Faculty Dependent Needs Study

We have engaged Horn Research in a dependent care needs analysis of the WUSM faculty. As of 2/28 the response rate was 35.5%. Thank you to all who have responded to the survey. We are looking for a more robust response in order to have a better idea of needs. We will be soon be sending another reminder to non-responders. Whether you are a father or a mother or neither or responsible in ANY WAY for children or adults or NOT in your extended family, please respond to the survey. It takes just a few minutes. As a School we have finite resources, and thus we are asking for your input in the prioritization of how best to utilize those resources to the benefit of the faculty.
