On-Campus Blackboard
Menu: Show/Hide Item

Menu items that have a box with a slash through it to the right, are hidden from student view. When Edit Mode is OFF, they will be hidden from instructor view as well.

To make a menu item available to students, hover over the title and click on the arrow that appears to the right. Select Show Link.

To review your changes you can use Student Preview, click the icon at the top right of the window to enter Student Preview. When finished select Exit Preview.
