RESEARCH PILLAR: GRANTS

Center for the Study of Race, Ethnicity, and Equity (CRE²) Requests for Proposals: Scholar Grants

The Center for the Study of Race, Ethnicity & Equity (CRE²) invites proposals for transdisciplinary projects that enrich scholarly engagement related to the Center’s mission and 2020–2023 themes:

1) Innovations in Understanding and Improving Health Equity
2) Race and the Future of Democracy
3) Global Migratory Representations, Histories, and Crises
4) Visualizing Race and Ethnicity: Algorithms, Discourses, and Design
5) Legal, Spatial, and Political Justice

Our themes aim to focus scholarly attention on the myriad manifestations of race and ethnicity—locally, nationally, and globally—and to encourage research across the seven Washington University schools and many disciplines. The themes are not intended to exclude any scholarship, and we invite proposals for grants beyond these initial announced themes.

This solicitation provides information about one of the three principal CRE² grant programs, Scholar Grants, to support projects that are terminal in design (i.e. not intended to yield external funding).

Eligibility
Only CRE² Faculty Affiliates are eligible to apply for grants under this program. The principal investigator(s) must have applied for Affiliate status during the academic semester prior to submitting a grant application. Exceptions are granted for new faculty who arrive during the semester of this RFP. Eligibility is limited to one CRE² grant program per year as principal investigator, with the exception of the Small Grants program.
**SCHOLAR GRANTS**

The Center for the Study of Race, Ethnicity & Equity invites proposals for projects related to the advancement of the CRE\textsuperscript{2} research mission and the 2020–2023 CRE\textsuperscript{2} Programmatic Themes (see above). CRE\textsuperscript{2} will award Scholar Grants of **up to $10,000** in response to this RFP. The principal aim of this program is to assist in the development of scientific, humanistic, and cultural methodologies that can aid the completion of exemplary scholarly enterprises. Priority will be given to research projects that include the following criteria:

- Include early career faculty as principal or co-principal investigators
- Support undergraduate or graduate assistance in the completion of scholarly activities
- Focus on areas of critical interest to CRE\textsuperscript{2}, the campus, and St. Louis community
- Support the continued work of a previously funded CRE\textsuperscript{2} Research Working Group
- Have not previously received CRE\textsuperscript{2} grant support, with the exception of Small Grants

**Proposal Format**

Proposals should be no more than three (3) single-spaced pages in length, exclusive of title page, abstract, timeline, references, budget pages, current CVs for all investigators, description of any human subjects (if applicable), and appendices. Proposals are to be written in Arial 11-point font with 0.5-inch margins all around. Proposals must include an Abstract and the following sections: Overview/Aims (.5 pages), Significance and Innovation (.5 pages), and Project Description (2 pages). The Project Description section should (1) discuss how the Scholar Grant will enhance the feasibility of completing a project within 12 months; and (2) include subsections on Foundational Perspectives, Research Questions/Inspiration, Methods, and Data/Materials. Please also include a Timeline, Budget, and Budget Rationale (not included in page limit). All Scholar Grant proposals that are approved for funding and involve the use of human subjects must obtain appropriate human subjects approval through the University’s Institutional Review Board before CRE\textsuperscript{2} funds are disbursed.

**Grant Submission, Notification, and Award Period**

Proposal submissions are due by **April 1, 2022 at 5:00 pm** CDT via email to cre2@wustl.edu with the subject heading “2022 CRE\textsuperscript{2} Scholar Grant Submission.” Awards will be announced in April 2022. Project award periods are for 12 months beginning June 1, 2022, with an extension of up to 6 months available upon grantee request and approval from CRE\textsuperscript{2} leadership.

**Budget Guidelines**

Project budgets may request up to $10,000 in direct costs to support any activity that directly relates to the successful conduct of the project. There are no indirect costs paid on CRE\textsuperscript{2} Grants. Budget items may include support for data entry, interviews, data acquisition, access to restricted-use data, travel costs related to data collection or meetings with collaborators, space rental, salary compensation or contribution to research accounts (salary and compensation should be kept to less than 20% of the award amount), artist stipends, creative materials, curatorial support, editing, and graduate and undergraduate research assistance. The Center will not pay for computer equipment when that computing can reasonably be accomplished with the existing equipment on campus. Unspent funding at the end of the project period will revert to
the CRE\textsuperscript{2} Grant pool unless a request for a time extension is submitted and the CRE\textsuperscript{2} Co-Directors approve the request. Budget Rationales should include outside resources (if any) that will be used to achieve the aims of the project.

**Review and Selection**

The CRE\textsuperscript{2} Leadership Team will screen all submitted proposals to determine whether the proposals meet the program’s goals. Proposals will be reviewed by a Grant Selection Committee composed of the CRE\textsuperscript{2} Leadership Team and at least two Faculty Affiliates. In addition to the preferences mentioned above, the following prioritized criteria will be used in evaluating the proposals:

1. The availability of funds from a second source of support (i.e., research center, institute, academic unit)
2. The overall quality and significance of the proposed scholarly work
3. The likelihood that the proposed project will be completed with allotted funds
4. Whether a project has received funding for a scope of work from other sources that CRE\textsuperscript{2} could augment (that is, the scope of work, not just the funding)
5. Supports the continued work of a CRE\textsuperscript{2} Research Working Group

**Monitoring and Grantee Obligations**

The Center’s Associate Director will monitor progress on Scholar Grant projects. Grantees will provide an expense report upon request. Grantees will submit a final progress report and any products of the grant within one (1) month after the end date of their Scholar Grant period and will notify CRE\textsuperscript{2} of any proposals and scholarly works subsequently submitted or awarded/accepted. Potential grant products and scholarly works include publications; grant proposals; recordings; installations or exhibits; documentation of conferences, symposia, or residencies; and scholarly awards or honors. All products generated with the support of a CRE\textsuperscript{2} Scholar Grant will acknowledge the program using the statement, “This work has been funded by the Center for the Study of Race, Ethnicity & Equity at Washington University in St. Louis Scholar Grant program, but the views remain those of the authors.”

**The Center’s Mission Statement**

CRE\textsuperscript{2} brings the research force of Washington University to study how race and ethnicity are integral to the most complex and challenging issues of our time. We believe in field-defining research, innovative learning, and strategic engagement that will transform scholarship, policy, and clinical interventions where race and ethnicity are at the center.
