Biology
The architecture of SARS-CoV-2 transcriptome
Structure of the RNA-dependent RNA polymerase from COVID-19 virus

Epidemiology
Characteristics of and lessons from the COVID-19 outbreak in China
Hospitalization rates and hospitalized patient characteristics in 14 states

Diagnosis & Prevention
Pooled screening for the detection of community transmission
Association of public health interventions with COVID-19 transmission
Containment explains growth of COVID-19 pandemic in China

Treatment
Remdesivir for patients with severe COVID-19

Prognosis
Clinical characteristics of hospitalized patients with COVID-19 in China

Legal, Ethics & Management
Restructuring a residency program during the COVID-19 pandemic
Literature Review Leadership Team

Derek Barisas, 3rd year MD/PhD student
Cyrus Ghaznavi, 2nd year MD student
Jared Goodman, 7th year MD/PhD student
Yiran Hou, 5th year PhD student
