On-Campus Blackboard
Tests: Deploy a Test

Once you have created or uploaded your tests, you can deploy a test in a content area where you want students to find it and set the Test Options, including when they become visible to students.

Make sure Edit Mode is ON and Navigate to the content area where the test should appear.

Hover over the Assessments tab and select “Test”.

Under “Add an existing test” select the test to deploy from the list and click Submit.

Then set any test options and click Submit.

For more information contact bbhelp@uml.edu or schedule a consult.
