Establishing a Zoom/Blackboard integration link-
You can integrate Zoom within Blackboard to speed things up. Why?

- You don’t need to send out links to students for individual meetings or recordings.
- Students will only see upcoming Zoom meetings for their particular course/section. They can join the meeting directly from their Blackboard course.
- Cloud recordings made for that course are immediately available for viewing by students. This can be modified, however.

Adding Zoom integration-
Go to your Bb home page. Select Tools/ More Tools. Select Zoom Meeting.

Give it a title, such as Zoom Meetings & Recordings. Hit submit.

The Zoom icon should appear on your home page. Click on it to connect to your Zoom account. (Don’t have a UML Zoom account? Let us know.)
Now schedule meetings, virtual office hours, etc. from there. They will appear here for the students in that course.

Zoom Cloud recordings are also available for students to view. Students will see a slightly different screen, only allowing them to see upcoming meetings and Cloud recordings.
