What are we studying?
The Control of Balance and Locomotion laboratory at the University of Delaware is seeking participants for a research study on sensory input during balance and walking.

Who can participate?
- Adults aged 18-39
- Must be able to walk unassisted for 9 minutes
- No medical conditions affecting balance or walking patterns

What does the study involve?
- 1 visit to the lab at UD’s STAR Campus
- Walking on a treadmill in a virtual reality cave
- Visual motion to disturb your balance
- Set of clinical tests
