear.
7. If a bear stands up or bares its teeth, it may be trying to get a better view or hear you. Stay where you are.
8. If a bear seems threatened, do not run. Bears can run very fast, which could trigger a bear chase.
9. Use bear deodorant and carry bear spray. It is illegal to carry bear spray in Delaware.
10. If you are in a bear country, keep a flashlight, a cell phone, and a whistle.
11. If a bear is following you, do not turn around. Try to get away.
12. If you are surrounded by bears, stay calm and slowly back away.
13. Do not throw objects at a bear. Bears are attracted to movement.
14. If a bear is in your area, keep your distance.

Remember if you spot a bear do not run from it! If it stands on its hind legs this is not a threat...

Remember to remain calm if you encounter a bear. If you see a bear contact Fish and Wildlife, please call (302) 594-2200 or (800) 282-6677. If you are in a bear country area, be aware of your surroundings. If you spot a bear call the Bear Hotline at 1008-523-3336 or if in immediate danger dial 911.
