

Creating a Blank Page in a Content Area

Blank Pages allow you to create a page with files, images, text, and other media as a link that presents information immediately and all at once to students in the display frame of the course space. Think of it like creating a word document directly in myCourses.

Step 1:

Place your mouse arrow over the “**Build Content**” button along the top of a content area and choose “**Blank Page.**”

Step 2:

Name the page and type the content you would like on that page in the “Content” box. You can use the content editor functions to format the text and attach files, images, web links, multimedia, and mashups.
