Don't share data with chairs and directors prior to submission
Only 16.7% of Cost Study Administrators give every chair and director their program's data and allow them to validate it prior to submission. An additional 13.9% of the participants only provide the program's data prior to submission if something is specifically wrong with it. An overwhelming majority of the survey participants (69.4%) do not share the data at all prior to submission.

After the Cost Study results are released, 55.6% of Cost Study Administrators provide the results to every chair and director. An additional 25% only provide the results when a chair or director specifically requests them. A small, but noticeable, portion (19.4%) do not share the final results at all with the chairs and directors at their institution.

As we continue to develop the View-Only feature, we encourage you to explore the potential benefits that it may offer you in both the validation and sharing processes. The Delaware Cost Study's unique discipline-level focus makes it a prime tool for guiding the discussion on instructional costs and productivity between Cost Study Administrators, the chairs and directors at their college or university, and other important decision-makers within their administration. The View-Only feature in the web-portal is designed to aid in this conversation by allowing chairs and directors to see the data representing their unit's costs and productivity both before and after the final submission of the data.
