

VPN: *Windows*

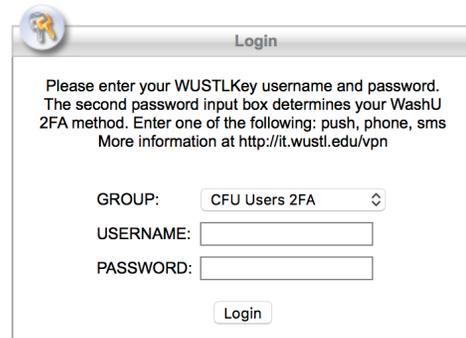

- VPN allows you to connect to University resources requiring a secure Washington University network connection to access.
- To use VPN, you must download the Cisco AnyConnect Client to your computer after being granted VPN access.

Installing the Cisco AnyConnect VPN client

In any browser, go to

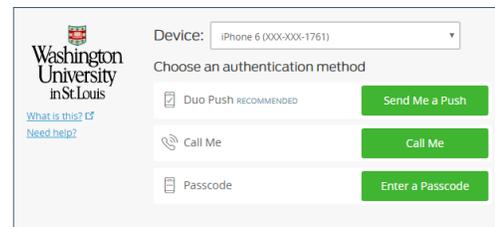

vpn.wustl.edu

Select **CFU Users**

The screenshot shows a login window titled "Login" with a key icon. The text reads: "Please enter your WUSTLKey username and password. The second password input box determines your WashU 2FA method. Enter one of the following: push, phone, sms. More information at http://it.wustl.edu/vpn". Below this, there is a "GROUP:" dropdown menu set to "CFU Users 2FA", a "USERNAME:" text box, and a "PASSWORD:" text box. A "Login" button is at the bottom.

Enter your WUSTLKey credentials and click **Login**

The screenshot shows the 2FA authentication page. On the left is the Washington University in St. Louis logo and links for "What is this?" and "Need help?". On the right, there is a "Device:" dropdown menu showing "iPhone 6 (XXX-XXX-1761)". Below that, it says "Choose an authentication method" and lists three options: "Duo Push RECOMMENDED" with a "Send Me a Push" button, "Call Me" with a "Call Me" button, and "Passcode" with an "Enter a Passcode" button.

Authenticate using your 2nd factor authentication method just as you would have set up for HRMS – If you have no method set up, please see the enrollment video [here](#)

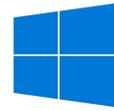

You will be prompted to download the Cisco AnyConnect Client. Install might be automatic, or you might have to click on a link and use an installation wizard.

After download, follow directions (below) for logging into VPN using AnyConnect.

Logging into VPN using Cisco AnyConnect

1. **Open Cisco AnyConnect.** (Start > All Apps > Cisco > AnyConnect)

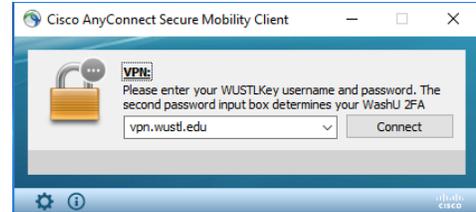

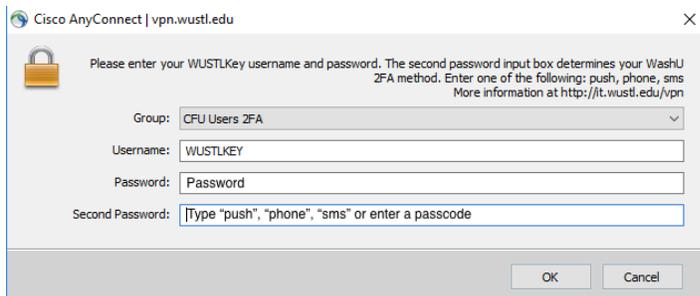

- In the Ready to Connect window, **enter:**

vpn.wustl.edu

Click **Connect**.

- In the Group Field choose: **CFU Users**
- In the username and password window, **enter your WUSTLKey**, in the password field enter **your WUSTLKey Password**, and in the second password box, choose your 2nd factor preferred method:

- Typing **push** -will send a push notification to your primary device that is connected to your account with the DuoMobile App
- Typing **phone** -will call the primary device listed within your DuoMobile Settings
- Typing **sms** -will text your primary device a new list of passcodes
 - Clicking **OK** will text you the codes and provide a “Login Failed” screen. Once the codes are received, enter the first code into the “Second Password” Box and click **Connect**
 - These codes are one-time use
- If you have the DuoMobile App, but do not have cellular service, open the DuoMobile App and click on the Key Icon” next to the WUSTLKEY option to display a passcode.
