Instructors will automatically be logged in to Blackboard Collaborate Ultra as a moderator when selecting to Join the Course Room or joining a session created for a specific date and time.

A purple tab appears at the bottom right of the screen, click on it to open a menu with different settings.
There are several icons at the bottom of the menu. The middle option is the ability to share your screen or application.

Select Share Application/Screen
Next you will choose what you are going to share, either your entire screen or an application window or a browser tab. In this view, the user has three screens.

When you first start sharing your screen, you may get the infinity view.

Select the application you intend to share and the participants will see what you intend to show them. Click the stop button in the top right of the screen or Stop Sharing at the bottom when finished.
