

Grading VoiceThread Presentations

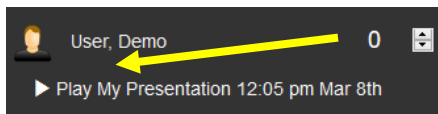

Step 1:

Unlike assignments, tests, and discussions, VoiceThreads submissions do not show up in the “Needs Grading” area. To grade VoiceThread submissions, navigate to the link students used to access the VoiceThread and click on it.

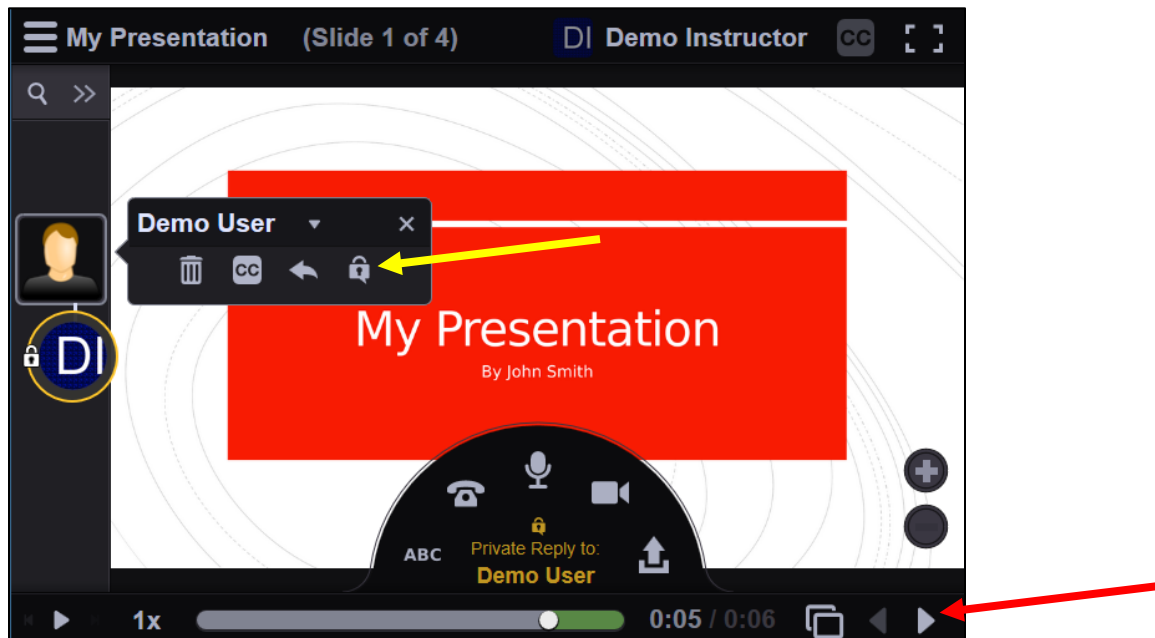

Step 2:

Click on a student’s name along the right side of the page and click “Play My Presentation” under their name to listen to watch their presentation.

Step 4:

Use the arrow buttons in the lower-right corner to move between slides. To leave private feedback to the student, click on their first comment and use the “Make a Private Reply” button that looks like a lock. You can leave your feedback as an audio, video, or text comment.

Step 3:

Enter a grade for the student in the box to the right of their name. Press the “Enter” key or click on the % sign to save their grade.

Note: Grades are entered out of 100% in VoiceThread. If your assignment is scored out of 50 points, you would enter 100% to grade the student as 50/50 points. We recommend making all VoiceThread assignments out of 100 points for this reason.
