Using Your Elmo Document Camera with Echo360 Universal Capture

1. Attach your Elmo Document Camera to your computer via the provided USB cable.
2. Turn on the document camera. The power button will illuminate blue when boot is complete.

3. Launch Echo360 Universal Capture
4. The left input should be your screen capture. The right input can be used as either your web cam OR your newly attached Document Camera as shown in the picture below. Hit the dropdown arrow and choose your source. In this case it will be the “Elmo UVC Camera”

5. You can adjust zoom and lighting features using the controls shown in the following picture:
6. Click the red record button on the Echo360 UCAP Software... You are ready to capture!
