

Embedding a YouTube Video

Learn how to embed a YouTube video into myCourses sites by following the steps below.

Step 1:

Place your mouse arrow over the **“Build Content”** button at the top of a content area and choose **“YouTube Video”** under **“Mashups”** in the menu that appears.

Step 2:

Type a search phrase for the video you would like to embed in the **“Search”** field, and then press **“Go”** to perform the search.

If you know the URL (link) address to a specific video, you can copy/paste the link into the search box. This will make that specific video appear in the search results.

Step 3:

If you would like to watch the video before deciding to embed it, click on the **underlined YouTube URL** link to the right of the video.

Once you have decided which video you would like to embed, press the **“Select”** button beneath the video preview image.

 Office chairs are not made very well and some I have seen recently are made even worse. You are better off repairing what you have and often times you will be ...

Step 4:

Once you have selected a video you have the ability to adjust what information will appear alongside the video in your course site.

- You can adjust the name of the video in the **“Name”** field.
- You should type a description of this video and the reason you would like students to watch it in the **“Description”** box.
- Adjust the **“View”** drop-down list to decide if you want the entire video to embed on the page (choose **Embed**) or if you would like a smaller button to be embedded that plays the video when clicked (**Thumbnail**.)
