Are you looking for immersion in exciting science and cutting-edge technology? Yao Chen’s Laboratory in the Department of Neuroscience at Washington University School of Medicine is seeking a highly motivated individual for a full-time research technician position. Our laboratory conducts basic research to understand how dynamics of molecular signals contribute to neuromodulator actions and sleep functions. We employ a wide variety of techniques \textit{ex vivo} and \textit{in vivo}, including two-photon fluorescence lifetime imaging microscopy, electrophysiology, biosensor design, opto/chemogenetics, molecular biology, pharmacology, and behavior analysis. For additional information see: \url{https://sites.wustl.edu/yaochenlab/}.

The principal investigator is committed to mentoring and to creating a creative, thoughtful, and collaborative lab culture. Washington University School of Medicine is consistently ranked among the top 5 medical schools in the United States, with a dynamic research environment. The St. Louis area combines the attractions of a major city with affordable lifestyle opportunities.

Prior research experience is highly preferred (including undergraduate research experience). In addition, the candidate should be eager to learn, efficient, responsible, pay attention to details, and have strong quantitative skills.
