Sharing a Zoom Cloud meeting-

You will need to copy the recordings and place a link to those recordings on your BB pages. I would create a folder entitled Zoom Meeting Recordings, then follow this:

- Look at your Cloud Recordings.

Click on a title of a recording.

You can share the video recording or just an audio only recording of the meeting. I would click on Share for the Recording (video).
Click on Copy and paste that info either into a new webpage link or on to a notes area, then copy the URL just to the recording. Then I would paste just the URL into the Webpage link and submit that.

Final result:
A student clicking on that will go directly to the recording made.
