

## IMMUNIZATION DOCUMENTATION

**ALL OF THE FOLLOWING INFORMATION MUST BE COMPLETED AND SIGNED BY YOUR HEALTH CARE PRACTITIONER.  
 THIS FORM MUST BE SUBMITTED BY JULY 25 FOR FALL SEMESTER AND JANUARY 25 FOR SPRING SEMESTER**

**Please include a copy of the FRONT and BACK of your Medical Insurance Card and Prescription Insurance Card.**

**This does not satisfy the required online insurance waiver for full-time students. \*Refer to Alert Paper**

Student Name \_\_\_\_\_  
Last First Middle

Date of Birth \_\_\_\_\_ UD ID # \_\_\_\_\_  
Month Day Year

Country of Birth \_\_\_\_\_ If **not** USA, indicate when you entered this country \_\_\_\_\_  
MM/YYYY

**PARENTAL/GUARDIAN PERMIT (FOR STUDENTS UNDER AGE 18)** I give my permission for medical care and procedures as may be deemed necessary for my student and agree to present information concerning his/her medical condition to other responsible university officials when deemed necessary. I give my permission to bill for any medical care performed.

Signed \_\_\_\_\_ Relationship \_\_\_\_\_

**IF THIS FORM IS NOT COMPLETE, YOU WILL NOT BE PERMITTED TO REGISTER FOR THE NEXT SEMESTER.**

### 1. REQUIRED - ALL STUDENTS BORN AFTER 1956

MMR (Measles, Mumps, Rubella) (Two doses required **after 12 months** of age and at least 28 days apart.)

**MMR Dates** #1     /    /    , #2     /    /     /OR  
M D Y M D Y

Measles Dates     /    /    ,     /    /     /or Antibody Titer Date     /    /     \*  
M D Y M D Y M D Y

Mumps Dates     /    /    ,     /    /     /or Antibody Titer Date     /    /     \*  
M D Y M D Y M D Y

Rubella Dates     /    /    ,     /    /     /or Antibody Titer Date     /    /     \*  
M D Y M D Y M D Y

**\* Must enclose copy of lab report**

### 2. REQUIRED INFORMATION - ALL STUDENTS

#### **2A - TUBERCULOSIS (TB) RISK QUESTIONNAIRE**

1. Have you ever had a positive tuberculosis skin test or blood test in the past? .....  Yes  No
2. To the best of your knowledge have you ever had close contact with anyone who was sick with tuberculosis (TB)? .....  Yes  No
3. Were you born in a country listed below? \* .....  Yes  No
4. Have you traveled or lived for more than one month in any country listed below? \* .....  Yes  No
5. Have you ever had changes on a prior chest x-ray suggesting inactive or past TB disease? .....  Yes  No
6. Do you have a medical condition associated with increased risk of progressing to TB disease if infected, such as diabetes, chronic renal failure, leukemias or lymphomas, low body weight, HIV/AIDS, gastrectomy or intestinal by-pass, chronic malabsorption syndromes, prolonged corticosteroid therapy (e.g. prednisone >15mg/day for > 1 month), other immunosuppressive disorders, or are you an organ transplant recipient? .....  Yes  No
7. Have you been a volunteer, employee or resident in a high-risk congregate setting such as a prison, nursing home, hospital, homeless shelter, residential facility or other health care facility in the past 12 months? .....  Yes  No
8. Do you have a history of illicit drug use? .....  Yes  No

\* Angola, Bangladesh, Brazil, Central African Republic, China, Congo, DPR Korea, DR Congo, Ethiopia, India, Indonesia, Kenya, Lesotho, Liberia, Mozambique, Myanmar, Namibia, Nigeria, Pakistan, Papua New Guinea, Philippines, Russian Federation, Sierra Leone, South Africa, Thailand, Ukraine, UR Tanzania, Viet Nam, Zambia, Zimbabwe

**2B - If you answer NO to all of the above questions, no further action is required. If you answer YES to any of the above questions, you are required to have a Mantoux tuberculin skin test (TST) or TB Blood Test (IGRA), within 6 months prior to beginning classes. Prior BCG does not exempt students from this requirement. If your TST or TB Blood Test is positive please attach chest x-ray results that were completed in the USA. All TB testing must be the same day or 28 days after any live vaccines.**

<p><b>2C - TB SKIN TEST</b> Use Mantoux test only <b>-OR- TB BLOOD TEST</b></p> <div style="border: 1px solid black; padding: 5px; width: fit-content;"> <p>Date Planted:  <u>    </u>/<u>    </u>/<u>    </u>  <small style="margin-left: 100px;">M D Y</small></p> <p>Date Read:  <u>    </u>/<u>    </u>/<u>    </u>  <small style="margin-left: 100px;">M D Y</small></p> </div> <p>Interpretation: Neg. <input type="checkbox"/> Pos. <input type="checkbox"/>  <u>    </u> mm induration                  (If no induration, mark "0")</p> <p>Quantiferon: <input type="checkbox"/> *                  T-Spot: <input type="checkbox"/> *                  Date: <u>    </u>/<u>    </u>/<u>    </u>  <small style="margin-left: 100px;">M D Y</small>                  Result: Neg. <input type="checkbox"/> Pos. <input type="checkbox"/>  <b>*Enclose copy of lab report</b></p>	<p><b>2D - CHEST X-RAY*</b></p> <p>Chest X-Ray Date :  <u>    </u>/<u>    </u>/<u>    </u>  <small style="margin-left: 100px;">M D Y</small></p> <p><input type="checkbox"/> Normal <input type="checkbox"/> Abnormal</p> <p style="text-align: center;"><b>*Enclose copy of USA x-ray report</b></p>	<p><b>2E - MEDICATION TREATMENT FOR TB:</b></p> <p>Drug: _____</p> <p>Dose and Frequency: _____</p> <p>Treatment:                  Start Date <u>    </u>/<u>    </u>/<u>    </u>  <small style="margin-left: 100px;">M D Y</small></p> <p>End Date <u>    </u>/<u>    </u>/<u>    </u>  <small style="margin-left: 100px;">M D Y</small></p>

### 3. REQUIRED VACCINE - ALL STUDENTS

#### MENINGOCOCCAL MENINGITIS VACCINE\*

Menactra® Vaccine Dates #1 \_\_\_/\_\_\_/\_\_\_, #2 \_\_\_/\_\_\_/\_\_\_  
(conjugate) M D Y M D Y

Menveo® Vaccine Dates #1 \_\_\_/\_\_\_/\_\_\_, #2 \_\_\_/\_\_\_/\_\_\_  
(conjugate) M D Y M D Y

Menomune® Vaccine Dates #1 \_\_\_/\_\_\_/\_\_\_, #2 \_\_\_/\_\_\_/\_\_\_  
(polysaccharide) M D Y M D Y

#### CDC Recommendations

All 11 to 12 year olds should be vaccinated with a single dose of quadrivalent (protects against serogroups A, C, W, and Y) meningococcal conjugate vaccine.

Since protection wanes, a booster dose is recommended at age 16 years so adolescents continue to have protection during the ages when they are at highest risk of meningococcal disease.

**University of Delaware students are required to be vaccinated with meningococcal conjugate vaccine. If they received this vaccine before their 16th birthday, they must get a booster dose before going to college for maximum protection.**

#### MENINGOCOCCAL VACCINE INFORMATION

**The Disease:** Meningococcal disease is a serious illness caused by a bacteria. Meningococcal bacteria live in the lining of the nose and throat and can be spread from one person to another by close personal contact. Occasionally, the bacteria enter the bloodstream and cause severe disease. Symptoms of bloodstream infection include fever, chills, rash, low blood pressure and dark purple spots on the arms and legs. Meningitis is an infection of the lining of the brain and spinal cord. Symptoms of meningitis include fever, headache, confusion and stiff neck. Five different types of meningococcal bacteria cause virtually all meningococcal disease: A, B, C, Y and W-135. Every year in the United States approximately 3,000 people are infected with meningococcus and approximately 10%-15% of these people die from the disease. Of those who live, another 11 - 19% have permanent disabilities such as loss of limbs, kidney disease, hearing loss, or they may suffer seizures or strokes. Meningococcal disease can progress very rapidly and can kill an otherwise healthy young person in 48 hours or less. **The Vaccines:** The Menomune® meningitis vaccine first became available in the United States in 1982. It is effective against four of the five different types of meningococcus (A, C, Y and W-135), and if indications still exist a booster dose may be considered within 3 to 5 years. In February 2005, the Center for Disease Control (CDC) recommended a new vaccine for use in the United States to prevent meningococcal disease. This conjugate meningitis vaccine, called Menactra®, protects against the same four types of meningococcal bacteria as the Menomune® vaccine and should provide longer protection. Menactra® should also be better at preventing the disease from spreading from person to person. The newest vaccine approved in February 2010, Menveo®, is also a conjugate vaccine effective against groups A, C, Y and W-135. All three vaccines work well, and protect about 90% of those who receive it. None of these vaccines provide 100% protection nor do they protect against meningococcus type B meningococcal bacteria. Additional Considerations For College Students : All college freshmen, especially students living in dormitories, should consider receiving the meningococcal vaccine. College freshmen living in dormitories are five times more likely to get meningococcal disease than people of the same age who do not attend college. College students who are at higher risk for meningococcal disease because of underlying immune deficiencies or who are traveling to countries where outbreaks or epidemics of meningococcal meningitis often occur, such as the sub-Saharan belt in Africa, should be vaccinated. Individuals who are routinely exposed to meningococcal bacteria in a laboratory setting should also consider getting the vaccine. **Sources:** ACIP (Advisory Committee on Immunization Practices) of the CDC (Center for Disease Control); Vaccines: What You Should Know, Paul A. Offit, M.D., and Louis M. Bell, M.D.

#### RECOMMENDED IMMUNIZATIONS

##### TETANUS-DIPHTHERIA-PERTUSSIS

Completed primary series of tetanus-diphtheria-pertussis immunizations ..... \_\_\_/\_\_\_/\_\_\_
