PAID STUDY
MAGNETIC STIMULATION OF THE BRAIN
VOLUNTEERS NEEDED

The Psychology department is currently looking for participants to study the effects of magnetic stimulation on brain processes related to thinking and movement. The study is being conducted at the University of Delaware by Dr. Philip Gable. The study is non-invasive and involves the delivery of a brief magnetic pulse to specific areas of the brain before a computer task. This technique briefly alters neural activity in a specific part of the brain. This study consists of two sessions total which take approximately 2 hours each and are separated by at least 24 hours. Participants are compensated $12.50 an hour for your participation, with an additional $5 for every 20 minutes if the session where to go longer than 2 hrs.
