Lone Pine Capital LLC (“Lone Pine”) is a private investment management company in operation for over 20 years, investing long and short in global, multi-industry, public equities, and private investments. Lone Pine currently manages $30+ billion in assets across its various strategies. Lone Pine is based in Greenwich, Connecticut, with research offices in San Francisco and New York City. The firm employs a team comprised of approximately 100 employees.

**Position Summary:**

The Data & Risk Analytics team plays a key role in the fundamental investment strategy of the firm, collaborating with Analysts, Portfolio Managers, Traders, and the Compliance team to deliver data-driven insights that augment the investment process and portfolio construction. The summer intern will help develop and maintain end-to-end data pipelines including dataset ingestion, automation, transformation, modeling, analysis, visualization, and delivery.

This internship assignment will run for approximately six weeks between June and August 2022, with exact dates to be determined.

**Job Responsibilities:**

- Maintain and enhance existing data pipelines as new resources become available and new questions arise
- Extract, transform, and load complex data sets
- Build new data analysis tools and maintain current infrastructure
- Build programs to automate processes and archive legacy data sets across teams
- Provide ad-hoc support to Lone Pine’s Data & Risk Analytics team

**Required Skills and Experience:**

- A current Junior in college pursuing a Degree in Computer Science, Computer Engineering, or related discipline
- Strong programming skills in at least one of SQL, Spark, Python, Scala, Java, or R
- Experience working with large datasets and associated infrastructure
- Experience with AWS, Databricks, and Snowflake a plus (not required)
- Strong analytical and problem-solving skills
- Superior interpersonal and communication skills
- Highly motivated, self-driven, adaptive, solution, and detail-oriented
- Demonstrated ability to work collaboratively with others in a team-oriented environment
- Demonstrated record of professional, academic, and personal achievement
- Commitment to and track record of honesty and integrity in professional settings
